AMERICAN AIRLINES GROUP INC AND QATAR AIRWAYS
COMPANY Q.C.S.C EXEMPTION APPLICATION

APPLICATION FOR EXEMPTION

PURSUANT to the provisions of section 25 of the Competition Act, Act, 2010 ("the Act"), the Competition Authority of Kenya (CAK) notifies the public that the American Airlines Group Inc. (American Airlines) and Qatar Airways Company Q.C.S.C (Qatar Airways) have made an application for exemption on certain sections of the Act with regards to potential Restrictive Trade Practices for a period of ten (10) years, relating to a passenger Strategic Alliance which would entail a metal-neutral, revenue-sharing agreement between the parties covering travel between the US and various countries in the Middle East, within Africa (with Kenya within the geographic scope) and the Indian Sub-continent.

In particular, American Airlines and Qatar Airways are seeking to be exempted with respect to entering into a Strategic Alliance which would involve co-ordination on a number of aspects of the services offered with respect to the following:

- (a) Schedule co-ordination and co-ordination for new capacity – the parties shall use commercially reasonable efforts to co-ordinate their schedules and to mutually explore all opportunities to benefit from new capacity growth of passengers of the scheduled passenger services operated by each Party or its Affiliates;
- (b) Code sharing-the parties shall engage in code sharing of various flights in order to minimize connecting passenger waiting time and to maximize passenger convenience and service;
- (c) Revenue Management- the parties shall jointly co-ordinate the development of revenue plans for the Joint Services. Specifically, they shall discuss and reach agreements on various areas in order to achieve cost synergies such as information technology systems; aircraft, engine and ground service equipment services; insurance including aviation insurance; aircraft maintenance and inventories; purchasing; frequent flyer programs; airport facilities; sales; promotions, marketing and reservations including ticket office consolidation; airport lounges, terminal location and ground services and jet fuel;
- (d) Sales—the parties shall align and coordinate planning and implementation of sales to actively promote the Joint Services on a metal neutral basis to provide customers with greater discounted fares, and a broader range of benefits;
- (e) Alignment of Pricing—the parties shall satisfy market demand through joint pricing. Further, the parties will establish initial General Pricing Guidelines and Unpublished/Dealt Pricing Guidelines Pricing Guidelines that take into account the composition, scope and dealing rationale of each party's existing business;
- (f) Inventory management—the parties shall co-ordinate the inventory management of the Joint Services greater integration of yield management systems through the sharing of "bid prices" or other demand forecast data relevant to calculating inventory availability for the Joint Services. They shall also exchange historic and forward-looking data which include passenger and revenue data by cabin relating to each party's traffic demand regarding each of the Joint Services;
- (g) Discounts and Marketing— the parties shall seek to agree to a clear dealing strategy on areas not limited to private fares, agency commissions, rebates, discounts, share performance and agency net fares. Further, they shall coordinate planning and implementation of marketing activities through marketing each other in their respective flights (both codeshare and prime) and by facilitating selling opportunities for the other on their extended network (outside the Strategic Alliance); and
- (h) Loyalty—Frequent Flyer Programmes – the parties shall engage in the co-ordination of frequent flyer programmes through promoting each other to frequent flyers by offering various promotions.

The above conducts, if not exempted, will qualify as contraventions under the Act, hence the application for exemption.

All interested parties are required to submit any written representations, if any, with regard to this application within thirty (30) days of the publication of this notice.

Submissions may be made through the email address info@cak.go.ke or the CAK portal <https://competition.cak.go.ke:444> under submissions.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MAKUTANO SEWERAGE PROJECT IN
MAKUTANO TOWN, WEST POKOT COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above-proposed project.

The proponent, Central Rift Valley Water Works Development Agency, proposes to construct a 3000m³/day capacity of waste water treatment plant (WWTP) and a conveyance system of approximately 51km of sewer networks linking the towns/residential areas to the treatment sites, administration and laboratory building and ancillary works. The proposed project will be located in Makutano Town, West Pokot County.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Mitigation Measures
Loss of land and property	• Prepare a Resettlement Action Plan (RAP) which shall identify all the Project Affected Persons (PAPs), develop a grievance redress mechanism and ensure adequate compensation for PAPs.

<i>Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> Land compensation should be carried out before the implementation of the project. The vulnerable groups identified by the RAP shall be accorded a special care by the proponent. RAP Implementation Supervision.
Loss of fauna and flora	<ul style="list-style-type: none"> Where the proposed route requires the removal of any vegetation, care will be taken to minimize the destruction or damage of trees. Re planting of destroyed trees in cleared areas where works are complete. Workers should refrain from disturbing, killing or stealing locals' animals and/or small soil animals species found on site. Environmental awareness on the importance of biodiversity preservation should be provided to the site contractors and workers. Vegetation found on the sites, but not on the site infrastructure footprint should not be removed or disturbed in any way, but should be left to preserve biodiversity on the site.
Soil erosion	<ul style="list-style-type: none"> The construction work should be carried out during the short rains to minimize the exposure of loose soil to surface runoff. Phasing of site clearance should be considered so as to minimize the area of exposed soil at any given time. Back fill and compact excavated areas as soon as the laying of trunks is done.
Air pollution	<ul style="list-style-type: none"> Construction of the proposed access road should be closely monitored and dust should be suppressed by sprinkling water. Manage excavated soil by covering those that are not of immediate use. Carefully control access road works such that minimal dust is generated and whenever earthworks are being undertaken, then dust suppression should be implemented continuously. Restrict excavations to the project foot-print to minimize surfaces exposed to wind erosion. Ensure Contractor's staff working at high dust generating sites are provided with appropriate PPEs to include dust masks and/or suitable aspirators. The Contractor should inform the management of sensitive institutions on the days that excess dust is likely to be generated so they can be prepared. The same applies to works along the urban centres.
Construction wastes and pollution	<p>Implement a standard set of feasible dust control measures at the site such as:</p> <ul style="list-style-type: none"> Covering all trucks hauling soil, sand and other loose materials and/or require these trucks to maintain at least two feet of freeboard. Watering all dust-active construction areas to suppress dust emissions. Paving or applying water when necessary or applying non-toxic soil stabilizers on all unpaved access roads and parking areas. <p>Reduce exhaust emissions by implementing the following:</p> <ul style="list-style-type: none"> Advise drivers at the site to minimize vehicle idling time.

<i>Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> Properly tune all equipment and maintain them in good working conditions; and Properly plan the transportation of materials and ensure that vehicle fills are increased so as to reduce the number of trips done and the numbers of vehicles on the roads. Handle chemicals and other potential pollutants carefully and appropriately. Have a fully equipped first aid kit at the site at all times and ensure that trained first aid personnel are available to handle any incidents due to pollution at site. Provide all construction workers with personal protective equipment (PPE) including masks, goggles, scarfs, boots and overalls among other protective clothing as spelt out under section 101 (1) of OSHA, 2007. Reuse or recycle some materials which may be considered as waste or give them to people who may consider them useful for others uses.
Increased traffic flow	<ul style="list-style-type: none"> Provide for adequate space at the entrance/exit along the access road to give drivers enough room to manoeuvre into and out of the project site. Provide for adequate parking spaces at the site. Provide road signage to alert road users of the presence of the facility and check for in-coming or out-going vehicles. Properly plan transportation of materials to ensure that vehicle fills are increased in order to reduce the number of trips done or the number of vehicles on the road.
Potential damage or disturbance to private properties	<ul style="list-style-type: none"> The Contractor and its project contractors should inform their workers on the importance of respecting the locals' properties by not intruding or damage their homes, fences or killing their livestock. Any workers or site employees that will be found guilty of intruding peoples' privately owned properties should be called in for disciplinary hearing and/or dealt with as per their employer's code of employment conduct. Site workers should be advised to respect the community and local's private properties, values and norms. Site workers are not allowed to kill or in any way disturb local livestock. No worker should be allowed to, without permission cut down or damage trees belonging either to the neighbouring homestead or in the community.
Contamination of water resources	<ul style="list-style-type: none"> The treatment pond should be made as impermeable as practically possible in order to prevent possible contamination of ground water or shallow wells in the area. The sewer line will be regularly inspected and maintained in order to safeguard against sewer line blockages and bursts. Monitoring of the quality of effluent will be on a daily basis. Effluent quality analysis reports will be submitted to NEMA on a quarterly basis. Proper operation of the entire sewerage treatment system will be ensured and monitored for deviations to guarantee that effluent from the treatment pond meets the required standards. The water quality of the receiving streams will be monitored to check on changes on its quality. To prevent flooding into the ponds, a properly made embankment should be constructed around

<i>Impacts</i>	<i>Mitigation Measures</i>
	the ponds to prevent storm water mixing with sewer, since this may fill up the treatment ponds causing overflow.
Odour	<ul style="list-style-type: none"> • Ensure proper sizing and alignment of the lagoons. • Ensure scum is properly stabilized. • Plant a strip of fast-growing tree species around the ponds. • Desludging of the ponds should be carried out every 3-5 years.
Noise and vibrations, dust and exhaust gases and solid waste	<ul style="list-style-type: none"> • The proponent should prepare and submit to NEMA a decommissioning report three months before decommissioning takes place. • The use of the site or the building may be changed to other appropriate uses after renovation, rehabilitation and some structural changes have taken place. These uses may include change into a go-down, a restaurant or shops. • The decommissioning and alternative land-use options will be facilitated by appropriate professional personnel incorporating environmental experts; county government planners; public works officers and public health officers among others. • Since decommissioning may take long to be realized (say 50-100 years), the process shall follow the laws and regulation that will be in existence by that time.

The full report of the proposed project is available for inspection during working hours at:

- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED AYA LUXURY RESIDENCE TWIN
TOWER PROJECT ON PLOTS L.R. NOS. 209/3272 AND 209/3274
LOCATED IN KILELESHWA ESTATE, OFF OTHAYA ROAD,
NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above-proposed project.

The proponents, Adwaa Alkhalil Development Company Limited, Kileleshwa Place Limited, Fayaz Ahmed Khan and Abda Favaz Khan proposes to construct two blocks of eighteen storey each and with three lower ground levels. The project will comprise of two hundred and sixty, (260) unit of studio 1, 2, 3, 4, 5 and 6 bedroom units, parking bays and associated amenities and facilities on plots L.R. Nos. 209/3274 and 209/3272 located in Kileleshwa at the junction of Othaya Road and Makueni Road, in Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Potential Impacts</i>	<i>Mitigation Measures</i>
Noise and vibrations generation	<ul style="list-style-type: none"> • Apply for a License from NEMA whereby maximum permissible noise levels are to be exceeded. • Prescribe appropriate noise reduction measures e.g. restricted working hours and transport hours and noise buffering. • Install portable barriers to shield compressors and other small stationary equipment where necessary and locate stationary noise sources as far from existing sensitive receptors as possible. • Use quiet equipment (i.e. equipment designed with noise control elements such as mufflers). • Ensure use of well serviced vehicles and equipment. • Limit trucks and other small equipment to minimize idling time and switch off idle engines whenever possible.
Air pollution (dust and exhaust emissions)	<ul style="list-style-type: none"> • Provide 2.4-meter-high hoarding along site boundary. • Provide effective dust screen, sheeting or netting where a scaffolding is erected around the perimeter of the building under construction, from the ground floor level of the building up to the highest level of the scaffolding. • Water all active construction areas when necessary. • Cover all trucks hauling soil, sand and other loose materials or require all trucks to maintain at least two feet of freeboard. • Down wash of trucks tyres prior to departure from site. • Vehicle idling time shall be minimized.
Waste generation	<ul style="list-style-type: none"> • Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. • provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. • Use of building materials that have minimal packaging to avoid the generation of excessive packaging waste. • Use of construction materials containing recycled content when possible and in accordance with accepted standards. • Adequate collection and storage of waste on site and safe transportation to licensed disposal sites and disposal methods at designated area shall be provided.
Health and safety risks/hazards	<ul style="list-style-type: none"> • Enhance security by ensuring guards are posted around the project site and the

Potential Impacts Mitigation Measures

	strategic placement of security lights around the site.
	<ul style="list-style-type: none"> • A roster of all construction workers shall be kept. • Unattended public access to the construction site shall be restricted and only one entry/exit point shall be used. • Appropriate health and safety measures shall be implemented. • Warnings and signs should be placed in appropriate places. • Ensure safety education/training of the construction workers. • Appropriate Personal Protective Equipment shall be worn at all times by all within the construction site including visitors. • Install proper fire management equipment and emergency response systems/strategies.
Increased water demand	<ul style="list-style-type: none"> • Promote awareness on water conservation. • Install water meters where applicable. • Determine the monthly water consumption and its cost. • Identify activities and areas that cause high consumption. • Install water-saving devices in the appropriate places (flow regulators, water flow sensors, self-closing taps, low-flush toilets, etc.). • Regularly maintain plumbing fixtures and piping in order to avoid losses. • Replace defective seals and repair damage to water pipes.
Increased energy demand	<ul style="list-style-type: none"> • Identify and use areas/equipment/systems having minimum energy consumption. • Install energy efficient lighting in common areas such as staircases and driveways. • Use alternative energy e.g. solar power for water heating.
Traffic and obstruction along access road	<ul style="list-style-type: none"> • Ensure that the Entry/Exit to the project site is located where it will cause minimal traffic along adjacent roads. • Ensure all construction vehicles to and from the construction site use the designated Entry/Exit to the project site. • All transportation of construction raw materials and excavated materials are to be conducted at traffic off peak hours only. • Sensitize truck drivers to avoid unnecessary road obstruction. • Cover all trucks hauling soil, sand and other loose materials to avoid spillage and dust emissions that may interfere with smooth motoring.

The full report of the proposed project is available for inspection during working hours at:

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESIDENTIAL APARTMENTS
DEVELOPMENT ON PLOT L.R. NO. 1/811 (ORIGINAL NO.
1/470/2), ALONG GEORGE PADMORE ROAD, KILIMANI AREA,
NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above-proposed project.

The proponent, Padmore Residences Limited, proposes to develop a single residential block of three basements and ground floor for parking space and 16 floors with a total of 193 units (97 No. of one bedroom, 64 No. of two bedrooms, 32 No. of studio apartments) and other associated amenities and facilities on plot L.R. No. 1/811 (Original No. 1/470/2) along George Padmore Road in Kilimani, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

Soil disturbance	<ul style="list-style-type: none"> • Control earthworks and compact loose soils. • Install drainage structures properly. • Landscaping shall be done on project completion. • Control and manage excavation soils. • Control activities especially during rainy conditions. • Provide soil erosion control and conservation structures.
Changes in land use-extent	<ul style="list-style-type: none"> • Plant vegetation after project completion. • Ensure compliance with existing planning policy. • The project shall be approved by the relevant government bodies before commencement.
Changes in hydrology/impended drainage/deep excavations	<ul style="list-style-type: none"> • proper Installation of drainage structures. • Install cascades to break the impact of water flowing in the drains. • Ensure efficiency of drainage structures through proper design and maintenance. • Provide gratings to the drainage channels.

Environmental Impacts Mitigation Measures

- A geotechnical survey shall be conducted and the recommendations thereof followed. There shall be no blasting during excavation.
 - A methodology for excavation shall be generated as required by NCA prior to excavation.
- Air pollution**
- Enclose the site with dust-proof net during construction.
 - Water should be sprayed during the construction phase of excavated areas during dry conditions.
 - Control speed and operation of construction vehicles.
 - Prohibit idling of vehicles.
 - Ensure sound condition of construction machinery and equipment.
 - Engage sensitive construction workers.
- Noise pollution**
- Erect suitable barriers to control noise.
 - Sensitize drivers of construction machinery on effects of noise.
 - Maintain plant equipment (if present).
 - Construction activities to be restricted to daytime.
 - Workers in the vicinity of or involved in high-level noise to wear safety and protective gear.
- Water resources**
- Management of water usage.
 - Avoid unnecessary wastage.
 - Recycling of water at the construction phase where possible.
 - Make use of roof catchments to provide water i.e. for general purpose.
 - An alternative water source shall be provided. The proponent shall drill a borehole at the proposed site.
- Power sources**
- Power supply requirements shall be calculated and shared with KPLC as is the requirement. A dedicated transformer for the entire project shall be a consideration.
 - Alternative power sources (solar) shall also be installed for lighting and heating.
- Oil pollution**
- Proper storage, handling and disposal of new oil and used oil wastes as per waste regulations.
 - Provide oil interceptors along the drains leading from car park and potentially oil risk areas.
- Public health, occupational health and safety**
- Train staff/workers on occupational health and safety.
 - Provide full protective gear and workmen's compensation cover in addition to the right tools and operational instructions and manuals during construction.
 - Design of sewerage system should be as provided in the plans and should be constructed to approved size and design, standard and of approved materials.
 - Engage the services of qualified

Environmental Impacts Mitigation Measures

- personnel and/or ensure training.
- Ensure use of standard construction materials and to the specifications. Avoid undesirable, substandard, hazardous or unauthorized materials during construction and maintenance.
 - Sensitized staff on social/health issues such as drugs.
 - Post strategically the Occupational Safety and Health Act, 2007 Abstract.
 - Post clear warning signs e.g. 'No unauthorized use of machines', ensure there are guards on moving parts etc.
 - Provide fully equipped First Aid kits and train staff on its use.
 - The site will be registered by the ministry of labour as a workplace.
- Fire safety and preparedness**
- Conduct training on firefighting, evacuation and emergency response.
 - Sensitize the residents on fire risks i.e. conduct regular fire drills.
 - Adapt effective emergency response plans.
 - Maintain/service firefighting machinery regularly.
 - Provide emergency numbers at strategic points.
- Water quality and sewerage infrastructure**
- The design of the entire sewerage system should consider the estimate discharges from individual sources and the cumulative discharge of the entire project even during peak volumes.
 - Ensure effluents are discharged responsibly to the sewerage system.
 - The proponent shall seek approval from NWSC before connecting to the existing public mains
 - Monitor quality of wastewater to ensure compliance with the Environmental Management and Coordination (Water Quality) Regulations, 2006 and other relevant Laws.
- Waste management**
- During construction phase, designate an area for temporarily holding waste materials.
 - All wastes should be disposed of in accordance with the Environmental Management and Co-ordination (Waste Management) Regulations, 2006 and other relevant Laws.
 - Segregation of wastes at the source for ease of handling and disposal.
 - Contract a NEMA licensed waste transporter to transport solid waste from the proposed site during construction and occupation phases.
- Security and social impacts**
- Provide security guards, CCTV cameras and other security apparatus during the entire project cycle.
 - Construction work timings shall only in line with the NEMA licensing conditions.
- Traffic management**
- The proponent shall conduct a traffic Impact Assessment and generate a traffic

Environmental Impacts Mitigation Measures

management plan.

- The Traffic management plan shall be followed throughout the project cycle.

The full report of the proposed project is available for inspection during working hours at:

- (g) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or county Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or county Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or county Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.
