THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

DRAFT STRATEGIC ENVIRONMENTAL ASSESSMENT REPORT FOR THE PROPOSED INDUSTRIAL PARK MASTER PLAN BLOCK 15/1757 ELDORET MUNICIPALITY, UASIN GISHU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to provisions of section 57A of the Environmental Management and Co-ordination Act and regulations 42 and 43 of the Environmental (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received a Draft Strategic Environmental Assessment Report for the Proposed Industrial Park Master Plan Block 15/1757 Eldoret Municipality, Uasin Gishu County. The SEA findings are expected to integrate the existing sectoral plans and programs to establish sustainable economic zone development mechanisms.

Industrial and Commercial Development Corporation (ICDC) is the PPP owner. The Eldoret ICDC industrial park occupies approximately 135 acres of land on Block 15/1757, in Eldoret Municipality, Uasin Gishu County. The vision of this industrial park is to be a leading frontier in industrial estate design, setting standards in sustainability, social amenity and building efficiency.

The master plan for the park has been designed to foster sustainable industrial development through an integrated approach. This approach has embraced the principles of eco-industrial parks that focuses on achieving a community of manufacturing and service businesses that are keen on enhanced economic and environmental performance through collaboration in managing environmental and resource issues, including energy, water and materials.

Subsequently, the park promotes a system of planned materials and energy exchanges that seek to minimize energy and raw materials use, minimize waste, and build sustainable economic, ecological and social relationships. The master plan broadly provides rationale for land use activities within the site in addition to providing detailed infrastructure plans for roads, power distribution, sewerage, drainage, telecommunication, and utility installations.

This park is largely envisaged to be an Agro-Industrial Park. 'Agro Industry' means a unit, which adds value to agricultural products/intermediates/residues, both food and non-food, by processing into products, which are marketable or usable or edible; or by improving storability, or by providing the link from farm to the market or a part thereof.

The proposed park will house 5 different broad types/clusters of industries including:

- Light Heavy Industries Cluster entailing primary processors, secondary processors and tertiary processors based on their value chain systems. For instance, a wheat milling industry as a primary processor will have a bakery as the secondary processors using its outputs (wheat flour).
- The Light Industrial Cluster is composed of two main industrial activities, namely food processing and textile industries. However, other compatible industries based on both material exchanges and value addition may be located in the cluster.
- Research and Incubation Cluster which will accommodate institutions specialized in industrial research and development and training young industrial ventures. Some of the targeted entities include the Kenya Industrial Research Development Institute (KIRDI), Moi University, Eldoret Polytechnic, and KAM Research Division.
- Commercial Cluster to complement the industrial functions. Some of the commercial provisions in the park include: restaurants and fast-food outlets, convenience stores, banks, travel agencies, dry cleaners, health clubs, barber shops and beauty salons, automobile service stations, truck stops, copy centers, mailing and delivery services, office supply stores, and other support retail businesses.
- Service and Logistics Cluster categorized into go-downs/warehouses, production of packaging materials, and logistics business outsourcing.

The specific objectives for this SEA Study are:

- Provide guidelines for sustainable management of environmental aspects of the industrial park.
- Incorporate environmental sustainability measures in the design phase of the master plan.
- Provide guidelines for incorporation of environmental issues in the sub-projects of the Master Plan.
- Provide environmental quality benchmarks for monitoring future environmental quality.
- Recommend institutional arrangements for sustainable management of environmental aspects of the Industrial Park.

The key potential impacts and recommendations are highlighted below:

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

DRAFT STRATEGIC ENVIRONMENTAL ASSESSMENT REPORT FOR THE EXPANDED IRRIGATION PROGRAMME AND NATIONAL ECONOMIC PROGRAMME IN TANA AND ATHI BASINS

INVITATION OF PUBLIC COMMENTS

PURSUANT to provisions of section 57A of the Environmental Management and Co-ordination Act and regulations 42 and 43 of the Environmental (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received a Draft Strategic Environmental Assessment Report for the Proposed Expanded Irrigation Programme and National Economic Programme in Tana and Athi basins. The SEA findings are expected to integrate the existing sectoral plans and programs to establish sustainable economic zone development mechanisms.

National Irrigation Board is the PPP owner. The proposed programmes are the National Economic Programme (NEP) and Expanded Irrigation Programme (EIP). Under the NEP is the Galana/Kulalu Food Security Project where the Government targets to put 1 million acres under irrigation and other enterprises by 2017. Expanded Irrigation Programme (EIP) aims to attain national food security in Kenya by eliminating hunger amongst Kenyans through acceleration of coverage of the 1.7 million acres potential irrigation land in the country which will ultimately make Kenya a net exporter of food. The programme aims to develop 540, 000 ha of land for irrigation in 5 major river basins, among them Tana and Athi River basins in order to improve sustainability in agriculture and production through irrigation. This will in turn increase food security by expansion of areas under irrigation which will in the long run enhance income levels of the farmers and raise living standards of about 1,525,400 households within the targeted areas

The specific objectives for this SEA Study are:

- To limit water pollution within programme area to levels that do not damage natural systems;
- To maintain water abstraction, run off and recharge within carrying capacity of local rivers;
- To reduce soil contamination and safeguard soil quality;
- To minimize solid waste arising from proposed activities and find possibility of waste recovery through recycling and composting;
- To avoid damage to designated wildlife sites and protected species within the programme area;
- To maintain biodiversity within the programme area by avoiding irreversible losses;
- To ensure the sustainable management of key wildlife sites and the ecological processes on which they depend;
- To reduce vulnerability of local people to the effects of climate change including crop failures and flooding;
- To give access to satisfying and rewarding employment opportunities to local people through employment creation in the agricultural sector; and
- To increase investment in agriculture within the programme area.

The key potential impacts and recommendations are highlighted below:

Issues	Potential Impacts	Proposed Recommendations
Water Resources	<ul style="list-style-type: none"> • Overuse of the available and rather limited water supply, and possible depletion of the same. • Contamination of surface and groundwater sources by wastewater. 	<ul style="list-style-type: none"> • Hydrological survey of water resources within the basin. • Field observations and GIS-based mapping from existing paper maps. • Review of existing water quality monitoring results from the local rivers to ascertain pollution levels.
Soils	<ul style="list-style-type: none"> • Disturbance of soil through excavation and construction of irrigation infrastructure. • Contamination of soil through disposal of wastes and/or accidental spillage. • Soil degradation resulting from vegetation clearance. • Soil erosion as a result of intensification of agricultural activities. 	<ul style="list-style-type: none"> • Field observation to identify soil types and structures and establish baseline soil conditions. • GIS mapping from existing soil and vegetation maps.

Issues	Potential Impacts	Proposed Recommendations
Ecosystems Terrestrial environment (Habitats, Flora and Fauna)	<ul style="list-style-type: none"> Reduced vegetation cover. Disturbance of wildlife. 	<ul style="list-style-type: none"> Review of existing literature on habitats, and biodiversity within the basin. Field observation and assessment of habitats (flora and fauna). Mapping of key information such as wildlife reserves, migration corridors and nesting grounds.
Aquatic Environment (Habitats, Flora and Fauna)	<ul style="list-style-type: none"> Pollution of habitats through waste disposal and sedimentation. Loss of life through habitat destruction. Disturbance of aquatic animals, breeding and nesting grounds. 	<ul style="list-style-type: none"> Review of existing literature on habitats, and biodiversity. Field observation and assessment of habitats (flora and fauna) Mapping of key information such as nesting grounds.
