FOR THE PROPOSED 76 KM 220KV MALINDI-KILIFI DOUBLE
CIRCUIT LINE; A NEW 220/132KV SUBSTATION AT KILIFI
AND INSTALLATION OF 1X23 MVA 132/33KV TRANSFORMER
AT THE EXISTING MALINDI SUBSTATION IN KILIFI COUNTY**

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya Electricity Transmission Company (KETRACO), proposes to develop a 76 kilometers (KM) 220kV Malindi-Kilifi double circuit line with a wayleave of 40 meters – 20 meters on both sides from the centre line, a new 220/132kV substation at Kilifi and installation of 1X23 MVA 132/33kV transformer at existing Malindi Substation. The components of the project will include construction of 220KV double circuit line from Weru (switch station) to Kilifi, establishment of a 220/132KV substation at Kilifi and construction of 220KV switch station at Weru. This will also include 132KV link from the proposed 220/132kV substation at Kilifi to the existing 132kV Kilifi Substation.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts Mitigation Measures

Possible Impacts Mitigation Measures

- Terrestrial habitat alteration / destruction of existing biodiversity**
- Use existing utility and transport corridors including access roads and tracks for transmission and distribution of construction materials to avoid habitat alteration.
 - Undertake selective clearance by removing tall woody species leaving saplings, for quick regeneration of vegetation along the wayleave.
 - Ensure re-vegetation of disturbed areas with native / indigenous plant species.
 - Installing transmission lines above existing vegetation to avoid land clearing especially between Konjora and Sokoke location by tower span variations.
 - Avoiding construction activities during the breeding season and other sensitive seasons or times of day especially at AP16, AP15, AP13 and AP6.
 - Working in close coordination with pertinent agencies (KWS and KFS) when undertaking spotting of towers especially in the outskirts of Arabuko Sokoke Forest: AP16, AP15, AP13 and AP6.
- Avian /bird and mammals including bat collisions and electrocutions**
- Provision of engineering solutions such as installing visibility enhancement objects including, marker balls, bird deterrents, or diverters especially at AP16, AP15, AP13 and AP6 locations.
 - Build raptor platforms on top of towers for roosting and nesting of birds and bats.
 - Maintain 1.5 meter (60-inch) spacing between energized components and grounded hardware or, where spacing is not feasible, covering/insulating energized parts and hardware.
 - Ensure insulation by covering energised parts and/or grounded parts including towers / pylons for protection to birds and to act as bats roosting places.
 - Working with line agencies such as NMK, KWS and relevant NGOs such as Birdlife International and Nature Kenya for expert opinion and specialized studies (ornithological studies) / bat survey.
- Increased generation of solid waste**
- Use of an integrated solid waste management system i.e. the 3 R's: 1. Reduction at source 2. Reuse 3. Recycle; this should apply to plastics, wood pellets, metallic, glass and paper waste or any other materials.
 - Accurate estimation of the dimensions and quantities of materials required; including use of durable, long-lasting materials that will not need to be replaced as often.
 - Dispose waste more responsibly by contracting a NEMA registered waste handler who will dispose the waste at designated sites or landfills.
 - Develop and implement a Construction Waste Management Plan before start of the project.
 - Comply with the requirements of the Environment Management and Co-ordination, (Waste Management) Regulations (Legal Notice No. 121) of 2006 in the collection, conveyance, and disposal of wastes from the transmission route.

Possible Impacts	Mitigation Measures
Risk of occupational accidents and diseases / physical hazards / live power lines / working at height / electrocution	<ul style="list-style-type: none"> • Use of signs, barriers (e.g., locks on doors, use of gates, use of steel posts surrounding transmission towers, particularly in urban areas), and education / public outreach to prevent public contact with potentially dangerous equipment. • Deactivate and ground live power distribution lines before work is performed on, or in proximity, to the lines; including ensuring that live-wire work is conducted by trained workers with strict adherence to specific safety and insulation standards. • Implement a fall protection program that includes training in climbing techniques and use of fall protection measures; inspection, maintenance, and replacement of fall protection equipment; and rescue of fall-arrested workers. • Provide appropriate Personal Protective Equipment (PPE) to workers and visitors to the proposed transmission route. • Have a health and safety committee and qualified Environment Health and Safety (EHS) Officer along project route / active work sites and adhere to the provisions of the Occupational Health and Safety Act of 2007.
Displacement of households and loss of businesses/agricultural produce loss / economic impacts	<ul style="list-style-type: none"> • Ensure full implementation of Resettlement Action Plan (RAP) report prior to the project commencement and in accordance to project Resettlement Plan Framework (RPF) • Carry out fair and adequate resettlement and compensation of PAPs as per Kenyan law, World Bank guideline and assistance (allowances and livelihood restoration programs) to PAPs until their livelihoods and incomes are restored to pre-project levels or better. • Ensure enumeration of destroyed crops through a Crop Destruction Register in the presence of crop owner for compensation purposes • Ensuring construction is scheduled after crop harvesting (when farms are largely with no produce). • Implement internal and external monitoring to ensure the RAP is implemented appropriately. • A grievance redress mechanism (e.g., establishment of Grievance Committee) should be put in place to address all emerging complaints and grievances from the PAPs and project area community. • Provide prompt and effective compensation at full replacement cost for losses of assets, agricultural produce attributable directly to the project.
Land acquisition (wayleave) and resettlement disputes	<ul style="list-style-type: none"> • A project Grievances Redress Mechanism (GRM) including a GRM committee to be established and implemented, with various tiers of escalation including, provision for legal redress; receipt and recording of grievances at locational level and escalation to KETRACO RAP Implementation Unit to address all emerging complaints and grievances from the PAPs and project area community. • Loss of land and crops should be compensated; the amount of compensation to be paid for private and public land should be as per the Kilifi County land

Possible Impacts	Mitigation Measures
	<p>registry rates by National Land Commission (NLC). However, the rates should be in line with the RPF developed for the project.</p> <ul style="list-style-type: none"> • Ensure EIAs are conducted for specific project activities such as campsites, quarries, materials sites, boreholes etc. • Ensure full implementation of Resettlement Action Plan (RAP) report prior to the project commencement and in accordance to project Resettlement Plan Framework (RPF). • Implement stakeholder's engagement plan (SEP) to ensure effective communication, community buy in and ownership of the project. This should be done in line with the Ministry of Health COVID-19 prevention and mitigation measures / government protocols including but not limited to: Physical / social distancing protocols (1.5 metres), Provision of handwashing facilities (soap and water) or hand sanitizing facilities, wearing of masks in public and Limiting gatherings as per GoK directive.
Cultural impacts	<ul style="list-style-type: none"> • Avoid any interference including clearing access or tower spotting in areas of archaeological or cultural heritage importance; in this case are approximate of 24 graveyards within the proposed Right of way (RoW). Fourteen (14) graves in Jilore Location, seven (7) in Sokoke/Nyari location and three (3) noted in Tezo-Kilifi Township Location. • Avoid spotting towers by changing transmission line design specifically on the three (3) churches grounds: Word Celebration Centre Church in Jilore Location, Sokoke PEFA Church in Nyari Location, and Barikiwani Church in Konjora location including any other areas of cultural or religious importance. • Work together with local elders to identify and map any other physical cultural resource and other areas of cultural heritage importance, not identified during the ESIA process. • Work in close liaison with national agencies that deal with areas of archaeological and cultural importance such as the National Museums of Kenya (NMK) to offer guidance in chance finds procedure if unknown heritage resources, particularly archaeological resources, are encountered during project construction or operation.
