Waste water management	<ul style="list-style-type: none"> Where possible wastewater needs to be treated to meet the effluent standards. Water containing pollutants such as cement, concrete, lime, chemicals and fuels should be discharged into a conservancy tank for removal from the site. Potential pollutants should be stored, kept and used in such a manner that any escape can be contained to avoid degrading the water table. Any pollution incidents on site should be resolved immediately. The construction should have sanitation facilities that will not pollute water.
