GAZETTE NOTICE NO. 8467

**TASK FORCE ON IRREGULAR APPROPRIATION OF PUBLIC
LAND AND THE SQUATTER PROBLEM IN ATHI RIVER
DISTRICT
APPOINTMENT**

IT IS notified for the general information of the public that the Minister of State for Provincial Administration and Internal Security has appointed a Task Force consisting of the following:

John Abduba—(*Chairman*).
Permanent Secretary, Ministry of Lands—(*Secretary*).

Members:

Permanent Secretary, Ministry of Provincial Administration and Internal Security.
Permanent Secretary, Ministry of Lands.
Permanent Secretary, Ministry of Nairobi Metropolitan Development.
Permanent Secretary, Ministry of Industrialization.
Permanent Secretary, Ministry of Labour.
Town Clerk of Mavoko Municipal Council.
Regional Commissioner of Lower Eastern.
Juda Muoka.
Shamit Singh.
Bishop Nicholas Muli.

The Task Force may co-opt professional and any appropriate competence within or outside Government.

Terms of Reference:

1. To examine and inquire into the allocations to private individuals or corporations, of public land or lands dedicated or reserved for public purposes including:
 - (a) Jumbo (Airport) land;
 - (b) Numerical Machines land;
 - (c) East Africa Portland Cement land;
 - (d) National Housing Corporation/Agriculture Syndicate land;
 - (e) National Social Security Fund land;
 - (f) Public land around Daystar University;
 - (g) Margaret Wamaitha Humphrey's land (deceased).
 2. To collect and collate evidence and information available relating to the nature, causes and extent of unlawful or irregular allocations of such lands.
 3. To prepare a list of all lands unlawfully or irregularly allocated, specifying the particulars of the lands and of the persons to whom or corporations to which they were allocated, the date of allocation, the particulars of all subsequent dealings in public land concerned and their current status.
 4. To examine payment of land rates to Mavoko Municipal Council relating to the said parcels of land.
 5. To establish the nature of involvement of public officials or any other persons in the irregular appropriations and allocation of public land and to identify the officers involved.
 6. To determine the security implications of the squatter problem in Athi River District.
 7. To carry out any other inquiries which in the opinion of the Task Force is necessary in unravelling the irregular land appropriations and allocation in Athi River District.
 8. To recommend measures to restore public land irregularly allocated.
 9. To recommend actions to be taken against persons involved in the irregular land allocation in Athi River District.
 10. To examine transactions of the Land Control Boards against the background of existing legal framework on their functions and powers and explore reasons for their inability or failure or unwillingness or refusal to curtail the irregular land appropriations or allocations in the district.
 11. To recommend measures to be put in place to curb future irregular allocation of such land.
- In the performance of their tasks, the Task Force shall:
1. Prepare detailed Work Plan indicating the milestones and time-lines.
 2. Develop a prioritized Matrix clearly categorizing the immediate, medium and long-term reforms and budgetary requirements.
 3. Review any documents relevant to its mandate.

4. Hold Consultative Forums with professionals and the public.

Reporting:

1. The Task Force shall report to the Minister of State for Provincial Administration and Internal Security; and
2. Shall regularly advise and keep the Minister apprised on progress. Without prejudice to the generality of the foregoing, it shall make progress reports to the Minister after every fourteen (14) days.

Mode of operation:

In the performance of the duties, the Task Force shall regulate its procedure.

Quorum:

The quorum of any meeting for purpose of conducting any business other than to appoint a temporary chairman shall be five excluding the chairman.

Duration:

1. The Task Force shall finalize its task within a period of forty-five (45) days with effect from the date of gazettelement.
2. Any of the members other than the public officers may resign by writing to the Minister to that effect and such resignation, shall take effect upon such letter of resignation being received by the Minister.

Costs:

The costs incurred by the Task Force, including but not restricted to facilitation and the payment of allowance in respect of the members and the secretariat of the Task Force, shall be defrayed from voted funds of the Ministry.

Dated the 15th July, 2011.

GEORGE SAITOTI,
*Minister of State for Provincial
Administration and Internal Security.*

 - Ensure the design of the proposed buildings and the construction thereof avoids/retains existing mature trees/vegetation and its attendant biological diversity as much as possible.
 - Demarcate the project area to be affected by construction works to preserve vegetation falling outside the development paths.
 - Carry out appropriate landscaping programme for the revegetation and improvement of aesthetic value of parts of the project area after construction.
- Health and safety impacts
- Appropriate health and safety measures shall be implemented.
 - Warnings and signs shall be placed in appropriate places.
 - Safety education and training of the construction workers should be emphasized.
 - Appropriate Personal Protective Gear shall be worn at all times by all within the construction site including visitors
 - Install proper fire management equipments and strategies.
- Waste management
- Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time;
 - Purchase of perishable construction materials such as paints incrementally to ensure reduced spoilage of unused materials.
 - Use of building materials that have minimal packaging to avoid the generation of excessive packaging waste.
 - Segregation or sorting of waste at its source shall be practiced in order to encourage reuse/recycling.
 - Wastes shall be collected daily from all bins to a transfer station near the main gatehouse awaiting final collection.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF MOMBASA –
NAIROBI – ADDIS ABABA ROAD CORRIDOR DEVELOPMENT
(MERILLE RIVER – MOYALE - A2)

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Construction of Mombasa – Nairobi – Addis Ababa Road Corridor Development (Merille River – Moyale - A2).

The proposed project is the upgrading to “bitumen standard” of the Merille River - Marsabit - Moyale Road (A2) extending to approx 364 kms in length, in Marsabit and Moyale Districts of Eastern Province, Republic of Kenya.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Soil erosion, Run-off	<ul style="list-style-type: none"> • Design of the road’s drainage. • Stabilization of the soil along the roadside and in the road reserve.
Wildlife	<ul style="list-style-type: none"> • The contractor(s) should develop a code of conduct to ensure that the workers do not consume game meat from the area, whether supplied by the locals or killed by themselves. • Awareness creation amongst the locals and the workers on laws that relate to wildlife hunting and consumption, and the importance of wildlife as a natural resource and heritage. • The provincial administration should be involved in creating awareness amongst the locals - that killing game is illegal and undesirable. • Empty containers and other waste should be managed carefully to avoid exposing wildlife to possible poisoning. • Intense construction activities should not be carried out at night across the Marsabit National Park, Losai Nature reserve and Dida Galgalu Important Bird Area. • Exceptional care should be taken when constructing across the elephant migration corridor such that their movements are not curtailed and workers are not exposed to risk. • During operation, a programmatic approach is proposed, where greater surveillance by KWS and involvement of communities is instituted to check possibilities for new trade in game trophies, skins and live animals.
Vegetation	<ul style="list-style-type: none"> • Vegetation should only be cleared where it will interfere with road construction and/or present a hazard to traffic. • Within Marsabit and Moyale towns, allowance for landscaping is to be made within the construction contract, including tree planting. • Cutting of trees, other than those mentioned above, for firewood by the workers housed in camps should be controlled. • As far as practicable, materials should not be stockpiled on vegetated areas. • In areas where soils are compacted during road construction, such as along temporary access roads, the soil should be loosened through ripping to enable infiltration of water and growth of plants.
Pollution	<ul style="list-style-type: none"> • Use dust suppressants as far as possible, especially within the towns. • All the workers should wear dust masks at all times when at the sites of high dust generation.

- Warn the neighbourhood of possible generation of dust beyond normal levels.
- Aesthetics and landscape**
 - Solid waste produced at camping sites for road construction crews, should be properly disposed.
- Waste management**
 - Construction waste and domestic waste should be stored only in the specially designated places and removed regularly. Disposal and burial of waste should be agreed upon in the established order before commencement of the works. Discharge of any non-treated drain waters and waste to the laggas or on the surrounding land should be forbidden.
 - Ensure that waste materials are properly disposed of to suitable locations. Partly inert waste materials (for example concrete from bridge reconstruction) may possibly be used as filling material for reconstruction of road sub-grade.
 - Periodic inspection of construction works helps to ensure proper handling of waste materials.
 - Contractors should encourage reuse and recycling to minimize residual waste.
 - A handling protocol, e.g. waste storage away from public view, and provision of retention areas to contain accidental spills of toxic, hazardous, and harmful construction materials, such as caustic and acidic substances, oil, waste oil, diesel, and bitumen, should be prepared and implemented by the contractors.
- Health and safety**
 - Road construction workers should be informed about diseases that are prevalent in the project area, and how they can minimize their exposure and transmission.
 - Mount regular HIV-AIDS awareness campaigns.
 - The Contractors should consider hiring a permanent nurse to attend to emergencies and to mount awareness campaigns amongst the workers.
 - MOR will also have to regularly discuss with their counterparts any health implications of on-going road construction.
 - Access roads for haulage trucks used during road construction should not be located near schools, hospitals and residential areas.
 - Provide warning to shop owners and other commercial businesses close to the road (especially in Marsabit and Moyale) at least two weeks before use of heavy equipment near their premises.
 - Install appropriate signs at road diversions.
- Noise and vibration**
 - Minimize noise, especially noise from heavy equipment when constructing the road through Marsabit and Moyale towns.
 - Special care should be taken where the construction site is near to sensitive receptors such as schools and hospitals (Most sensitive sites – Laisamis, Logologo, Marsabit, Bubisa, Turbi and Moyale).
 - Heavy vehicles should not be used at night near populated areas (Marsabit and Moyale).
 - Ensure that construction equipment is operating optimally and with operational

noise mufflers where possible.

- Quarry and borrow areas**
 - Absolute care is needed when using explosives as they can adversely affect the workers and wildlife in the area.
- Urbanization**
 - Proactive planning by the District and Provincial Physical Planners.
 - Provide roadside amenities, preferably as a component of the road construction project.
- Road safety issues**
 - Design and construction of rumble strips, speed bumps and erection of appropriate warning signs.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Building, Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Eastern Province.
- (d) District Environment Officer, Marsabit District.
- (e) District Environment Officer, Moyale District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MOMBASA BY-PASS ROAD STUDY IN
MOMBASA DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Mombasa bypass road study.

The proposed project entails:

- Construction of Bypass from Miritini Township to Ngombeni in Likoni with shoulders of 2.5m, 2 carriageways of 7.0m, internal shoulder of 2.0m and an overall road width of 23m
- Construction two viaduct bridges over the ocean at Mkupe (Mwache bridge) and Dongo Kundu (Mteza Bridge). Mwache bridge is 495m, entirely across water while Mteza Bridge is 1,360m of which 760m is across mangrove and mud flats, and 600m across water.
- Widening and improvement of Barack Obama Road
- Widening and improvement of Port Reitz Road
- Widening and improvement of Magongo Road
- Widening and improvement of Mombasa Western Relief Road
- Construction of a four lane bridge over railway connecting to Lumumba road
- Construction an underpass structure at Miritini railway crossing
- Construction of a Link Road from the Bypass to the proposed new container terminal
- Construction of box culverts at underground water sources on the road to the proposed new KPA container terminal.
- Construction of a bridge over low lying area on the road to the proposed new KPA container terminal.

The project was originally located mainly in Mombasa District but since new districts have been created from Mombasa, the project is well spread into newly created districts namely Kilindini, Likoni and Kinango. The Bypass passes through Kilindini, Kinango and Likoni districts. The road to KPA container terminal is in Kilindini district, Port Reitz Area Roads are also located in Kilindini district and the Western Relief Road is located in Mombasa district.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Aquatic habitat loss/fragmentation/damage	<ul style="list-style-type: none"> Boring during bridge construction and the vibrations generated will lead to habitat loss and damage thereby leading to loss of some marine species at Mkupe and Mwangala creeks. Soil erosion from constructed and rehabilitated sites will lead to down stream siltation ruining spawning beds for fish. Mangrove cutting will lead to loss of breeding grounds for fish, macro benthos and other marine fauna.
Migration corridor restrictions	<ul style="list-style-type: none"> During construction migratory and feeding corridors for marine fauna will be interrupted at Mkupe and Mwangala creeks.
Fluctuation of physico-chemical variables	<ul style="list-style-type: none"> Fluctuations in phosphorus, ammonia, DO will lead to resultant changes in the pH in both the sediment and water column at Mkupe and Mwangala creeks thereby affecting organisms and the photosynthesis process. The pH will also increase due to deposition of concrete materials and cement during viaduct bridge construction. Sediments act as nitrate sinks and their disturbance will lead to eutrophication that can lead to algal blooms and eventual effects to fish and other marine fauna. Presence of high organic matter at Mkupe and Mwangala creek waters is an indication of high presence of micro and macro-organisms hence the disturbance will lead to loss of biodiversity.
Oil/petrol spillage	<ul style="list-style-type: none"> During construction it is anticipated that there shall be cases of oil/petrol spillage from construction equipment which will lead to effects and possible loss of fish, macro benthos, mangroves and other marine fauna and flora.
Noise from construction equipment	<ul style="list-style-type: none"> During construction noise from construction equipment will have an impact on marine life especially fish which will move away thereby interfering with its availability for local fishermen.
Impacts on air quality	<ul style="list-style-type: none"> Vehicular Emissions result from the use of fossil based fuels which when burnt release dangerous fumes and gases that will pollute the local atmosphere during construction and operation of the road. Exposure to major emission constituents is responsible for certain human health problems. Emissions also result in acid rain absorption of toxic pollutants that have effects on plant growth. Acidification of aquatic ecosystems has definite implications on the health of aquatic species. On the built environment acidity originating from vehicle emissions is responsible for deterioration of paints and accelerated corrosion of metals. Dust Generation from activities

involving civil works, demolitions and quarrying generate substantial amount of dust especially during dry season. Dust may enhance upper respiratory diseases and staining of buildings and other items in the vicinity. Dust settles on leaves of plants and can interfere with pollination and photosynthetic activities if accumulation is significant. Dust that settles in the marine environment will have impacts on the marine fauna.

Impacts on soils/land degradation

- Loss of Productive Soils at Miritini, Tsunza, Mwangala, Bububu and Likoni areas will be exhibited when land will be acquired for the road carriageway and right of way.
- Soil Erosion will occur as the natural soil is modified by the construction process. The possible hot spots will be the hilly and steep areas of Mkupe, near the airport fence on the road to KPA and Mwangala and Bububu areas. Soil erosion can also have cumulative impacts far beyond the road construction affecting slopes, the ocean and some distance from the initial impact point.
- Land Slides during construction due to destabilization of slopes due to creation of road cuts or embankments will result in some degree of soil disturbance.
- Stockpiling of Spoil Materials can destroy vegetation hence leading to soil erosion.
- Contamination of Soils will definitely be caused by accidental oil spills particularly in and around machinery and plant yards, base camps and areas of concentrated activities during construction. During operation of the road it is expected that pollutants settling in the soils from vehicular emissions will normally be localized and minor.

Impacts on water resources

- Spillage of oil and other pollutants, like fuel and other mechanical fluids from vehicles while at camp or in the construction field may seep into the ground water affecting ground water quality. In addition, poor location and construction of pit latrines and septic tanks within the camps, site offices and in the construction fields may result in ground water pollution.
- Surface run-off. During construction, site clearance and removal of topsoil along the road, access roads and diversions will increase localized surface run-off since vegetation that allows slow infiltration of water shall have been removed. Again, where such vegetation clearance and earthworks are extensive, especially along steep gradients, sediment-loaded run-off may increase turbidity of the ocean within the project area.
- After completion of works, the road design will create a modified drainage system within the vicinity of the road. Bitumenised surface will create an artificial impermeable surface that will increase run-off. This increased run-off may in turn increase flow volumes into the ocean beyond the normal range.
- Drainage works particularly misdirected outfalls, outfalls along steep slopes or outfalls with large runoff flows can have adverse impacts through excessive erosion. Conversely the blockage of outfalls by area residents can cause rapid

	<p>deterioration of road works, which is a heavy national investment.</p> <ul style="list-style-type: none"> • Surface Water Quality may be undermined due to increased erosion, run-off from roads and contamination in the event of oil spills. The extent of this impact will depend directly on the magnitudes of the other causative factors mentioned above. Nonetheless, bituminous activities may result in wash away of bitumen and other associated chemical materials especially under rainy conditions. These materials may find their way into the adjacent ocean, thus affecting water quality that could adversely affect aquatic flora and fauna. 	<ul style="list-style-type: none"> • Medicinal trees and shrubs Neem tree (Mwarubainne): Vegetation clearance will destroy valued trees and shrubs which have medicinal value and which are a source of energy in form of firewood. These trees and shrubs are 'mkilifi' and 'mwarubaine' that are found at Jeuri, Mkupe and Mwangala areas.
Impacts on human health and safety	<ul style="list-style-type: none"> • Disease Transmission through work crews to the population near the project area through STDs including HIV-AIDS and through unhygienic environment in the project area including poor garbage disposal and poor human waste disposal. • Water Supply Contamination through overloading of local sanitation infrastructure and spread of waterborne diseases such as amoebic dysentery, typhoid and cholera. • The possible cutting of water supply pipes during construction could lead to water contamination. The ponding of water during construction could lead to a considerable health hazard since it provides breeding habitat for snails, flies and mosquitoes therefore creating a possibility of malaria. • Road Safety will be a major issue during construction and operation of the Bypass. The possible causes of road accidents to be addressed will be; drivers' fault, pedestrian fault/fault of passengers, mechanical defect in vehicles, bad roads and other factors like bad weather, cattle obstruction, fallen trees, road blockage, absence of rear reflectors, road signage, non-functioning of road signals 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <ol style="list-style-type: none"> (a) Director-General, the National Environment Management Authority (NEMA), Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi. (b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Building, Community, P.O. Box 30521, Nairobi. (c) Provincial Director of Environment, Coast Province. (d) District Environment Officer, Mombasa District. <p>The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.</p> <p style="text-align: right;">B. M. LANGWEN, for Director-General,</p> <p>MR7362472 <i>National Environment Management Authority.</i></p>
Impacts on fishing	<ul style="list-style-type: none"> • Fishing and Landing sites : Reduced fishing ground and Landing Sites during construction of the viaduct bridge will affect the fishing activities and the economic livelihood for fishermen in Mkupe, Mwangala and Port Reitz areas. • Access to fishing sites : Access paths to fishing sites will be affected during construction of the viaduct bridge. • Unavailability of fish due to construction activities : Loss of fish through oil spills, vibrations, noise, siltation as a result of soil erosion and by cutting of mangroves will affect daily fish quantities hence affecting fishermen livelihood. • Fish traders : Loss of fish through oil spills, vibrations, noise, siltation as a result of soil erosion and by cutting of mangroves will affect daily fish quantities hence affecting their business. Some fish traders buy fish at the landing sites therefore it will be difficult for them to access these sites during construction. 	
Impacts on traditionally valued vegetation	<ul style="list-style-type: none"> • Cutting of Mangroves will affect the breeding grounds of fish and other marine life. Local traders of Mangroves will also be affected since they depend on harvesting of mangroves for their livelihood. Locals who use the mangroves for firewood and building houses will also be affected.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DRY CONTAINER YARD ON PLOT
NO3995/V/MN, EXTENSION PLOT NO 2079/V/MN AND PART
OF PLOT MN/V/2079, MOMBASA MUNICIPALITY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed dry container yard.

The proposed development entails construction of a dry container yard at Makupa creek.

The proposed development will be located along the Tudor Creek on Plot No. MN/V/3995 and extension MN/V/2079 which is as a result of the sea receding along Makupa creek and which measures 1.7 hectares.

Possible Impacts

Mitigation Measures

Solid waste

- Remove solid waste to central disposal location.
- Collect all waste oil and remove it from the site.
- Apply water on dust.
- Control dust emission through use of tarpaulins on building structures
- Construct a bio-digester of waste treatment.
- Dispose waste at the designated local authority site by contracting out to service providers.

Air pollution

- Use grease strippers
- Use equipment that limit spread of dust, particulate matter and odour e.g tarpaulin clothing.

Water pollution	<ul style="list-style-type: none"> Put in place adequate on-site liquid waste management facility e.g. Bio-digester. Monitor test and record levels (quality and quantity) of effluent discharges.
Marine water	<ul style="list-style-type: none"> Ensure coastal zone and building/survey standards are met by observing the buffer zone between the high water mark and development structures
Health and safety	<ul style="list-style-type: none"> Waste water or solid waste is properly managed. Provide protective clothing and equipment to workers on site.
Noise, vibration	<ul style="list-style-type: none"> Use appliances producing low levels of noise, vibration and lighting e.g. generator with a silencer, low energy bulbs.
Visual pollution	<ul style="list-style-type: none"> In appropriate walls particularly in beach frontage should not be constructed and beach frontage left open.
Traffic flow control	<ul style="list-style-type: none"> Use signage to show speed limit in and out of the yard.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED INCREASE OF STEVIA COUNTIES IN NANDI, LAIKIPIA, BUNGOMA, UASIN NGISHU, NAROK AND MERU

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed increase of stevia counties.

The proposed development entails establishment of stevia farming in the counties of Nandi, Laikipia, Bungoma, Uasin-Gishu, Narok and Meru.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Diversification on Income Generating Activities	<ul style="list-style-type: none"> Periodic on-site training to maintain the tempo for sustainability. Ensure all inputs are applied for optimum production.
Mismanagement of the	<ul style="list-style-type: none"> Analysis of Labour profiles for all

enterprise due to increased workload	<ul style="list-style-type: none"> possible enterprise mixes, including examining the daily gender calendar for the target community. Youth to be included as they form the bulk of the rural labour force. Suitability of leaf threshing for the older folk.
Technical knowledge	<ul style="list-style-type: none"> Proponent to engage own specialized extension personnel and continuous induction of Ministry of Agriculture extension staff on the Stevia husbandry. Training of extension officers in Stevia production will be necessary.
Food security	<ul style="list-style-type: none"> Insist on appropriate enterprise mix, including livestock, food crops and cash crops.
Crop-Water demand	<ul style="list-style-type: none"> Contour planting with the correct spacing to increase water infiltration. Swallow irrigation in case of dry conditions. Need to determine the crop-water demand at varying conditions.
Loss of soil fertility	<ul style="list-style-type: none"> Contour tillage operations on areas that have slopes and incorporating leaves into the soil. Use of compost manure to be encouraged. Planting to be in rolling terrain for adequate erosion control.
Waste disposal system	<ul style="list-style-type: none"> Improve the disposal system through composting.
Monocrop	<ul style="list-style-type: none"> Allow a corridor of sesbania along the pathway and at the boundaries. This shall provide wind break and other affiliated eco-functions of trees.
Infrastructure development	<ul style="list-style-type: none"> Improve the rural roads network. Proponent and local leaders team up in improving the road network.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
