IN EXERCISE of the powers conferred by section 107 (2) of the Water Act, 2002, the Director of Water Services notifies for the information of the general public that the Minister for Water and Irrigation intends to publish a national water services strategy for the development, management and monitoring of water and sewerage services.

In fulfillment of the provisions of section 49 of the Act, the Minister wishes to consult with the public on the contents of the draft strategy whose summary is set out below. The full text of the draft strategy may be obtained from [www.water.go.ke](http://www.water.go.ke)

## 1. Summary of the National Water Services Strategy (NWSS)

Water is the most important natural resource, indispensable for life and at the same time the backbone of growth and prosperity for mankind. According to UNDP more people die of water related diseases than in military conflicts around the world. Funds invested in WSS will generate an economic benefit of between 3 and 34 times depending on the technology and specific condition on the ground. In Sub-Saharan African countries every year 5% of the national product is lost because of inadequate WSS service provision. It is recommended to raise the profile of WSS and target to spend a minimum of 1% [UNDP target] of the GDP annually on WSS.

In Kenya the WSS situation is poor for a majority of people with, on the overall, approximately 57% (KIHBS 2005/2006) of households using water from sources considered safe. Sustainable access to safe water is around 60% in the urban setting and drops to as low as 20% in the settlements of the urban poor where half of the urban population lives. With a population growth of up to 10% in the low income urban settlements many 'hot spots' continue to develop in many towns and therefore sustainable access to safe water is declining. Sustainable access to safe water in the rural setting is estimated at 40%. Sanitation coverage country wide is about 50%. Living conditions in the settlements of the urban poor are appalling due to the resulting unsanitary environment. Missing sanitary installations and uncontrolled disposal of excreta pollutes the water sources from which most of the informal providers draw water. Vendors sell water of uncontrolled quality to consumers who have to spend hours to fetch it at prices that are often between 5 and 20 times the tariff applied on consumers with a metered water connection.

The information presently available needs to be gradually improved and adjusted as and when more precise data becomes available through the information systems that are now being established.

In the past performance of utilities was poor due to ineffective management and inadequate provision for operation and maintenance. The resulting poor performance has led to rapid degradation of WSS infrastructure hindering the desire to achieve self sustainability impacting mainly on the low income consumers. Syndication of utilities into viable clusters and application of commercial principles has emerged as a powerful response to turn around this declining trend. It has led to improvements in performance and increase in investments for rehabilitation and establishment of new facilities.

In order to tackle institutional and operational weaknesses, the Government through the MWI has commenced water sector reform provided for in the Water Act 2002. All the new institutions within the WSS sub-sector have been established: Water Services Regulatory Board (WASREB) to set standards and regulate the sub-sector; Water Appeal Board (WAB) to adjudicate on disputes; seven Water Services Boards (WSBs) to be responsible for the efficient and economical provision of water services; Water Services Trust Fund (WSTF) to finance pro-poor investments; Water Services Providers (WSPs) to be agents in the provision of water and sewerage services utilizing acceptable business principles in their operations. The MWI is responsible for overall sector oversight including policy formulation, co-ordination and resource mobilisation.

The NWSS defines the following strategic goals and strategic actions designed to provide an effective and efficient response to the challenges identified in the WSS sub-sector:

## Strategic goals

2.1 Reach at least 50% of the underserved urban population with safe and affordable water by 2015 (MDG) and thereafter, move to access to all by 2030

2.2 Reach through sustainable waterborne sewage collection, treatment and disposal systems 40% of the urban and 10% of the rural population by 2015

2.3 Increase access to safe and improved basic sanitation facilities particularly for the poor to 77.5% in the urban setting and 72.5% in the rural setting by 2015

2.4 Achieve the MDG by fast tracking affordable and sustainable access to safe water in the settlements of the urban poor.

## Strategic actions

(a) Increasing sustainability and benefits of economy of scale through clustering of utilities.

(b) Review tariff guidelines periodically to cover justified costs.

(c) Sector investments shall focus on infrastructure development and improvements of operation.

(d) Service provision according to minimum standards specified in the sector benchmarks.

(e) Increasing funding and leadership of GoK in the sector.

(f) Foster good corporate governance

(a) Increase sustainability of sewerage systems and investments through ensuring that development funding has a waste water component.

(b) Improve treatment of effluent by encouraging PPP and government to establish facilities.

(c) Sewerage systems shall be managed by commercially oriented WSPs.

(d) WSBs and WSPs subsidize sewer development to the urban poor.

(e) Develop common understanding of roles of different

Ministries/departments at all levels in the basic sanitation promotion and development.

(f) MWI to define roles that WSPs and private sector in the water sector can play in basic sanitation

(a) Contribute to inter-sectoral co-operation through effective participation of MWI and institutions in fora on sanitation.

(b) Enhance the contribution of the water sector to basic sanitation by promoting integrated programmes that have a sanitation component.

(c) Promote professionalism and minimum standards for basic sanitation through guidelines to enhance local level capacity.

(d) Fast tracking basic sanitation for the poor through subsidies by GoK or DPs

(a) Ensure increased service provision in the settlements of the urban poor with minimum requirements and standards through GoK or DP subsidy in infrastructure development and empowering to manage facilities.

*Strategic goals**Strategic actions*

2.5 Reach at least 50% of the underserved in rural areas with safe and affordable water by 2015 (MDG) and thereafter move to sustainable access for all by 2030

- (b) Accelerate sustainable access to safe water in the settlements of the urban poor by formalizing connections, setting pro-poor tariffs, providing appropriate outlets.
- (c) WSRB, WSBs and WSPs shall develop and implement strategies to extend formalized service provision to the urban poor.
- (d) Water sector reports to include advances in service provision to urban poor.
- (e) Institutional development aimed at building capacity to be prioritized to develop local level management of WS provision
