GAZETTE NOTICE NO. 2546

THE COMPETITION ACT

(No. 12 of 2010)

MARKET INQUIRY/SECTOR STUDY IN THE KENYAN LEASING SECTOR

Competition Authority of Kenya is a State corporation established under section 7 of the Act and whose mandate is to safeguard and promote competition in the national economy through regulation of market conduct and structure.

IN EXERCISE of the powers conferred upon the Competition Authority of Kenya by section 18 (1) (a) of the Competition Act, 2010, the Authority notifies the public that it intends to carry out a market inquiry into the leasing sector. Leasing has been recognized as an alternative tool for financing capital goods. A robust leasing sector is likely to exert competitive pressure in the asset and operational lease market which would be beneficial to the consumers of leases including SMEs, Government and large enterprises in terms of reduced in prices and product innovation. Leasing has significant potential for expanding SME finance and a regulatory framework is needed to exploit this opportunity. The aim of the study is to assess the current state of play in the market for such leasing by examining the structure, dimensions and the intensity of competition, the conduct of market players and the regulatory framework under which leasing sector operates. The study will focus on leasing in financial services, agriculture, health, extractives and retail sectors among others. The ultimate objective of the study is to develop an effective regulatory framework to govern the sector and also deepen competition.

Specifically, the study aims to—

- assess the Legislative framework governing the operation of leasing entities and the mechanisms of enforcing leasing contracts;
- to assess whether there are agreements in the sector which prevent, distort or restrict competition and affect consumer welfare;
- assess the nature/conduct of market participants in the leasing sector;
- establish if there are any barriers to entry and exit pertaining to the sector that inhibit competition and effective market functions;

- explore the sources of competitive advantages being exploited by the key players and the main channels utilized to obtain business;
- determine whether any of the provider segments are better positioned for compliance within the existing regulatory framework than others;
- examine the licensing regimes for each provider segment; and
- inform the legal and regulatory framework to encourage greater competition in the leasing sector in Kenya.

In conducting the market inquiry, the Competition Authority of Kenya—

- shall hold such number of meetings in such places and at such times as it may consider necessary for the proper discharge of its functions; and
- may receive views from members of the public and receive oral and written submissions from any person with relevant information.

Stakeholders, with relevant information, may also submit oral or written submissions to the Authority within thirty (30) days of the publication of this notice.

The Secretariat of the Inquiry shall be based at the Authority's offices located at Kenya Railways Staff Retirement Benefit Scheme Block "D", 1st Floor, Haile Selassie Avenue, P.O. Box 36265-00200, Nairobi. Email: info@cak.go.ke, Telephone: +254-20-2628233.

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED VOI VILLAGE COMPLEX ON L.R. No.
VOI MUNICIPALITY BLOCK 1/1658, 1/595 AND 1/576 AT
VINDO AREA IN VOI OF TAITA TAVETA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Voi Village Company Limited, is proposing to construct Voi Village Complex (VVC) which will be a modern multi-purpose commercial and residency luxury complex. The proposed project shall be located on L.R. No's. Voi Municipality Block 1/1658, 1/595 and 1/576 in Vindo area at Voi in Taita-Taveta County. The parcels of land lie adjacent to each other and add up to a total of 11.12 Ha (27.48 acres).

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Air quality degradation	<ul style="list-style-type: none"> Continuous sprinkling of water on the access road especially during dry seasons. Drivers to be cautioned against over speeding. Switch off engines when not in use. Haulage trucks must be covered with tarpaulin or the aggregates sprayed with water before loading the haulage trucks. Regular maintenance of construction equipment to minimize exhaust emissions. Staff working in dust generating activities to be provided with PPE such as dust masks / respirators and the use of PPE be enforced. Screen/cordon off the site to minimize dust migration by wind. Strict adherence to Air Quality Regulations, 2014.
Excessive noise and vibrations	<ul style="list-style-type: none"> Limit the times of construction to daylight hours (8 a.m.–5 p.m.). Erect signage to prohibit unnecessary hooting. Ensure that noise and excessive vibration from construction activities are within permissible levels as per the provision of the EMCA (Noise and Excessive Vibration P.O.lution) (Control) Regulations, 2009. Provision of hearing protection gears to workers exposed to noise levels above 85 dB(A). Regular servicing of machinery and vehicles to reduce friction on the moving parts. Adherence to Noise and Excessive Vibration P.O.lution (Control) Regulations, 2009.
Increased water demand	<ul style="list-style-type: none"> Practice rain water harvesting with sufficient water reservoirs. Sensitize workers to use water sparingly. Encouragement of water re-use/recycling during both construction and occupation phases of the project. Proper treatment of waste water via the WWTP so that it is reused for non-potable uses such as watering gardens, flushing and cleaning. Regular audits of water systems.

*Impacts**Proposed Mitigation Measures*

Oil leaks/spills from machineries and storage area

- Internal monitoring of water consumption through water meters to enable proper performance review and management.
- Install aerated taps on sinks and hand-wash areas to save on amount of water utilized.
- All machinery must be keenly observed and maintained to prevent oil leaks.
- Maintenance must be carried out in a designated area (impermeable service bays) and where oils are completely restrained from reaching the ground.
- All oil products and materials like containers should be stored in site stores or in the contractor's yard and handled appropriately to avoid spills and leaks.
- In case of an oil spill, oil absorbent materials should be used to clean up the spill then put in disposal bags to be collected and managed as hazardous waste by a NEMA licensed hazardous waste handler.

Increased energy demand

- Design of the buildings should allow adequate ventilation and lighting during the day.
- Switch off electrical appliances when not in use.
- Use of energy conserving electric bulbs for general lighting.
- The solar power plant will supplement energy from KPLC.
- Carry out energy audits every three (3) years after commencement of operations.

Increased surface water runoffs and soil erosion

- Provision of soil conservation structures like planting ground cover vegetation (grass) on erosion prone areas to control occurrence of soil movement.
- Provide specific access routes so that trucks does not loosen soil all over the site.
- Control construction activities especially during rainy seasons to reduce loosening top soil.
- Avoid unnecessary soil excavations on the site to prevent loosening soil and exposure to eroding agents like water and wind.
- Landscape open areas after completion of the project.
- Monitor the natural flow system during heavy rains and make improvements where necessary.

Solid waste management

- Excavation waste should be re-used or backfilled.
- Adopt the 3R Waste Management Approach, that is; Reduce, Reuse and Recycle whereby waste shall be segregated – plastics, glass, tins, papers, wood, metals etc. (later to be re-used or recycled).
- Contract a NEMA licensed waste handler to collect construction waste.
- All waste holding containers to be labelled/ color-coded depending on waste category.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>	<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Waste water management	<ul style="list-style-type: none"> After construction, Contractor must clear the site of all debris and restore it to a state acceptable to the supervising architect and environmental consultant. Strict adherence to Waste Management Regulations, 2006. During construction, the contractor shall provide temporary sanitary facilities for the workers. A waste water treatment plant shall be used to treat all waste water from the development during operational phase. Regular maintenance of the WWTP. Strict adherence to Water Quality Regulations, 2006. 		<ul style="list-style-type: none"> Use barriers, guards and warning / caution signage as necessary to protect employees and visitors from physical hazards. Ensure that operational manuals are available and accessible for every equipment /machinery used at the site during construction and operation phases. Proper maintenance of all machinery and equipment to prevent premature failure or possible accidents. Only properly trained workmen to operate equipment or machinery. Display emergency numbers for area police, fire outbreak and medical emergencies.
Loss of vegetation cover	<ul style="list-style-type: none"> Confirm sites and locations in order to avoid unnecessary clearing of vegetation. Landscape open areas after completion of the project. 		<ul style="list-style-type: none"> Provide fire-fighting equipment and mark a fire assembly point. Conduct statutory trainings under OSHA, 2007 and Rules under it. i.e. basic first aid, fire safety training, and Occupational Safety and Health committee training through approved training institutions by the Directorate of Occupational Safety and Health Services (DOSHS).
Disruption of utility services	<ul style="list-style-type: none"> In case of construction works that will affect the existing power lines, inform the local community earlier through KPLC giving clear timelines so that locals are able to adjust their activities during that period. 		
High demand for electricity	<ul style="list-style-type: none"> Switch off electrical appliances and lights when not in use. Install occupational sensing lights at various locations such as storage areas which are not in use all the time. Install energy saving fluorescent tubes. Monitor energy use during the operation of the project and set targets for efficient use. Sensitize housing units occupants to use energy efficiently. 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Risks of electrocution from existing high voltage transmission line and proposed solar power project	<ul style="list-style-type: none"> Maintain a minimum of 30-metre right-of-way at the area around the pylons and the spans between the pylons by erecting barriers 30 meters from the pylons. Avoid constructing tall structures or planting tall trees under the transmission lines that can touch cables or can interfere with maintenance of the lines. Install warning signs near transmission pylons to warn drivers of risk of electrocution in case they knock them. Enforce a speed limit of 5 km/hr within the pylons to ensure drivers are more careful not to knock pylons. After completion and equipping of the solar project, secure the area to control access to power house. 	<p>The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.</p> <p style="text-align: right;">GEOFFREY WAHUNGU, <i>Director-General,</i></p> <p>MR/4187295 <i>National Environment Management Authority.</i></p>	
Occupational health and safety	<ul style="list-style-type: none"> Proper fencing of the site and restricting unauthorized persons' access. Provide well-stocked first aid kits to be managed by trained first aiders. Nominate an EHS officer to oversee compliance of all construction activities to OSHA 2007 and regulations under it. Provide appropriate PPE to all site workers: respirators, overalls, safety boots, head gears, hand gloves, ear muffs and googles.

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITYENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF THE MOMBASA
NORTHERN BYPASS AND BAMBURI LINK ROADS IN
MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya National Highway Authority, is proposing to construct the Mombasa Northern Bypass and Bamburi Link roads in Mombasa County. The Project comprises of two sections amounting to 38 km as follows: Mombasa Northern Bypass (27.1 Km) and Bamburi Link Road (11.5 Km). The Mombasa Northern bypass Section targets to connect the Mombasa-Nairobi (A109) Highway at Miritini to the

Mombasa–Malindi (B8) Road at Kwa Kadzengo, Mtwapa. The Bamburi Link Road is targeted to link the new Mombasa Northern Bypass Road to the Mombasa–Malindi (B8) Road at Bamburi.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>	<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Loss of biodiversity	<ul style="list-style-type: none"> Mapping of genetic resources will be required for re-introduction elsewhere. All top soil from Kaya sites will be recovered and re-deposited at designated undisturbed sites where the gene bank can be preserved and recovered through natural germination. A reforestation plan will be implemented to replace over 40,000 trees to be displaced by the road and settlements. The clearance of the site for construction purposes shall be kept to a minimum. Use of un-vegetated or disturbed areas for the contractor's Camp, stockpiling of materials etc. shall be encouraged. 	Solid waste	<ul style="list-style-type: none"> The contractor should develop a comprehensive waste management plan Provision for responsible management of any hazardous waste generated during the construction works. Adherence to Waste Management Regulations of 2006.
Soil pollution	<ul style="list-style-type: none"> Practice sound road engineering by maintaining good drainage and natural water flows. However, the drainage ditches should only be constructed where necessary. To minimize potential soil erosion the contractor should consider planting appropriate grass on back slopes, side slopes and other sites prone to erosion. Develop an erosion control and revegetation plan that stipulates measures to minimize soil loss and reduce sedimentation to protect water quality especially for sections that will interact with water resources. Design run off control features especially on the roadside drainages channels to minimize soil erosion. Limit cleared areas to protect footprint to avoid unnecessary exposure of soil to agents of erosion. Line side- drains with concrete or by stone pitching in erosion prone soil to avoid gully formation. 	Liquid waste and effluent	<ul style="list-style-type: none"> Water containing such pollutants such as cements, concrete, lime, chemicals and fuels shall be discharged into a conservancy tank for collection to avoid ground water contamination. The contractor shall also prevent runoff loaded with sediment and other suspended materials from the site/working areas from discharging to adjacent watercourses and/or water bodies. Wash areas shall be placed and constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted.
Water resources	<ul style="list-style-type: none"> Uncontrolled water discharges should not be channeled into water sources. Camp sites, waste disposal and soil dumping areas should be located at least 20m from the highest water level of any surface water body. Grey water should be channeled to a soak pit to prevent mixing with run off that would eventually find their way to nearby water sources. The contractor should ensure that concrete wing walls, gabions, riprap or other suitable control are established at or near bridge structures. Water permit for the abstraction of water shall be obtained from WARMA to ensure that existing water rights and uses will not be affected by the road project for its diverse water needs. Consultation with the Water Resource Users Association (WRUA) should be done prior to abstraction to gain their support. 	Noise and vibration	<ul style="list-style-type: none"> Exploit quarries that are located in isolated areas away from settlement or human made structures. Employ careful blasting methods and warn nearest residents of your intention to blast one week to schedule blasting. Carefully select batching plant locations that are at least 200m away from any sensitive institution or settlements. Hoard the batching plant area at least 5m tall buffer barrier that will limit noise transmission from the site. Restrict working hours to daytime when ambient noise levels are generally high and avoiding working at night. Inform potentially affected people or institution located within 200m of a potentially noisy activity at least one week in advance. Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009.
		Air quality	<ul style="list-style-type: none"> Restrict excavation to the project foot-print to minimize surface exposed to wind erosion. Manage stockpiles by covering those that are not of immediate use. Carefully control works close to the listed sensitive receptors such that minimal dust is generated and whenever earthworks are being undertaken, then dust suppression should be implemented continuously. Ensure contractor's staff working at high dust generating site are provided with appropriate PPEs to include dust masks and/or suitable aspirators. The contractor should inform the management of sensitive institutions on the day that excess dust is likely to be generated so they can be prepared. The same applies to workers along urban centres Adherence to Air Quality Regulations, 2014.
		Material sites and borrow pits	<ul style="list-style-type: none"> All access routes to material sites should be planned ahead of construction.

*Impacts**Proposed Mitigation Measures*

- Develop a rehabilitation/ reinstatement plan for borrow pits.
- Haulage routes should be maintained by watering to minimize the impact of dust
- Contracts with the land owners should be signed before excavation begins which include terms and conditions for payment, the area of land to be excavated, the rehabilitation measures to be carried out on the gravel sites, if required.
- The contract documents should instruct the contractor to construct and maintain fences and rehabilitate after use.
- Material site areas must be excavated should be cordoned off.
- Gravel pits must be landscaped then reinstated or backfilled with overburden if the depth of the overburden is sufficient to allow for this.
- Ensure separate stockpiles for overburden and gravel.
- Landowners should be informed of the environmental implications of the excavation works at the time of identification of the gravel pits.

Public health and HIV/AIDS

- Initiate an awareness creation, prevention and training programme on HIV/AIDS upon commencement of works.
- Establish wellness centre including VCT and ARV centres at strategic location of the project corridor.
- Incorporate HIV/AIDS control program as part of the construction deliverables.

Resettlement and compensation

- A resettlement action plan has been separately undertaken and reported in a separate volume.

Occupational health and Safety

- Comply with the provisions of OSHA 2007.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Mombasa County.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF RESIDENTIAL

APARTMENTS ON PLOT L.R. No. 209/14070 IN NAIROBI CITY
COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, United Africa Construction Limited, is proposing to construct residential apartments on Plot L.R. No. 209/14070 situated along Kodi road 2 which connects Mombasa Road and borders southern By pass. The development comprises three blocks of 15 floors, inclusive of ground floor and lower ground floor. The apartments on the first and second floor will have general facilities. The thirteen typical upper floors will have necessary sanitation facilities.

The following are the anticipated impacts and proposed mitigation measures:

*Impacts**Proposed Mitigation Measures*

Hydrology and water supply quality degradation

- Hazardous substance control and emergency response plan that will include preparation for quick and safe clean-up of accidental spill.

Dust and exhaust emission

- Hazardous substance control and emergency response plan that will include preparation for quick and safe clean-up of accidental spill.
- Hazardous materials handling procedures to reduce the potentials for spill during construction.
- Identify areas where refueling and vehicle maintenance activities and storage of hazardous materials, if any, shall be permitted.
- Ensure strict enforcement of on-site speed limit regulations.
- Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles.
- Personal protective equipment to be worn.
- Alternatively fueled construction equipment shall be used where feasible; equipment shall be properly tuned and maintained.

Noise pollution and vibration

- Strict adherence to Air Quality Regulations, 2014.
- Sensitive construction vehicle drivers machinery operators to switch off vehicle or machinery not being used.
- Ensure that construction machinery are kept in good condition to reduce noise generation.
- Trees around the site shall provide some buffer against noise propagation.
- The noisy construction works shall entirely be planned to be during day time when most of the neighbours shall be away at work.
- Adherence to Noise and Excessive Vibration P.O. Regulation (Control) Regulations, 2009.

Oil spills

- A designated garage section of the site fitted with trapping equipments to be planned for changes, such an area shall be well protected from contaminating the soil.

Solid waste generation

- Use of an integrated solid waste management system i.e. recover, recycle and reuse.
- Through accurate estimation of the sizes and qualities of materials required, order materials in the sizes and qualities they

Occupational health and safety	<ul style="list-style-type: none">• Ensure that provisions for reporting incidents and dangerous occurrences during construction using prescribed forms obtainable from the local occupational	<p><i>Impacts</i></p> <p>Soil erosion</p>	<p><i>Proposed Mitigation Measures</i></p> <ul style="list-style-type: none">• No excavations will be carried out in the NPT fields, except ploughing.• Use of recommended agronomic and soil fertility maintenance measures will help in controlling soil erosion

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Biodiversity conservation (flora and fauna) gene flow	<ul style="list-style-type: none"> Time and/or distance isolation from other cotton or related crops shall be maintained to restrict genetic escape. A buffer zone shall also be provided between the Bt cotton NPTs and other cotton fields, if any. The proponent shall ensure proper disposal of plant materials at the end of the project to avoid pilferage.
Livestock production	<ul style="list-style-type: none"> No livestock grazing fields will be opened up for the NPT trials.
Water quality of the river or near water bodies	<ul style="list-style-type: none"> None of the proposed fields is located on riparian land or near water bodies where rainwater off site could flow residual pesticides and fertilizer-nutrients into.
Infrastructure	<ul style="list-style-type: none"> Minimal infrastructure e.g. infield irrigation canals will be constructed in some trial sites to supplement rainfed farming. An appropriate design of the irrigation system will be done to avoid any negative impact
Sediment loads	<ul style="list-style-type: none"> Where supplemental irrigation will be carried out, appropriate irrigation structure will be erected to minimize sediment loads. Equally no sediment loads will leave the fields unless excessive flooding occurs.
Malaria and other waterborne diseases	<ul style="list-style-type: none"> No construction works are involved thus no excavations that may enable stagnation of water. Existing farm fields shall be used.
Pollution- air and dust	<ul style="list-style-type: none"> Initial land preparation during the dry season may lead to minor dust pollution due to ploughing. However, ploughing will be done when the soil moisture is conducive to the operation. In subsequent farm operations, there would be minimal air pollution due to gradual crop cover by the crop. Strict adherence to Air Quality Regulations, 2014.
Human-wildlife conflict	<ul style="list-style-type: none"> Night and day watchmen will be hired to watch and prevent incursions by wildlife.
Waste disposal (generation, collection and disposal)	<ul style="list-style-type: none"> At the NPT plots set up phase, no bushes or tree stumps will be generated since the land is currently under agricultural use. During operation, agrochemical and fertilizers bags may be generated. However the project will put in place appropriate waste management plans. At harvest time, KEPHIS will provide appropriate measures for the disposal of stalks, seed and lint.
HIV and AIDS	<ul style="list-style-type: none"> Few staff will be engaged in the project. However the project management as part of its occupational safety and health program will promote awareness of its employees about the risk and prevention of HIV/AIDS and voluntary use of preventive measures i.e. condoms will be availed in wash rooms.
Security	<ul style="list-style-type: none"> Introduction of NPT on Bt-Cotton could attract incidences of vandalism/invasion from anti-GMO activists although during the 10 years of CFT no such a incidence has ever been recorded in Kenya.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> The proponent will employ preventive mechanisms and stakeholder involvement in safeguarding the NPTs. Data may be lost through livestock grazing on the crop. The centers will provide security to the NPT sites since results will be required at the end of the project.
Social welfare	<ul style="list-style-type: none"> There will be minimal effect on social welfare as the NPTs will only last for a maximum of two seasons attracting minimal employment opportunities. However, local community will be given priority when hiring unskilled labour without discrimination, corruption or sex exploitation or harassment as per the laid down KALRO Codes of Conduct Policies. To increase awareness about Bt-Cotton, the sites will be open to the public at times agreeable with the centre management.
Occupational health and safety	<ul style="list-style-type: none"> KEPHIS shall provide guidelines on product handling and management. All workers on the project will be sensitized on occupational health and safety aspects and supplied with appropriate working attire e.g. masks, gloves, gum boots and first aid kits. Varieties safety shall be well labelled to ensure no mix up of treatments. Comply with the provisions of OSHA 2007.

The full report of the proposed project is available for inspection during working hours at:

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
