- (g) TO CONSTRUCT on the lands above referred to such generating station or generating stations as the Applicant may from time to time require for the generation of electrical energy for the purposes of the Licence or any of them as are hereinafter described.
- (h) TO PURCHASE, CONSTRUCT, MAINTAIN AND OPERATE all such other works and plant within the said area of supply as may in the opinion of the Applicant be necessary or expedient for the purposes aforesaid or any of them.

2. THE PURPOSE for which the Licence is required is to enable the Applicant to generate, purchase, transmit and supply electrical energy and to acquire, purchase, construct, maintain and operate all such lands, works and plant as aforesaid and to do all things and take all steps which may seem to it to be necessary, appropriate or expedient (including all ancillary acts and things whatsoever) in connexion therewith.

3. THE PROPOSED AREA OF SUPPLY is the whole of the area within the territorial limits of Kenya.

4. Initially the Applicant does not intend to install, erect or operate any electric supply lines outside the precincts of the said generating station or stations nor does it seek authority therefor.

6. GENERATING STATIONS. The points within the lands referred to in the next preceding paragraph at which it is proposed that the Applicant should be empowered to construct three generating stations (together with any necessary switching stations) are as follows:—

- (a) Kindaruma Power Station to be situated on the Tana River about three miles downstream from the Seven Forks Rapids as shown on the map below and as more particularly designated on Boundary Plan 514, copies of which are available for inspection at the offices mentioned in paragraph 11 hereof.
- (b) Reservoir Power Station to be situated on the Tana River about three miles up-stream from the confluence with the River Thiba as shown on the map below and as more particularly designated on Boundary Plan 514, copies of which are available for inspection at the offices mentioned in paragraph 11 hereof.
- (c) Gtaru Power Station to be situated mainly underground at a depth of about 500 feet and about two miles west of the Seven Forks Rapids as shown on the map below and as more particularly designated on Boundary Plan 514, copies of which are available for inspection at the offices mentioned in paragraph 11 hereof.

7. THE REASONS why the said lands should be so acquired are to enable the Applicant to construct thereon the generating stations works and plant referred to above and to provide water storage to be used in connexion with such generating stations.

8. THE MACHINERY proposed to be installed in the said generating stations is as follows:—

- (a) Kindaruma Power Station: Three generating sets each comprising a vertical axis Francis turbine driving direct a 10 MW alternator with an output of 50 cycles per second and 11 KV. Each turbine will be complete with a governor and butterfly inlet valve. The power-house will have a 55-ton overhead travelling crane and the power will pass to the transmission system via two 25 MVA 11/132 KV transformers in an adjacent outdoor switching station. The power station will be provided with a small auxiliary set to maintain power station supplies in case of emergency;
- (b) Reservoir Power Station: Four generating sets each comprising a vertical axis Francis turbine driving direct a 10 MW alternator with an output of 50 cycles per second and 11 KV. Each turbine will be complete with a governor and butterfly inlet valve. The power-house will have a 55-ton overhead travelling crane and the power will pass to the transmission system via two 25 MVA 11/132 KV transformers in an adjacent outdoor switching station. The power station will be provided with a small auxiliary set to maintain power station supplies in case of emergency;

The surface works will include four 25 MVA 11/132 KV transformers, a 30-ton winch for the machinery access shaft, and lifts, etc., for the personnel access shaft. The power station will be provided with a small auxiliary set to maintain power station supplies in case of emergency.

9. It is intended that the machinery referred to at paragraph 8 above shall generally be operated during the day-time to cover the peak-load periods. It may however be opportune at times of high river flow, or in case of difficulties elsewhere in the Applicant's generating system, to use the machinery at other times of day or night and it will be regarded as available for service at all times.

10. (a) Places where there exist generating stations equipped with machinery similar to that referred to in paragraphs 8 (a) and 8 (b) above for the purposes of general supply include Grudie Bridge, Scotland; Falcon, California/Mexico; Atiamuri, New Zealand.

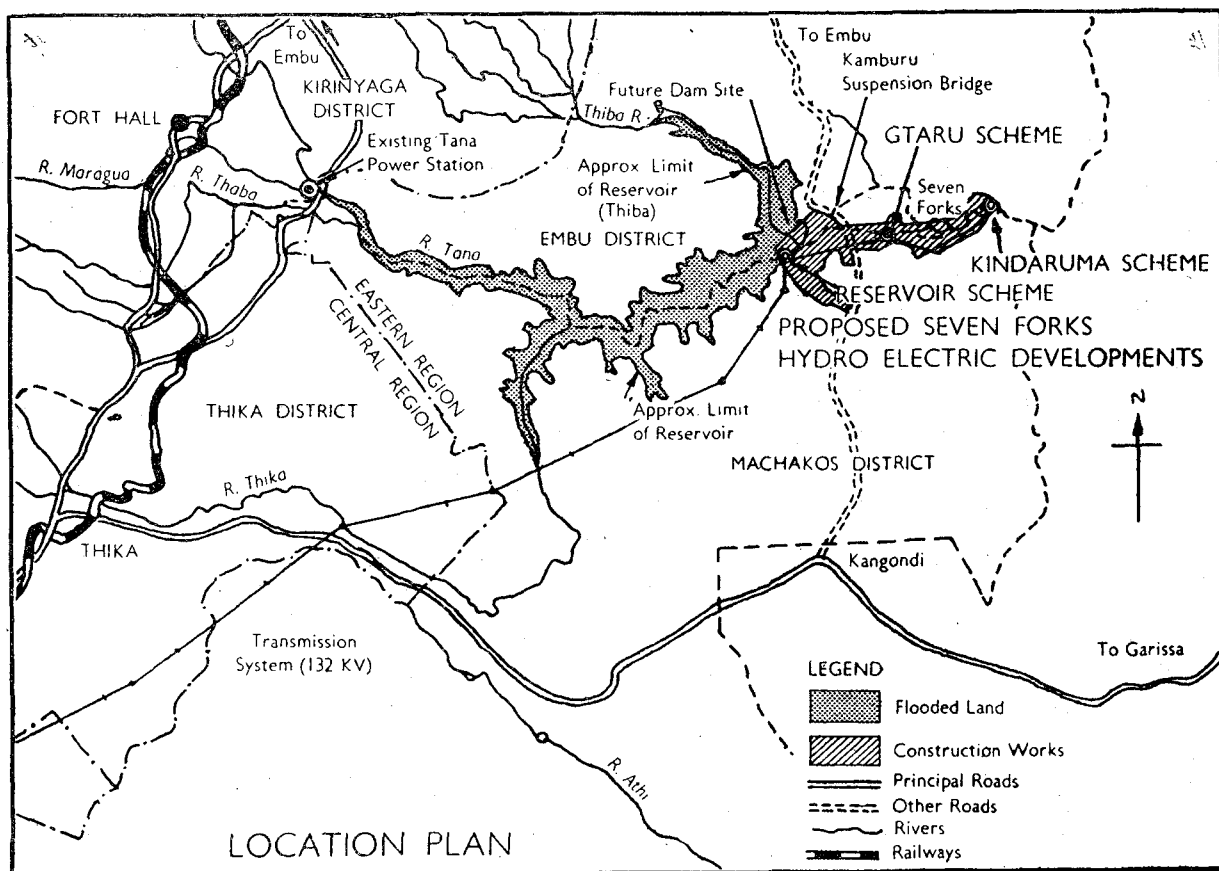

(b) Places where there exist generating stations equipped with machinery similar to that referred to at paragraph 8 (c) above for the purposes of general supply include Sovierzene, Italy; and Randens (Isère-Arc), France.

11. PRINTED OR TYPED COPIES of the Draft Licence so to be applied for and of the LICENCE when granted, and of Boundary Plan 514 (referred to above) showing the area which it is proposed that the Applicant should be empowered compulsorily to acquire, and of ANY OTHER PARTICULARS required by the Electric Power Act may be INSPECTED by the PUBLIC during business hours at the office of the Applicant, Shell and BP House, Harambee Avenue, Nairobi, and at the offices of the East African Power and Lighting Company Limited in Mombasa, Nakuru, Eldoret, Kisumu, Kitale, Nyeri and Nanyuki.
