GAZETTE NOTICE No. 8497

PROBATE AND ADMINISTRATION

TAKE NOTICE that after thirty (30) days from the date of this Gazette, and unless cause be shown to the contrary, I intend to apply to the High Court at Kakamega for representation of the estates of the persons named in the second column of the schedule hereto, who died on the dates respectively set forth against their names.

And further take notice that all persons having any claims against or interests in the estates of the said deceased persons are required to prove such claims or interests before me within two (2) months from the date of this Gazette, after which date the claims and interests are proved will be paid and satisfied and the several estates distributed according to law.

LET ALL the parties concerned take notice that a petition for a grant of letters of administration intestate to the estate of the above-named deceased, who died at Katumoi Sub-location, on 25th June, 1999, has been filed in this registry by Samson Sirma Chebii, of P.O. Box 58, Kaptakat, in his capacity as an administrator of the deceased's estate.

And further take notice that objections in the prescribed form to the making of the grant are invited and must be lodged in this registry within thirty (30) days of publication of this notice.

And further take notice that if no objection has been lodged in this registry in the prescribed form within thirty (30) days of the date of publication of this notice, the court may proceed to make the grant as prayed or to make such orders as it thinks fit.

Dated the 15th September, 2008.

B. N. MOSIRIA,
District Registrar, Iten.

THE PHYSICAL PLANNING ACT

(No. 6 of 1996)

COMPLETION OF PART DEVELOPMENT PLAN

(PDP No. MRU/167/09/02 for Proposed Site for CDF Offices, Youth Affairs, Mandeleo Ya Wanawake and Meru Hospice)

NOTICE is given that the above-mentioned part development plan was on 16th July, 2009, completed.

The part development plan relates to land situated within Meru Municipality.

Copies of the part development plan have been deposited for public inspection at the office of the District Physical Planning Officer, Imenti North.

The copies so deposited are available for inspection free of charge by all persons interested at office of District Physical Planning Officer, Imenti North, between the hours of 8.00 a.m. to 5.00 p.m. Monday to Friday.

Any interested person who wishes to make any representation in connection with or objection to the above-named part development plan may send such representations or objections in writing to be received by the District Physical Planning Officer, P.O. Box 1354, Meru, within sixty (60) days from the date of publication of this notice and such representation or objection shall state the grounds on which it is made.

Dated the 16th July, 2009.

D. K. MMBAI,
for Director of Physical Planning.

GAZETTE NOTICE NO. 8406

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED SUGAR FACTORY IN MSABWENI DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental

impact assessment study report for the implementation of the proposed sugar factory by Kwale International Sugar Company Limited.

The proposed project involves established of a large sugar cane growing estates; and construct of a sugar processing factory. The company intends to implement the project in two phases. Phase 1 of the project will have initial crushing capacity of 300 tons of cane per day (TCD). In phase 2 it will be expanded to crush 5000 tons of cane per day.

The factory will be located in Ramisi Sub-location, Kingwede Location, Msambweni District whereas the “nucleus” cane growing area straddles Msambweni, Lunga Lunga and Diani Divisions of Msambweni District. The total size of the “nucleus” cane growing area is approximately 15,000 acres.

The project anticipates the following impacts and mitigation measures:

Possible impacts

Soils

Mitigation measures

- Clearing of vegetation in the remaining 30% of uncleared nuclear estate land should be done with consideration to leaving natural vegetation buffer strips of at least 2m on either side of natural drainages and retention of trees that will not obstruct future farming activities.
- The choice of fertilizers used in the seed-cane nursery and pilot cane areas should be informed by assessment of soil properties in the area.
- Areas where soils are susceptible to wind erosion should be protected by allowing for perimeter vegetation buffer strips.
- Regular monitoring of agricultural return flows at strategic points along river/stream courses, particular where there are chemistry-sensitive aquatic ecosystems such as wetlands and mangroves.
- Put in place natural vegetation buffer strips of at least 2m on either side of natural drainages and along the perimeter of the cane farm plots.

<i>Possible impacts</i>	<i>Mitigation measures</i>	<i>Possible impacts</i>	<i>Mitigation measures</i>
Air quality	<ul style="list-style-type: none"> The choice of fertilizers used in the seed-cane nursery and cane growing areas should be informed by assessment of the soil properties and condition in the area. Incorporate soil organic matter into the soil to improve soil structure every planting time. 	Effluents	<ul style="list-style-type: none"> The proponent will develop a spill prevention plan. The proponent will prepare and implement chemical handling and storage procedures and train employees on their use. The proponent will ensure that chemical containers are labeled and documentation regarding safe handling or first aid measures the proponent will make spill clean-up equipment readily available in chemical storage areas. The proponent will construct concrete berm around areas where liquids are stored to contain any spillage. Work will be monitored during construction to ensure that there are no releases of deleterious substances.
	<ul style="list-style-type: none"> Appropriate ventilation all working areas will be necessary. Suitable exhaust hoods will improve ventilation. Workers shall wear nose dust masks in working areas where the dust levels will be significantly high. Wet scrubbers will be necessary for the removal of dust and other gaseous pollutants from boiler emissions. Potential leakages of sulphur dioxide at the syrup sulphitation shall be eliminated. The proponent will develop a bagasse handling management plan to manage bagasse supply and demand to the boilers and to ensure bagasse quality is maintained during storage. The proponent will undertake to repair leakages in bagasse and bagacillo chutes to reduce dust releases. All trucked materials will be covered during transport. Personnel working directly with dust-generating materials will be provided personal protective equipment and training. Speed limits for vehicles to be set particularly in dry seasons. 		<ul style="list-style-type: none"> The proponent will undertake to design and build a wastewater treatment system. During operations of the factory the proponent will undertake efficient water use and recycling as well as implement an efficient water treatment plant in order to minimize the wastewater generated. Encourage water re-use and/or conservation. Liquid effluent should be treated before discharge, passed through a number of ponds and the last pond should have fish breeding, after which the liquid effluent is discharged either in a river or in the ocean. Hazards and toxic waste material should be managed according to international protocols and practices and comply with local regulations as well. Disposal of human excrement would be through construction of septic pits and/or pit latrines. Construct a wastewater treatment plant to treat both factory effluent and domestic sewage to produce an effluent whose characteristics meet the World Bank guidelines.
Surface and resources	<ul style="list-style-type: none"> Ensure provision of drainage channels as much as is possible. Construction and maintenance of silt traps around the factory construction area. Controlling soil erosion at source as much as possible. Prompt re-vegetation with grasses, shrub and trees. Minimize cleared area as much as possible. Manage and maintain overland drainage control. Undertake a regular water quality monitoring program of River Ramisi and other surface water bodies in the general locality of the factory. 	Accidental spills	<ul style="list-style-type: none"> The proponent will develop both a spill prevention plan and an accident emergency response plan. The proponent will prepare and implement chemical handling and storage procedures and train employees on their use. The proponent will conduct regular visual inspection of hazardous materials storage areas, including aboveground tanks. The proponent will ensure that chemical containers are labeled and documentation regarding safe handling or first aid measures. The proponent will ensure that chemical containers are stored in a safe fashion in a designated storage area. Oil-absorbent material, tarps, and storage drums will be used to contain and control any minor releases of engine and other equipment oil.
Ground water resources	<ul style="list-style-type: none"> Cover all material stockpiles with tarpaulin to reduce contact with precipitation, ensure they are laid on impervious surfaces, and ensure that the leachates are entrained in drainages leading to the effluent treatment plant. Ensure that stockpiling areas are above and sufficiently separated (depth wise) from the groundwater table. 		

<i>Possible impacts</i>	<i>Mitigation measures</i>	<i>Possible impacts</i>	<i>Mitigation measures</i>
Water sharing, supply and demand management	<ul style="list-style-type: none"> • Due to its high cost of installation, the drip irrigation system should be installed in phases to replace the sprinkler irrigation system which will be used initially in the nucleus estate. • Avoid central pivot irrigation systems as these are not efficient with respect to water conservation • Irrigate during late evening and early morning to avoid high evaporative losses that occur during daytime 		<ul style="list-style-type: none"> • All sediment traps should be regularly cleaned and maintained. • Appropriate measures should be implemented to control runoff and drainage from entering the water bodies. • Effluents from the factory should be properly treated before discharge into surface water bodies. • Fuel, oil and lubricants from maintenance of farm and factory vehicles and equipment should be properly discharged.
Terrestrial environment	<ul style="list-style-type: none"> • Avoid clearing/altering any land unless necessary; if unavoidable, use best practices that minimize disturbance of the land resources, flora and fauna. • Ensure that equipment are in perfect working order and cause less noise/air pollution nuisance to fauna • Where irrigation is used, employ more water efficient systems in order to conserve water required to support the dependent ecosystems. • KISCOL should come up with clear measures to protect the nearby forests such as Buda Forest. • The sugar zones should be surrounded by planted trees. • Trees should be planted on either sides of the roads in the factory and farming grounds. 	Noise and vibrations	<ul style="list-style-type: none"> • Installation of portable barriers to shield compressors and other small stationary equipment as may be necessary. • Use equipment designed with noise control elements, preferably silencers • Direct equipment exhaust stacks and vents away from buildings, when feasible or channel such exhausts through rock mufflers to reduce the noise levels significantly • Route truck traffic away from noise sensitive areas, where feasible • Co-ordinate with relevant agencies regarding all substation construction activities in residential areas • Install sound barriers for pile driving activity • Compulsory wearing of protective ear masks or ear plugs in factory.
Aquatic environment	<ul style="list-style-type: none"> • Existing wetlands, riparian and indigenous vegetation need to be conserved and those that are degraded restored. • Protection and rehabilitation of riparian buffer zones for river bank stabilization and the protection of aquatic biodiversity. • Farm and factory design should be based on land capability and include planning of riparian buffer zones and other aquatic ecosystems. • Exposed areas should be minimized to reduce the potential for increased siltation, contamination of runoff, and erosion during construction. • Runoff-related impacts associated with above ground construction activities should be controlled through the use of sediment traps. • Temporary ditches should be provided to facilitate runoff discharge into appropriate watercourses, via a silt retention pond. • Permanent drainage channels should incorporate sediment basins or traps and baffles to enhance deposition rates • Fuel, oil and lubricants from maintenance of construction vehicles and equipment should be properly disposed. • All temporary and permanent drainage pipes and culverts provided to facilitate runoff discharge should be adequately designed for the controlled release of storm flows. 	Archaeological, historical and cultural sites	<ul style="list-style-type: none"> • The proponent should work closely with the local community leaders and the National Museums of Kenya order to ensure that the sites are not interfered within any way. • The proponent should sensitize his workers to appraise themselves with the protected forests in order to avoid any form of degradation. • The proponent should consider assisting the local communities and other agencies involved in preservation activities in the area.
		Solid waste and waste oils	<ul style="list-style-type: none"> • It will be an express condition of the contract that before the contractor is issued with a completion certificate; he will clear the site of all debris and restore it to a State acceptable by the supervising engineer and environmental consultant. • Materials from excavation of the ground and foundation works shall be reused for earthworks and landscaping where applicable. • Waste bins shall be placed at strategic weather proof locations within the site as collection centers to facilitate separation and sorting of the various types of wastes and either incinerated or recycled where applicable. • Any hazardous and toxic waste materials should be stored and disposed off in accordance to national and internationally accepted standards
		<i>Possible impacts</i>	<i>Mitigation measures</i>

<p>Social impacts</p>	<ul style="list-style-type: none"> • Oil drip traps should be regularly maintained as per a maintenance schedule for maximum performance. • All the solid waste generated within the factory and related facilities shall be collected at a central weatherproof bin, checked to ensure there is no toxic waste, and stored for incineration. • Avoid burning cane leaves in the field before harvest time, the trimmings from the sugar cane should be spread in the field to biodegrade. • Use bagasse from the cane as fuel for steam and power generation. • Use molasses beneficially as a feedstock for fermentation and organic chemical manufacturing, production of citric acid and yeast among others. • Compost organic solids from press mud (cane laundry) to make high quality organic manure for agricultural production. • Regular maintenance of factory machineries and vehicles should be ensured. • Households within the staff quarters shall contract a NEMA registered waste collector to manage waste generated in the estate. • There is need to have a cordial working relationship between the company and the community to avoid any conflict. • The proponent should liaise with other organizations and agencies in the area to beef up efforts for community policing and security provision. These organizations include Kenya police, KWS and the local authority. • A comprehensive assessment should be undertaken to determine the water demand for various users in the area prior to any damming along rivers in the project area. • Unskilled labour should be sourced from the project area. There should also be an equitable distribution preferably by use of administrative regions such as locations for the available slots. • During operations the company should not fence off the plantations in order to allow free movement of livestock to pasture area and watering points like the Koromojo dam. • The proponent should have a swift transition phase after the clearing of vegetation and trees to sugar cane plantations. • The company should encourage basic life education and sensitization programmes to its employees during project operation. • The company should liaise with the provincial administration and police department to provide adequate security during operation. • The company should consider compensating for lost property the families that were affected during relocation of squatter from the former Ramisi land. 	<ul style="list-style-type: none"> • The proponent should construct fire breaks between the plantations and private land. • KISCOL, in consultation with the local administration and community elders, should discuss and agree on free throughway routes for humans and livestock to minimize disruption on communication. <p>Economic impacts</p> <ul style="list-style-type: none"> • The proponent should support poor farmers willing to produce sugar cane with start up capital in terms of seeds, fertilizer, farm machinery and labour. • The company should employ non-skilled labour force from the local communities. • Local leaders particularly those of Out grower groups should be involved in the project cycle throughout. • The company should also encourage related companies particularly financial services companies and agricultural based industries to venture into the area. <p>Occupation, health and safety</p> <ul style="list-style-type: none"> • Worker health and safety should be assured through the development and implementation of standard workplace practices and the company HSE/OHS policies. • Training and licensing industrial vehicle operators in the safe operation of specialized vehicles such as forklifts, including safe loading/unloading, load limits and ensure that drivers undergo medical surveillance. • Sanitary facilities shall be provided and cleanliness shall be ensured as per set company's health standards. • Safety awareness on machinery use will be created through training and regular safety meetings held. • The company should ensure that it has adequate fire fighting equipment and engines available and trained personnel to man the equipment. • The proponent proposes to have a dispensary within the project site area. <p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED CONSTRUCTION KIAMBU
ROAD SHOPPING MALL ON L.R. 5989/16, KIAMBU ROAD

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Construction of Kiambu Road Shopping Mall, on L.R. No. 5989/16, Kiambu Road.

The proposed project intends to construct a shopping mall (commercial centre) that will include a supermarket, coffee and food courts, a banking hall, offices, departmental stores, a theatre, aerobics hall(gymnasium) and adequate parking facility for up to 81 cars.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Loss of biodiversity	<ul style="list-style-type: none"> During the decommissioning stage the proponent shall rehabilitate the land by removing any unnecessary materials that shall be covering the land and preventing the natural biodiversity. After completion of the project the proponent will rehabilitate the land by planting trees and ornamental flowers on the disturbed areas. The grass cover that does not interfere with the siting of the project will be left intact.
Air quality/particulate matter (dust)	<ul style="list-style-type: none"> Vehicle speeds in the construction area will be limited to minimize dust in the area. Discourage idling of vehicles i.e. vehicle and equipment engines will be turned off when not in direct use to reduce exhaust emissions. Regular maintenance of construction plant and equipment. The management will sensitize the employees on sound environmental management. Provide Personal Protective Equipments such as nose masks to the workers on site. The construction contractor will water the site with exposed soil surfaces twice each day during dry weather.
Occupational health and safety	<ul style="list-style-type: none"> All workers should be provided with full protective gear. These include working boots, overalls, helmets, goggles, earmuffs, masks and gloves. Construction crew at the site will be sensitized on social issues such as drugs, alcohol and diseases. A first aid kit should be provided within the site. This should be fully equipped at all times and should be managed by qualified persons
<i>Possible impacts</i>	<i>Mitigation measures</i>
	<ul style="list-style-type: none"> The contractor should have workmen's compensation cover. It should comply with Workman Injury benefits Act, as

well as ordinances, Regulations and Union Agreements.

- Adequate sanitary facilities should be provided and standard cleanliness maintained.
- Food handlers preparing food for the workers at the site should be controlled and monitored to ensure that food is hygienically prepared.
- Regular maintenance of machinery on site in line with the provisions of the Factories and other Places of Work Act CAP 514.

Soil erosion

- Avoid unnecessary movement of soil materials from the site.
- Provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off.
- Control construction activities especially during rainy conditions.
- Re-surface open areas after completion of the project and introduce appropriate vegetation.
- Provide suitable storm water drainage channels to effectively discharge water to safe areas. Channels need to be regularly maintained and repaired to avoid point discharge in case of breakages or blockages.
- Conduct landscaping after the project completion to maximally control any possible chance of soil movement

Fire, oil spills
contamination of
underground water by
effluent from
generator room

- To curb fire the proponent should install fire fighting equipments which should be serviced regularly.
- Workers who will work on the commercial centre including the storage facilities and supermarket should be trained on fire fighting skills and fire drills should be conducted at least once year.
- Annual Environmental Audits will be conducted on the facility.
- Assembly point and fire exists should be identified clearly within the proposed commercial centre.
- A canopy should be constructed to allow proper air circulation to safeguard the health of workers.
- Warning signs should be well labelled and deposited at appropriate places. These should include such warnings as "do not smoke", "switch off engine", "switch off phone" etc.
- There should be a well stocked first aid kit.

Sewage and effluent
disposal

- Routine checkups and monitoring of the sewage treatment plant to avoid leakages and blockages.

Possible impacts

Mitigation measures

- The proposed capacity of the sewerage treatment plant is big enough to accommodate the number of anticipated

	people		Increased water demand	<ul style="list-style-type: none"> • Avoid wasting the water supplied to the site during construction activities. • Encourage water reuse/recycling during both construction and operational phases. • Roof catchments should be provided with rainwater harvesting systems to enhance collection and storage of rain water • In order to encourage water conservation during operational phase the proponent should install water conserving taps that turn off automatically when water is not in use. • The existing dam should be conserved and the water used for watering of flowers etc. • The contractors should use water dowsers to bring in water for construction activities especially during periods of high water demand subject to authorization by existing water Regulatory Board. • Provide notices and information signs on means and needs to conserve water resource to awaken the civic consciousness with regard to water usage and management.
Surface drainage	<ul style="list-style-type: none"> • Proper construction of the sewage treatment plant will be done to meet the standards required by City Council • Quality building materials will be used to meet the standards of Kenya Bureau of Standards (KEBS).. • During construction, the design of the drainage system should ensure that surface flow is drained suitably into the public drains provided to control flooding within the site. • Drainage channels should be installed in all areas that generate or receive surface water such as car parking, drive ways and along the building block-edges of the roofs. • Channels should be covered by approved materials to prevent occurrence of accidents and entry of dirt that would compromise flow of run-off. • Drainage channels should ensure safe disposal of run-off/surface water and should be self-cleaning. • Paving of the side walkways, driveways and other open area should be done using pervious materials to encourage recharge and thus reducing water run-off volume. 		Increased power demand	<ul style="list-style-type: none"> • Use energy detectors for lighting systems to conserve energy. • All electrical appliances should be switched off when not in use. • Put off all lights immediately when not in use/required or are not needed • Use energy conserving electric lamps for general lighting. • Utilize natural light inside buildings to avoid using electricity for lighting during the day.
Solid waste	<ul style="list-style-type: none"> • The resulting debris will be collected, transported and disposed off at the appropriate and suitable dumpsites. • The materials should be properly segregated and separated to encourage recycling of some of wastes. Demolished stones can be used as backfills. 			
Noise	<ul style="list-style-type: none"> • Construction works should be carried out only during the specified time of 0800 hrs to 1700 hrs. • Machineries should be maintained regularly to reduce noise resulting from friction. • There should not be unnecessary honking of the involved machinery. • Provision of bill boards at the construction site giving notice to the construction activity and timings. • Sensitize drivers of construction machinery on effects of noise. • Billboards will be suitably erected on the start of the project to psychologically prepare the people in the vicinity. • Construction activities to be restricted to daytime. • Workers in the vicinity of high-level noise to wear safety and protective gears. 			
Possible impacts	<p><i>Mitigation measures</i></p> <ul style="list-style-type: none"> • Provide barriers such as walls around site boundaries to provide some buffer against noise propagation. 			

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.

(c) Provincial Director of Environment, Nairobi Province.

(d) District Environment Office, Nairobi West District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,

National Environment Management Authority.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
 ENVIRONMENTAL IMPACT ASSESSMENT STUDY
 REPORT FOR THE PROPOSED ASPHALT PROCESSING PLANT
 INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed asphalt processing plant.

The proposed project will involve production and processing of asphalt. The facility will be situated on plot L.R. No. 20211 in Katana Location, Athi River Division, Machakos District.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Excessive energy consumption	<ul style="list-style-type: none"> • Installation of energy efficient lighting bulbs and sensor switches. • Installation of an alternative source of energy power backup.
Air pollution	<ul style="list-style-type: none"> • Good housekeeping will be done.
Wastes management	<ul style="list-style-type: none"> • Segregation of waste will be done. • Proper and thorough cleaning up of the system to prevent blockage. • Both liquid and solid wastes will be handed over to authorized disposal agents for disposal. • Develop spill prevention and control plan to counter emergencies and accidental spillages of oil. • Refuse area will be secured and enclosed to minimize the risk of pests and rodents.
Occupational health and safety	<ul style="list-style-type: none"> • Provision of fire fighting equipments, such as sand buckets, hazard warning signs and safety instructions, alarm systems. • Provide first aid kits. • Frontage signage and lighting during construction of the parking spaces. • Exit and entry will be clearly marked for the trucks transporting materials. • Provision of protective clothing to the workers during construction and operations. • Construction of a perimeter wall.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- Provincial Director of Environment, Nairobi Province.
- District Environment Office, Machakos District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
 ENVIRONMENTAL IMPACT ASSESSMENT STUDY
 REPORT FOR THE PROPOSED ELDAS RANCH

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Eldas Ranch.

The proposed project intends to introduce better livestock management; more productive livestock breeds provide training and market opportunities to livestock in the area.

- Fencing the project area with a barbed wire supported by Concrete poles.
- Development of ground water supply through drilling of a borehole within the ranch.
- Development of paddocks.
- Introduction of Livestock specifically, Borana cattle, Galla and Somali goats, Somali, Gabra and Turkana camels.
- The ranch will engage in production of fodder to supplement the natural vegetation.
- Construction of a ranch house to house the ranch manager
- The developers intend to construct a 1.2 km long air strip within the ranch for private use where light aircraft can land.
- Other infrastructure facilities include: water storage tanks, pump house, communal water point, animal trough and water supply distribution network within the ranch.

The proposed ranch consists of 3665 ha of fenced range land, near the town of Eldas, 104 km west of Wajir.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Loss of access of pastoral community	<ul style="list-style-type: none"> • Commitment from developer that the land will not be used other than for pastoral development and /or to seek permit for change of use. • Ranch to have higher livestock carrying capacity than free range • Avail grass and other vegetation seeds to be replanted in the free range during rainy season as compensation to the community. • Incorporate District Pastoral Association, District Livestock Development on Advisory Board for the Ranch. • Demarcate additional livestock access route on the western boundary corridor of the ranch that links to Kilikile wells from the main Wajir-Eldas Road.
Introduction of new breeds of livestock	<ul style="list-style-type: none"> • Controlled experiments within the ranch before releasing into the public pasture lands. Approval of such breeds by district livestock officer
<i>Possible impacts</i>	<i>Mitigation measures</i>
	<ul style="list-style-type: none"> • Develop training programme for local pastoralist who may want such breeds.
Vegetation degradation	<ul style="list-style-type: none"> • Conserve ranch as a Green Belt to compensate depletion in other areas around Eldas.

- Occupational Health and Safety
- Incorporate Fire breaks within ranch to limit risk of spreading to the range land
 - Secure fuel for generator and other purposes in safe custody.
 - Restrict burnings and fires within ranch.
 - Install Livestock Crossing Warning Signs along the Wajir–Eldas Road within proximity of ranch.
 - No visible buildings near the road side to limit stress to unaccustomed livestock.
 - Provide illumination along the fence using solar power.
 - Use safer fencing material.
- Noise from Light Aircraft Traffic distracting livestock in surrounding habitat.
- Develop guidelines to pilots using the facility to use best practice in aircraft noise reduction as they approach livestock habitat both in ranch and outside.
- Livestock straying into air strip
- Fence off air strip to keep off animals
- Birds on air craft landing Zone
- Modify flight path, use noise generators or other established methods to avoid bird hazards.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839–00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.

(c) Provincial Director of Environment, North Eastern Province.

(d) District Environment Office, Wajir District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,
National Environment Management Authority.

GAZETTE NOTICE No. 8712

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF BULK MOUNDED LPG STORAGE FACILITY IN MIRITINI DIVISION OF KILINDINI DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed development of a bulk moulded LPG storage facility in Miritini Division of Kilindini District.

The storage facility will consist of bulk LPG moulded storage tanks, a pipeline emanating from common user manifold (CUM) and connected to the LPG storage tanks, infrastructure and utilities.

The project anticipates the following impacts and mitigation measures:

Possible Impacts

Mitigation Measures

- Geology and topography
- Prevent soil erosion all non-built up areas should be landscaped and appropriate soil bind grass planted.
 - LPG storage tanks will be constructed on top of a hill, construct and maintain retaining walls, stone pitching, gabions, etc. to prevent upstream run-on deposition of soil.
 - Grout all existing pipes after excavation of the 5m high topsoil.
- Surface water
- Ensure that spills emanating from construction plant and equipment are cleaned immediately.
 - If possible undertake initial construction activities during the dry season to prevent water/soil run-off especially on side slopes.
 - Water should be diverted away from the project footprint areas through properly constructed drainage channels.
- Air quality
- Develop and implement effective measures for minimization of dust during the preconstruction and construction phase, followed by rehabilitation in a timely manner.
 - Contractor to ensure that construction plant and equipment is in a good state of repair at all times to prevent adverse exhaust air emission.
- Waste
- Develop and implement safe procedures for management of non-hazardous and hazardous wastes in accordance with L.N. 121: Waste Management Regulations, 2006.
 - Contractor is responsible for this during the construction phase and proponent during the operational phase of the project.
- Noise and vibration
- Contractor's plant and equipment should comply as a minimum with requirements of L.N. 25: Noise prevention and control Rules, 2005.
- Traffic
- Develop and implement measures to repair regularly used roads to the project site especially the Magongo Road turn-off to the project site.
 - Ensure that contractor vehicles comply with axle loads limits.
 - Develop and implement a traffic management plan to take advantage of off-peak hours for delivery of construction materials and abnormal loads during the construction phase.
 - Contractor drivers should possess defensive driving skills gotten from a reputable training consultancy.
- Occupational health and safety
- Develop and implement contractor safety programme which includes the relevant provisions of OSHA, WIBA and their respective subsidiary legislation.

Possible impacts

Mitigation measures

- Specifically ensure that the construction complies with L.N. 40: Building Operations and Work of Engineering Construction Rules, 1984.

The full report of the proposed project is available for inspection during working hours at:

- (e) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (f) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- (g) Provincial Director of Environment, Coast Province.
- (h) District Environment Office, Mombasa District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,
National Environment Management Authority.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
