GAZETTE NOTICE No. 8887

HIGH COURT OF KENYA AND COURTS WITH STATUS OF
THE HIGH COURT

CHRISTMAS VACATION 2014

IN EXERCISE of the powers under Article 161 (2) (a) of the Constitution of Kenya, section 5 (2) (c) of the Judicial Service Act, and pursuant to section 7 of the Sixth Schedule to the Constitution, 2010, and Rule 2 of Legal Notice No. 53 of 2013, the Chief Justice gives notice as follows:

The Christmas Vacation of the High Court, the Environment and Land Court and the Industrial Court other than in the regions formerly within the Coast Province, shall commence on 22nd December, 2014 and terminate on 13th January, 2015 both days inclusive. The Christmas Vacation of those Courts in the regions formerly under the Coast Province shall commence on 22nd December, 2014 and terminate on 4th February, 2015 both days inclusive.

During this period, trials in criminal appeals will take place as usual. A Judge will hear urgent Civil Matters if admitted to hearing on application made in accordance with the Rules of the Court.

For avoidance of doubt, Vacation Duty Judges shall be appointed by the Resident Judges at court stations to hear and try matters arising during vacation in accordance with the High Court (Practice and Procedure) Rules, applicable *mutatis mutandis*, in the courts with status of the High Court.

In court stations with a single judge, the matters emanating therefrom will be handled in the nearest High Court station where a vacation Judge is sitting pursuant to directions issued by the Principal Judge of the High Court.

During the vacation the offices of the aforesaid courts, including registries, shall be open to the public from 8.00am to 5.00pm on all weekdays other than public holidays.

All courts and offices of Chief Magistrate, Senior Principal Magistrate, Senior Resident Magistrate, Resident Magistrate and Kadhis Courts will be open during the usual working hours.

In all Subordinate Courts, Criminal cases will be heard as usual; as will Civil cases of an urgent nature or those in which advocates are not engaged.

Dated the 8th December, 2014

WILLY MUTUNGA,
Chief Justice/President of the Supreme Court of Kenya

GAZETTE NOTICE No. 8888

THE COURT OF APPEAL

CHRISTMAS VACATION, 2014

THE Christmas vacation shall commence on Monday, 22nd December, 2014 and shall terminate on Tuesday, 13th January, 2015.

During the vacation, the Registry of the Court will open to the public from 9.00 a.m. to 12 noon on all weekdays except public holidays. A Judge will be in attendance for the disposal of any urgent business.

Dated the 8th December, 2014.

WILLY MUTUNGA,
Chief Justice and President of the Supreme Court of Kenya.

GAZETTE NOTICE No. 8889

THE SUPREME COURT OF KENYA

CHRISTMAS VACATION, 2014

IN EXERCISE of the powers conferred by Article 161 (2) (a) of the Constitution of Kenya, Rule 4 (c) of the Supreme Court Rules 2012, the Chief Justice gives notice as follows:

The Supreme Court Christmas Vacation shall commence on 22nd December, 2014, and terminate on 13th January, 2015 both days inclusive.

A Judge will hear urgent matters, if admitted to hearing on application made in accordance with the Rules of the Court. Vacation Duty Judges shall be appointed by the President of the Court in accordance with the Rules of the Court.

During the period the Supreme Court registry shall be open to the public from 8.00 a.m. to 12 noon on all weekdays other than public holidays.

Dated the 8th December, 2012.

WILLY MUTUNGA,
*Chief Justice/President,
Supreme Court of Kenya.*

The Part Development Plans relates to land situated within the named Sub-Counties in Kiambu County.

Copies of the Part Development Plans have been deposited for public inspection at the offices of the County Director of Planning, Thika, Limuru, Ruiru and Kiambu Sub-County offices.

The copies so deposited are available for inspection free of charge by all persons interested at offices of County Director of Planning, Thika, and the respective Sub-County Planning offices within Kiambu County between the hours of 8.00 a.m. to 5.00 p.m., Monday to Friday.

Any interested person who wishes to make any representation in connection with or objection to the above named Part Development Plans may send such representation or objections in writing to be received by the County Director of Physical planning, P.O. Box 2344-00900, Kiambu or the Director of Physical Planning, P.O. Box 45025, Nairobi, within sixty (60) days from the date of publications of this notice and such representation or objection shall state the grounds in which it is made.

MR/6254798 HANNAH MARANGA,
for Director, Physical Planning Department.

GAZETTE NOTICE No. 8786

THE ENVIRONMENTAL MANAGEMENT AND

CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 2ND RUNWAY PROJECT WITH ASSOCIATED FACILITIES AT JOMO KENYATTA INTERNATIONAL AIRPORT IN NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya Airports Authority) is proposing to construct a 2nd runway and associated facilities at the Jomo Kenyatta International Airport (JKIA).

The 2nd runway will comprise a pavement 45m wide and 5.5km long with shoulders, drainage and taxiways. Specific components will comprise the following; eight (8) number right angle exit taxiways, fire rescue installations, appropriate instrumentation, lighting and signage, drainage systems and three (3) pairs of connecting taxiways between the 2nd runways

Below is a summary of the anticipated impacts and the proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>	
Waste (liquid and solid) management	<ul style="list-style-type: none"> The contractor will be expected to develop a comprehensive waste management plan for the construction period guided by the ESMP. This will be part of a mandatory Contractors Environmental Management Plan, Construction work areas and the campsites shall be provided with appropriate solid waste bins and removal mechanisms defined at all times. The intention to apply all spoil earth excavated from the airport improvement works to create an embankment (already taking place during this study) along the Syokimau boundary line for noise buffering is highly appreciated. Inert solid waste materials (scrap metals, plastic, polythene materials, timber, etc.) will be made available for recycling onsite or offsite as a sustainable disposal option (these will be guided by the 3R principle). All liquid wastes shall be contained such as not flow into open drainage systems within and downstream of the work areas. During operations, comply with provisions of the JKIA Waste Management Plan through integration of the new components (Terminal 4, new car parking block, drainage systems and support services areas). All operators should comply with the Waste Management Regulations under the Environment and Management and Co-ordination Act, 1999. Need to ensure all point sources of wastewater are connected to the sewer system. No wastewater should link into the open drainage systems. Employ the use of licensed waste handlers to regularly collect and carry away wastes generated. 	<ul style="list-style-type: none"> Ensure the machinery used in construction and trucks are well serviced and maintained and operated within the applicable levels. Adequate provision of personal protective equipment for the construction workers. Ensure frequent air quality monitoring during the construction phase. Limit speed of trucks especially on earth roads. Develop emission inventory of the construction activities to benchmark emissions against legal requirements, and to establish mitigation programme baseline. Operators around the airport will be required to comply with established international environmental safeguards on air quality. The concept of the taxiway lighting is adopting the LED technology and applying reflective mirrors' principles using strategic light emitters along the pavement length. Develop emission inventory of the airport to include collecting information on emissions while monitoring trends and assessing future scenarios, benchmarking emissions against legal requirements, and creating input data for dispersion models in an effort to determine pollution concentration. Methodology to include regulatory, technical, operational and economic measures. All vehicles and related equipment used in the airside to be well-maintained and related records kept available for audit. Aircraft fuelling to be done according to the latest international manuals on aircraft refuelling. Optimize ground service infrastructure to reduce aircraft and ground vehicle movement on taxiway and idling at the gate. In fire-fighting drills, select cleaner fuels such as LPG and avoid the use of waste oil or jet fuel where possible. All airlines will be encouraged on the adoption of low emission aircrafts to the extent possible, especially where fuel consumption is reduced.
Storm water management	<ul style="list-style-type: none"> Ponding at the construction areas will be avoided at all times during the works by ensuring channelized surface runoff from the construction activities, rainfall or from other airport activities. Consider integrating the 2nd runway and associated taxiways into the overall Drainage Management Plan for the entire airport and the physical master plan. Maintain the drains clear throughout the airport grounds to prevent localized ponding as well as minimise possible pollutant transportation from point sources. All drains from established point sources of pollution should be installed with appropriate oil/green interceptors and grit traps for safety of the downstream aquatic systems. 	
Air quality	<ul style="list-style-type: none"> Minimize dust emissions through sprinkling of water along transport routes and on stone-crushing plants. Ensure the trucks hauling the materials are covered to reduce on wind blowing off the materials. 	<ul style="list-style-type: none"> Ensure that machines, plants and equipment to be used meet noise and vibration requirements. Ensure all heavy plants, machinery and equipment are appropriately muffled and well insulated against excessive noise. Limit working hours for operations likely to be noisy to day time only. Rotate workers so as to minimize impacts of prolonged exposures of noise and / or excessive vibrations to health. Install noise barriers especially for noise-sensitive areas bordering construction sites. Provide personal protective equipment for staffs in noisy/vibration prone areas /tools/equipment and enforce application.
	Noise and vibration	

	<ul style="list-style-type: none"> Enhanced observation of occupational health and safety precautions including application of earmuffs and ear corks by the workers. As the ATMs increase, KCAA would be expected to consider adopting a flight mix distribution strategy as opposed to a single flight corridor. Initiate a public awareness and sensitisation on appropriate adaptation to elevated noise levels associated with aircraft operations including design and construction of residential, institutional and commercial buildings as well as influencing sustainable land use planning. Inventory noise sources and work out best solution for the reduction of adverse effects. Apply engineering controls, (noise attenuators, use double plane windows with air space between them, cover walls with acoustic tiles). Institute management controls (e.g. rotate workers to maintain low effective noise exposure, Schedule work-shifts to split between airport peak hours and sensitize workers on noise hazards). 		<ul style="list-style-type: none"> Contractor(s) to constitute a safety and health committee and facilitate them to carry out their mandate as provided in the Occupational Safety and Health (Safety Committees) Rules, 2004. Ensure appropriate signage and information for all work areas with potential safety risks, Appropriate barricades, flashers, markers, temporary directional or informational signs shall be installed as directed.
Ecological settings	<ul style="list-style-type: none"> Work in partnership with Kenya Wildlife Service on wildlife intruding into the airport grounds that migrate from the Donyo Sabuk Game Reserve and the Ranches in Machakos. Part of this initiative may include; <ul style="list-style-type: none"> ✓ Fence off the entire eastern edge of the airport grounds with appropriate fence to keep off the migrating wildlife. ✓ Once the fence is in place, engage KWS on relocating the closed in wildlife species safely to either NNP or Donyo Sabuk Game Reserve. No polluting materials will be discharge into the open drains and the downstream aquatic systems from sources. 	Socio Impacts	<ul style="list-style-type: none"> Assurance to the neighbouring communities that the development of the 2nd Runway will have no physical effects or linkages to their welfare. Enhance safety and security screening at the entry points, especially into the airfield. Contractors shall ensure observance of safety precautions at all times. All Contractors shall enhance awareness on HIV/AIDS and other social infections to the workers and the airport community in general. The Contractor(s) to ground the truck drivers on safety precautions especially while traversing through the residential areas. Such precautions will include speed control for lower dust generation and safety. The works will not interfere with the surface drainage of the neighbouring areas. Material delivery trucks shall be well maintained for low noise while traversing the residential areas. It is noted that there are other projects (other than KAA) that use the same materials sources and access roads. The Contractor(s) may identify specific routes for ease of monitoring of specific impacts from their own trucks.
Occupational Health and Safety (OHS)	<ul style="list-style-type: none"> Provide for appropriate site/job/safety training by the Contractor and KAA. Provide adequate supervision of workers. Provide adequate sanitary facilities and clean drinking water for workers. Ensure provision of appropriate PPE's for adverse weather e.g. Raincoats, dust masks and gum boots. Employer to provide occupational examination to particular categories of employees as indicated in the Second Schedule to the Occupational Safety and Health Act of 2007. Sensitize and create awareness to all construction workers regarding health precautions. Provide staff medical cover for all construction workers. Provide first aid facilities and personnel, with contacts to hospitals and emergency services. Provide fire fighting equipment and train fire marshals. 	Wakes and vortices	<ul style="list-style-type: none"> Implementation of the KAA - CSR Strategy in support of socio issues such as environment, education, health, sport, sanitation, hygiene, etc. Identify with the social groups activities and their values for enhanced community participation on JKIA interests including safety and security. Air traffic controllers to provide Vortex Avoidance Procedures. Application of standard separation (ICAO recommended separation minima) for landing / take-off. Pilots to apply appropriate recommended spacing during arrivals. Flight crew to maintain situational awareness by monitoring other traffic in the vicinity and using Traffic Collision Avoidance Systems (TCAS). All flight plans to be scheduled according to ICAO Doc 4443 and other internal procedures developed by JKIA Aerodromes.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

KODIA BISIA,
for Director-General,

MR/6254610 *National Environment Management Authority.*

GAZETTE NOTICE No. 8787

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED PHASE 1 OF KAREN WATERFRONT ON
L.R. No. 20587, KAREN, NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Crossroads Limited) is proposing to develop phase 1 of the Karen Water Front in Karen within the Karen Triangle, between Karen Road, Karen Lane and Lang'ata Road in Nairobi County on LR No. 20587, and lies approximately 16km South West of the Nairobi Central Business District.

The proposed phase 1 will consist of a 2 storey building with 25,000 Square meters of gross leasable retail space overlooking a man-made lake.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measure</i>
Loss of biodiversity	<ul style="list-style-type: none"> Retain vegetation screens to reduce the visual effect of this stage of the development. Clearance of vegetation should be done in necessary areas only. After project completion, proponent should carry out environmental compensation where harm cannot be avoided by use of indigenous plants.
Soil Degradation	<ul style="list-style-type: none"> Excavated soil to be used for back filling. Limit the extent of use of heavy machinery at the site and control earth works. Rocked construction entrance and exit to keep sediment from being tracked onto adjacent roads and keep vehicles off bare soils. Stock piles to be covered with tarpaulins. Landscape all disturbed areas after construction phase.

Increase in water demand	<ul style="list-style-type: none"> Abstract from boreholes as indicated in the WRMA permits. Installation of toilet flushes with low volume cisterns. Waste water recycling and rain water harvesting.
Air pollution	<ul style="list-style-type: none"> Spray water on exposed areas during dry weather to suppress dust. Cover loads of friable materials during transportation. Control speed of construction vehicles and switch off machines when not in use. Regularly service and maintain vehicles and mobile plants and machinery. Provide PPE e.g. nose masks to workers
Effluent management	<ul style="list-style-type: none"> Provision of portable toilets for the workers. Routine checkups and monitoring of the WWTP to avoid leakages and blockages. Proper construction of the WWTP to meet the standards required by Nairobi County Council. Construction of separate storm water and waste water drains. Treated effluent to be reused as non potable water for flushing toilets, watering lawns and cleaning purposes. Waste water to be treated to the standards set by NEMA (Water quality regulations, 2006) and effluent analysis to be conducted regularly.
Stream degradation	<ul style="list-style-type: none"> Creation of a riparian buffer zone around the constructed wetland and river. Proper canalisation of the stream as per WRMA permit. Routine check-ups and monitoring of the WWTP to avoid leakage and blockage. Quarterly monitoring of the quality of the treated waste water as per the NEMA Water Quality standards.
Noise and vibrations	<ul style="list-style-type: none"> Workers working with machinery, vehicles and instruments that emit high levels of noise should be provided with ear plugs and ear muffs. Proper servicing of machinery and equipment(oiling, greasing etc). Installation of portable barriers to shield compressors and other small stationary equipment where necessary. Construction activities to be carried out between 8:00 a.m. – 5:00 p.m. Monitor noise levels as per NEMA guidelines.
Increase in Solid Wastes	<ul style="list-style-type: none"> Limit quantity by developing appropriate budgets for purchase of raw materials to reduce wastage through exposure to weather elements. Provision of a waste transfer station within the development. Segregation of waste at source through provision of separate bins. Contract a duly licensed waste handler to transport waste.

Occupational Health and Safety	<ul style="list-style-type: none"> Sludge from the WWTP to be incinerated and the ashes used to mould refractory bricks. Personnel to wear complete PPE. Provision of fire fighting equipment. Put in place an emergency response plan. Only qualified personnel to operate the machinery. Designate a Health & Safety officer to be in-charge of enforcing site compliance with OSH rules and regulations. Provision of adequately stocked first aid kit and at least one trained first aider on site. Display the contact numbers of the persons responsible for handling emergencies on the site. Contractor should have workmen's compensation cover which should comply with workmen's compensation Act.
Traffic snarl ups	<ul style="list-style-type: none"> A traffic marshal shall to be stationed along the entry point within the project boundary to control vehicles during transportation of materials. Planned deliveries to make sure they do not coincide with heavy traffic. Provision of separate traffic routes for pedestrians and vehicles during operation phase. Security checks to be conducted inside the compound NOT at the entrance. Provision of designated entry and exit points. Provision of slip lanes.
Population Increase	<ul style="list-style-type: none"> Planning of the development in such a way that there is adequate social and other infrastructure to meet needs of the tenants and their customers.
Sanitation	<ul style="list-style-type: none"> Provision of sufficient sanitary conveniences: hand washing stations, mobile toilets at work site. Provision of clean water to the workforce.
Dehydration of personnel	<ul style="list-style-type: none"> Provide safe and clean drinking water.
HIV/AIDS	<ul style="list-style-type: none"> Erection of billboards to sensitize locals on the need to practice safe sex to help in the fight against HIV/AIDS. Conduct awareness campaigns on HIV/AIDS among the workers and the locals. This can be undertaken by the various NGOs and government agencies in the county. Provision of condoms to the workers.
Conflicts	<ul style="list-style-type: none"> Consultation with KLDA, site neighbours and stakeholders on the mitigation measures proposed for the negative impacts. Where possible, offer women equal employment opportunities as men. Communicate on project progress with the community members and alert on sections to be developed to reduce interference.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

ZEPHANIAH O. OUMA,
for Director-General,

MR/6254613 *National Environment Management Authority.*

GAZETTE NOTICE NO. 8788

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED GULF ENERGY SOUTHERN BYPASS PETROL SERVICE STATION ON L.R. NO. 9306 OFF THE SOUTHERN BYPASS, FRONTING THE UNIVERSITY OF NAIROBI RESEARCH SITE LANDIN NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Gulf Energy Limited) is proposing to construct a service station off the Southern Bypass, adjacent to the University of Nairobi research site and geomagnetic research station in Nairobi County, on a parcel of land L. R. No. 9306.

The proposed project shall comprise of the following facilities parking bay, staff and public toilets, offices, Pump islands (four pumps dispensing both diesel and super), three Underground Storage Tanks (USTs) and a Service house with lube bay, tyre change bay and the open washing bays .

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation measures</i>
Security measures	<ul style="list-style-type: none"> Provision of security at all the times by security guides. Ensure adequate lighting within and around the premises. Regular checks and maintenance of security lights.
Air and noise pollution	<ul style="list-style-type: none"> Workers shall be trained on management of air pollution from vehicles and machinery. All construction machinery shall be maintained and serviced in accordance with the contractor's specifications. Vehicles delivering soil materials shall be covered to reduce spills and windblown dust. All construction machinery are maintained and serviced in accordance with the contractor's specifications. Dust generating activities (excavation, handling and transport of soils) are not carried out during times of strong winds. Water is applied whenever dust emissions

Loss of vegetation	<p>are visible at the site in the opinion of the opinion of the Supervising Engineer.</p> <ul style="list-style-type: none"> • Design and landscaping for flower beds. • Preparation of the flower and ornamental tree beds. • Planting of appropriate flowers and trees. • Employ a flower gardener to keep and maintain the flowers and trees. 	Erosion Control	<ul style="list-style-type: none"> • Earthworks should be controlled so that land that is not required for the construction works is not disturbed. Wherever possible, earthworks should be carried out during the dry season to prevent soil from being washed away by the rain.
Water and soil contamination	<ul style="list-style-type: none"> • Safety and emergency response plan to be developed for all operations with emphasis on the protection of the environment prior to start up by the contractor. • No grey water runoff or uncontrolled discharges from the site/working areas (including wash down areas) shall be permitted. • Water containing pollutants such as cements, concrete, lime, chemicals and fuels shall be discharged into a sewer line for removal from site. • Potential pollutants of any kind and in any form shall be kept, stored and used in such a manner that any escape can be contained and the water table not endangered. • Wash areas shall be placed and constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted. • The Contractor shall take reasonable measures to control storm water and the erosive effects. • No construction materials shall be stockpiled within areas that are at risk of flooding. • Plastic sheeting, sandbags or geofabric approved by the Supervising Engineer shall be used to prevent the migration of fines. • Develop a site safety action plan detailing safety equipment to be used, emergency procedures, restrictions on site, frequency and personnel responsible for safety inspections and controls. • All workmen should be provided with personal protective equipment. • The Conditions of Contract in the tender documents should stipulate health, safety and environment regulations and work procedures. • The Contractor must appoint a foreman with knowledge on health, safety and environment regulations. 	Fire and safety:	<ul style="list-style-type: none"> • Excavated materials and excess earth will be kept at appropriate sites approved by the supervising engineer and the earth dumping sites designed in such a manner as to facilitate natural water discharge. • The Contractor shall protect areas susceptible to erosion by installing necessary temporary and permanent drainage works as soon as possible. • Place portable fire extinguishers at suitable locations, according to the activities in the construction programme. • Mark and sign-post all emergency exits; • Ensure safety warnings are prominently displayed on site, such as “No smoking”, “No naked flames”. • Provide and enforce the use of personal protective equipment (PPE). • Install a temporary fire alarm and ensure that fire procedures are known to all the site staff. • Ensure that an adequately stocked First Aid box is on site at all times. • Maintain an incident/accident register, in accordance with the OSHA, 2007.
Occupational health and safety	<ul style="list-style-type: none"> • No grey water runoff or uncontrolled discharges from the site/working areas (including wash down areas) shall be permitted. • Water containing pollutants such as cements, concrete, lime, chemicals and fuels shall be discharged into a sewer line for removal from site. • Potential pollutants of any kind and in any form shall be kept, stored and used in such a manner that any escape can be contained and the water table not endangered. • Wash areas shall be placed and constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted. • The Contractor shall take reasonable measures to control storm water and the erosive effects. • No construction materials shall be stockpiled within areas that are at risk of flooding. • Plastic sheeting, sandbags or geofabric approved by the Supervising Engineer shall be used to prevent the migration of fines. • Develop a site safety action plan detailing safety equipment to be used, emergency procedures, restrictions on site, frequency and personnel responsible for safety inspections and controls. • All workmen should be provided with personal protective equipment. • The Conditions of Contract in the tender documents should stipulate health, safety and environment regulations and work procedures. • The Contractor must appoint a foreman with knowledge on health, safety and environment regulations. • All injuries that occur on site must be recorded in the accident registers and corrective actions for their prevention be instigated as appropriate (Sections of the OSH Act). • Site personnel should be encouraged to report “near-miss incidents” in order to avoid potential problems and increase safety awareness. • Statistical records on accidents and incidents should be analyzed on a monthly basis and forwarded to the Supervising Consultant, DOSHS offices and / or displayed on the notice boards. 	Waste management	<ul style="list-style-type: none"> • Comply with the requirements of the EMCA (Waste Management) Regulations, 2006. • Develop a solid waste management plan prior to project commencing, identifying optimal waste re-use options and disposal areas. • Waste should not be burned on site or dumped in undesignated waste disposal areas. • Minimise waste production by utilizing best available techniques for site preparation. • Clearly designate and construct an appropriate waste collection facility or provide covered refuse skips. • Re-use construction waste to the maximum extent possible. • Proper handling and storage procedures for hazardous wastes e.g. fuel oil should be stored in areas with hard standing and containment to handle spills.
		Waste water and waste oil management practices	<ul style="list-style-type: none"> • Carefully collect used oil in drums and dispose of by licensed refuse contractor. • Adhere to Wastewater management regulation of the legal Notice 121 and Water quality regulations of the Legal Notice 120. • Conduct wastewater monitoring to check compliance on monthly basis and submit the results to NEMA County Office for immediate approval of the station operations. • Document and train staff in the emergency spill response plan. <p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.</p> <p>(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.</p> <p>(c) County Director of Environment, Nairobi County.</p>

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

ZEPHANIAH O. OUMA,
for Director-General,

MR/5951918

National Environment Management Authority.

GAZETTE NOTICE NO. 8975

THE ENVIRONMENTAL MANAGEMENT AND

CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED NORTHERN COLLECTOR TUNNEL PHASE 1 IN KANGEMA AND KIGUMO SUB-COUNTIES OF MURANG'A COUNTY

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Athi Water Services Board) is proposing to set up a Bulk Water Supply to Nairobi City – Northern Collector Tunnel, a Raw Water Pipeline, and Treated Water Pipeline to Kabete Reservoir Phase 1 in Kangema and Kigumo Sub-Counties of Murang'a County.

The Northern Collector Phase 1 (the Project) includes the following components:

Transfer of water from Maragua River, Irati River and Gikie River to Thika dam (Ndakaini dam);

Construction of raw water gravity main from Thika dam to the proposed Water Treatment Plant 6km downstream of Thika dam; Construction of Water Treatment Plant 6km downstream of the dam; and

Construction of 44km Treated Water gravity main up to Kabete reservoirs (capacity 1.60m³/s) via Ngethu and Gigiri Water Treatment Plants to meet the city's year 2017 water demand.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

Possible Impacts Mitigation Measures

Impacts during construction phase

Loss of land and resettlement; and economic displacement	<ul style="list-style-type: none"> Implement RAP before commencement of the construction works.
Increased risks of landslides and other Geological/ seismic hazards	<ul style="list-style-type: none"> Implement Geotechnical monitoring through Excavation Performance Review (EPR) system to continuously monitor the Geotechnical stability during the construction phase using appropriate instrumentation. Formulate an emergency communication plan for alerting the local community where the need arises.
Soil erosion and sediment generation	<ul style="list-style-type: none"> The contractor must implement planned erosion control measures to avoid erosion in areas that are prone to erosion, e.g. steep slopes and drainage lines. Ensure downstream water users are informed about any unprecedented release of heavily silted water into the river. Sediment traps and barriers must be employed due to steep terrain.

Soil pollution	<ul style="list-style-type: none"> No vehicle/plant maintenance shall take place on undesignated site. In case of emergency, a drip tray shall be used to avoid diesel and / or oil spills. Concrete mixing shall not be done on bare soil. Concrete must be mixed on mortarboards, a large metal sheet or concrete slab. Excavated material shall be stockpiled at a demarcated site, within the construction zone.
Soil compaction	<ul style="list-style-type: none"> Vehicles must be kept on existing/designated roads/tracks where possible; Rip compacted areas to reduce runoff and re-vegetate where required.
Surface and ground water pollution	<ul style="list-style-type: none"> Implement Standard Operating Procedures (SOPs) for working in water, including checks on equipment condition and refuelling protocols. Ensure that all construction equipment and vehicles are serviced off site at licensed garages. Any contaminated soil should be handled properly as hazardous waste and removed from site for safe disposal.
Overstretching local utilities; and incidences of insecurity	<ul style="list-style-type: none"> Careful planning of construction camp. Any contractor's camp should have a comprehensive waste management and sanitation plan. Any storage tanks and equipment should have correct labels and Material Safety Data Sheets. Adequate Emergency Response Plan should be in place in the camps.
Oil spills	<ul style="list-style-type: none"> Vehicle maintenance should be done on purpose-built impervious concrete platforms with oil and grease traps. Monitor effluent discharge from the oil skimming tanks. Effluent discharge shall not exceed 25 mg/litre or the limit specified by the NEMA.
Shifting of labour from tea picking to construction and Increased school drop-outs	<ul style="list-style-type: none"> The contractor should be encouraged to offer wages within the prevailing rates. Contractor must abide by labour laws and avoid any employment of children.
Interference with migratory fishes	<ul style="list-style-type: none"> Minimize activities to areas of construction and initiate habitat restoration immediately after construction works are through. Ensure sufficient compensation flow.
Riverine microhabitat alterations; Loss of otter dens; and Loss of breeding and nursery grounds for fishes and invertebrates	<ul style="list-style-type: none"> Ensure adequate waste management plan is in place and in use from the onset of construction. Systematic search, capture and safe release of otters inhabiting the right of way (for the weir structures) and fish pass).

Loss of vegetation cover and Illegal logging of trees of conservation significance	<ul style="list-style-type: none"> • Compensate for affected tea bushes and tree/woodlots before construction works begin and allow for salvage of affected timber. • Where encountered, plants of conservation importance should be avoided as feasible. • Ensure compliance with Wildlife (Conservation and Management) Act, 2013 and sensitize employees on the same. 	Changes in riverine and riparian floral compositions	<ul style="list-style-type: none"> • The riparian extent of the project affected rivers should be defined by WRMA and be enforced to prevent people farming up to the river banks to reduce siltation.
Pressure on and disruption of utility services	<ul style="list-style-type: none"> • Liaise with relevant utility service providers and roads authorities to minimize any service disruptions. • Ensure advance notice to all stakeholders including water service providers and KTDA of any planned disruptions. 	Safety risks during tunnel maintenance operations	<ul style="list-style-type: none"> • AWSB should establish and implement NCT1 tunnel specific comprehensive O&M Safety and Health Management Plan.
Modification of landscape	<ul style="list-style-type: none"> • Encourage reuse of spoil materials e.g. in roads construction and maintenance to reduce land area used for spoil storage. • Incorporate landscaping at adits and portals to camouflage the introduced concrete surfaces. 	Concerns of dam safety	<ul style="list-style-type: none"> • Review and update the existing safety and Emergency Plan for Thika dam.
Growth of unplanned settlements	<ul style="list-style-type: none"> • As much as feasible, the unskilled labour should be obtained from amongst the locals. • Liaise with Murang'a county government to control developments in the area and ensure provision of adequate services. 	Loss of water	<ul style="list-style-type: none"> • Monitor volumes at intakes and outfall to allow loss detection; and • Ensure regular inspection and maintenance of the tunnel.
Destruction of unidentified physical cultural resources	<ul style="list-style-type: none"> • Formulate a chance-find procedure for implementation whenever any archaeological sites are encountered. 	Impeded migration of fish	<ul style="list-style-type: none"> • Test and evaluate efficacy of fish passes within the first two years of commissioning.
<i>Impacts during operation phase</i>		Spoil generation	<ul style="list-style-type: none"> • Maximise the re-use of excavated materials in the works as far as feasible. • Properly dispose of the spoil in the approved spoil sites identified by the design team.
Reduced downstream flow (affecting both domestic and ecological needs)	<ul style="list-style-type: none"> • Ensure strict adherence to the proposed abstraction weirs operation principles. • Construct fish passes as planned and ensure they are regularly maintained. • Undertake wet season survey and subsequent annual aquatic fauna surveys to monitor trends and inform any further management interventions. • Conduct routine In-stream Flow Release compliance audit/monitoring once operation commences for management interventions. 	Waste handling challenges	<ul style="list-style-type: none"> • The contractor should enforce the appropriate management methods based on the three Rs (Reduce, Reuse, and Recycle). • Final disposal of the site waste should be done at a location that shall be approved by Resident Engineer in accordance with the Waste Management Plan after consultation with the relevant stakeholders, including the County Administration and local community.
Reduced water temperatures downstream	<ul style="list-style-type: none"> • Encourage local communities to plant indigenous trees on the riparian lands to ensure water temperatures are not increased. 	Liquid waste pollution	<ul style="list-style-type: none"> • All grey water runoff or uncontrolled discharges from the site/working areas to water courses should be contained and properly channeled. • Water containing such pollutants as cements, concrete, lime, chemicals and fuels shall be discharged into a conservancy tank for removal from site.
Deterioration of downstream water quality	<ul style="list-style-type: none"> • Conduct regular water sampling and laboratory analysis to monitor the water quality variations. 	Dust nuisance and toxic emissions with respiratory health problems	<ul style="list-style-type: none"> • Vehicles delivering soil materials should be covered to reduce dust emissions. • Consider watering of the access roads during dry season to suppress dust. • Provide dust masks to all personnel on dust-prone work sites. • All construction machinery should be maintained and serviced in accordance with the equipment specifications and manufacturer's standards.
Increased inflow into Githika river and Thika reservoir	<ul style="list-style-type: none"> • For possible increased inundation of the riverine areas, stream channel expansion from the outfall may help to counter the increased flow. Installation of a gauging station after outfall, will help monitor the water levels changes, so as appropriate measures can be taken; and • Ensure that the new off take is continuously operational at optimal levels to evacuate the increased volumes. 	Noise nuisance and related health problems	<ul style="list-style-type: none"> • Noise levels shall be kept within acceptable limits preferably as stipulated within the Environmental Management and Coordination (Noise and Excessive Vibration Pollution) Control Regulations, 2009. • Monitor noise and vibration in sensitive locations above the tunnel and along the haulage routes to ensure the NEMA requirements are met. • Equipment should be maintained regularly to reduce noise resulting from friction. • Workers exposed to high-level noise must wear personal protective equipment (PPE).
Changes in riverine and riparian floral compositions	<ul style="list-style-type: none"> • Observe the minimum ecological flow after intake for R. Maragua, R. Irati and R. Gikigie. • Undertake continuous ecological monitoring of hydrophytes and high water specific species to track and mitigate any emerging impacts of the project on the plants. 		

- Generation of Ozone depleting gases
- Ensure use of approved fuels from licensed suppliers only.
 - Ensure that any cooling units installed at the camps only use ozone friendly coolants in compliance with NEMA guidelines.
- Social delinquency and spread of STIs including HIV/AIDS
- Ensure the contractor liaises with local public health officials and NGO's within the project area in educating the community.
 - Locate construction camps away from concentration of schools; and,
 - The contractor should ensure that the project workers are sensitised on the local culture.
- Traffic inconveniences and damage to local roads
- Ensure the local roads and bridges to be used by the project are improved before construction works start.
 - Ensure that all regulations relating to traffic management are observed and notify the local traffic officials and KTDA of the construction activities; and
 - Install appropriate traffic warning signage and enforce speed limits for construction vehicles on the project affected roads.
- Safety and health risks to workers and the general public
- The contractor should ensure compliance with all standards and legally required health and safety procedures in line with OSHA, 2007 and associated rules and regulations.
 - Implement the specified H&S programme throughout the construction period.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (c) County Director of Environment, Murang'a County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
