THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED KENYA SCHOOL OF
PROFESSIONAL STUDIES, INOORERO UNIVERSITY
CAMPUS ON L.R. KAJIADO/OLCHORO-ONYORE/7087,
7088, 7089, 7090, 7091, 7288 AND 2973 IN OLOOSEOS,
KISERIAN, KAJIADO NORTH DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Kenya School of Professional Studies, Inoorero University Campus.

The proposed project involves establishment of a university campus comprising of training facilities which will be structured in three schools. Other facilities will include an administration building, library, assembly hall, student centre, students' residences, staff residences, recreational facilities, mosque, chapel, amphitheatre, internal driveway, car parks, gatehouse and extension of service lines to the new units.

The project is located on a 70-acre piece of land on L.R. No. Kajiado/Olchoro-Onyore/7087, 7088, 7089, 7090, 7091, 7288 and 2973 in Olooseos, Kiserian, Kajiado North District.

The Projects anticipates the following impacts and mitigation measures:

Possible impact	Mitigation Measures
Soil erosion	<ul style="list-style-type: none"> Create and maintain soil traps and embankments. Adopt a landscaping scheme.
Visual Intrusion	<ul style="list-style-type: none"> On completion of the earth works the excavated or disturbed areas should be restored immediately especially through back filling, leveling and planting of

Possible impact

Mitigation Measures

suitable vegetation.

- All solid waste from the construction site should be cleared on completion and disposed suitably bin to the approved dumpsites.

- The project should be blended in a way to merge with the existing environment.

Flora and fauna

- Avoiding clearing the areas that will not be affected by the project.

- Replant trees once the construction activities have been completed.

- Employ gardeners to tend and care for the new trees, flowers, grass and hedges to be planted.

- Landscaping as proposed in the designs should be done by specialists.

- Reserve vegetation having conservation value and those along the boundary.

Oil leaks and spills

- All machinery should be keenly observed not to leak oils on the ground. This can be ensured through regular maintenance.

- Maintenance should be carried out in well-protected areas where oil and grease will be restrained from reaching the ground.

- Such areas should be covered to prevent storm from carrying away oils in to soils and water systems.

- All oils/ grease and materials should be stored in a sites store in the contractor's yard.

Noise pollution

- Use of serviced and greased equipment to reduce noise.

- Engines of trucks and other vehicles to be switched off when not in use.

- Construction workers and particularly those operating machines to be provided with ear mufflers.

- Maintain trees and other vegetation in the compounds to help screen off some of the traffic noise.

Public disturbance

- Construction activities should be done only during the day.

- Billboards should be suitably elected on the start of the project. The signs should indicate and inform the public when works start and when will be completed.

- Place 3 sign posts at strategic points to notify public of the development, one sign post at Magadi road, second at pipeline road and third at the site.

Health and safety

- To ensure health and safety of the workers, appropriate personal equipment should be used e.g. aprons, caps.

- Provide First aid kit on site.

- Adequate insurance to include fire, consequential loss and burglary to be provided

- Others include fidelity guarantee, money insurance, workmen's compensation, employees liability, public and product liability, Motor

<i>Possible impact</i>	<i>Mitigation Measures</i>
	Insurance and group personal accident
	<ul style="list-style-type: none"> Proponent to obtain certificates of occupation and Occupational Health and Safety from Council on completion of construction. After commissioning of the project, management to ensure all health and safety requirements for buildings e.g. fire exits and fire fighting equipment are installed. Fire extinguishers should be installed. Routine medical checks for the workers.
Dust/Air quality	<ul style="list-style-type: none"> Provide dust shields on buildings under construction. Water sprinkling of driveways to reduce dust emission during construction. Vehicles used in the construction should be in proper condition. Aged and non-serviced trucks should not be used.
Traffic	<ul style="list-style-type: none"> Put speed caution labels to avoid accidents. Where possible encourage the use of environmentally friendly fuels. Provide adequate parking facilities within the premises. Prohibit parking of construction vehicles along access Road. Firm to deploy adequate security personnel to guide traffic, parking and movement within the compound Provide separate vehicle entry and exits to the facility to improve traffic flow Install heavy truck turning signs at safe distances along pipeline road (during the construction period for transporting construction materials).
Waste management	<ul style="list-style-type: none"> Waste timber planks to be used as alternative sources of energy. Provide adequate sanitary facilities to construction workers. Use of an integrated solid waste management system through a hierarchy of options source reduction, recycling, composting and reuse and sanitary land filling will facilitate waste handling. Provide refuse waste bins at strategic points Recommend suitable disposal methods if contracting a third party to dispose off waste. Regular inspection and maintenance of the waste disposal systems

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF TOWN HOUSES ON L.R. NO. 209/12614 LAVINGTON, NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed development of town houses.

The proposed project will entail development of twenty-four bedroom houses for residential purposes. The project is located at L.R. No. 209/12614 at the end of Covenant Drive in Lavington, Nairobi.

The Projects anticipates the following impacts and mitigation measures:

<i>Possible impact</i>	<i>Mitigation Measures</i>
Traffic	<ul style="list-style-type: none"> Using appropriate signage to control the flow of traffic to and from the site. Signs will need to be conspicuously placed at the entrance to the Convent Drive. Ensuring drivers abide by traffic rules and defined speed limits. Implementing a regular maintenance programme on vehicles to reduce emissions and noise. Supervised driver working hours to prevent accidents due to fatigue. Road safety training for drivers.
Waste management	<ul style="list-style-type: none"> Segregating waste by separating hazardous waste from non-hazardous waste for appropriate disposal. Providing adequate number of suitable solid waste containers. Containers or package for storing hazardous waste including used oil to be securely banded and labelled. Contracting NEMA licensed waste transporter to collect solid waste from the site for dumping at an approved site. Contracting a NEMA licensed waste oil recycler for collecting used oil from the site for recycling.

Possible impact *Mitigation Measures*

- Accumulating scrap metals in a safe place and contracting a scrap metal dealer with a valid license from NEMA for appropriate disposal.

- Providing adequate number of sanitary facilities for the workers and visitors to the site.
 - Minimizing waste generated by adopting cleaner production methods such as conserving raw materials, enabling the recovery and re-use of the waste product where possible.
- Health and safety
- Maintaining a standard first aid kit at the site office.
 - Providing staff with appropriate personal protective equipment including gloves, helmets, coverall, safety boots, safety goggles, ear muff and respirators.
 - Providing scaffolds for construction at high level.
 - Maintaining a complaints register on site.
 - Documenting and displaying on site emergency procedures.
 - Using appropriate signage to direct and control flow of traffic.
 - Ensuring machine operators and drivers abide by traffic rules and defined speed limits.
 - Using water sprays on all earth work areas to minimise dust generation.
 - Maintaining and servicing all construction machinery in accordance with the manufacturers specifications.
- Waste water
- The proponent should ensure that all the houses are properly connected to the sewer to prevent further pollution of the river.
- Destruction of the physical environment and the river
- Maintain riparian reserve.
 - Landscaping and planting of tree belts to prevent soil erosion.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED HOUSING SCHEME ON L.R. NO.15023 ATHI RIVER

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Housing Scheme in Athi River, Mavoko.

The proposed housing scheme will consist of 196 housing units and will comprise 148 semi-detached and 48 detached housing units.

The main features of the proposed project are as follows:

- Landscaping, recreation parks and riparian reserve protection.
- Access roads, carriageways and surface water drainage system.
- Construction of water and swimming pools.
- Foul sewer drainage and waste water treatment systems (sewer treatment plant).
- Drilling water borehole and domestic water supply systems (plus elevated and underground water tanks).

The project anticipates the following impact and mitigation measures:

Possible Impacts	Mitigation Measures
Increased storm water runoff	<ul style="list-style-type: none"> • The contractor must ensure that storm water run off is correctly managed to avoid increased volumes and velocity by minimizing exposed areas, use diversion channels to protect open spaces, and vegetate all disturbed and open areas. • Sensitize all the residents on the need to conserve water and to pump adequate borehole water to meet the needs of all tenants. • Filters should be added to all storm water inlets, and silt fences established where erosion is predicted.
Solid waste generation	<ul style="list-style-type: none"> • The estate management to ensure that solid waste generation is minimized and managed in an environmentally safer manner by keeping compound clean. • Ensure litter patrol twice a week. • Collect, remove and dispose off in a safer manner.
Occupational health and safety	<ul style="list-style-type: none"> • Install automatic fire alarm systems. • Provide fire reserve water storage facilities. • Provide booster pumps for horse reel. • Place fire-fighting equipment strategically in the estate. • Arrange regular drills for the tenants for possible emergencies. • Ensure that all vehicles are under the control of competent personnel. • Provide adequate facilities to treat staff emergencies. • All necessary safety regulations must be abided by including building codes and fire practice requirements.
Noise and pollution	<ul style="list-style-type: none"> • The planning of construction activities (Constriction site) must endeavour to minimize the noise impact on adjacent communities. • In this regard, vehicles should idle as little as possible, construction schedule times must be encouraged to keep noise to a minimum on site. • Tenants must use road worthy vehicles only.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> • Service vehicles regularly. • Erect signage for “No Hooting” and also for “speed limit 5 km./hr.” at the entrance to the estate. • All generators and heavy duty equipment is to be insulated and/or placed within buildings to minimize the ambient noise levels.
The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED SUGAR FACTORY IN
MSABWENI DISTRICT
INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed sugar factory by Kwale International Sugar Company Limited.

The proposed project involves established of a large sugar cane growing estates; and construct of a sugar processing factory. The company intends to implement the project in two phases. Phase 1 of the project will have initial crushing capacity of 300 tons of cane per day (TCD). In phase 2 it will be expanded to crush 5000 tons of cane per day.

The factory will be located in Ramisi Sub-location, Kingwede Location, Msambweni District whereas the “nucleus” cane growing area straddles Msambweni, Lunga Lunga and Diani Divisions of Msambweni District. The total size of the “nucleus” cane growing area is approximately 15,000 acres.

The project anticipates the following impacts and mitigation measures:

<i>Possible impacts</i>	<i>Mitigation measures</i>
Soils	<ul style="list-style-type: none"> • Clearing of vegetation in the remaining 30% of uncleared nuclear estate land should be done with consideration to leaving natural vegetation buffer strips of at least 2m on either side of natural drainages and retention of trees that will not obstruct future farming activities.
<i>Possible impacts</i>	<i>Mitigation measures</i>
	<ul style="list-style-type: none"> • The choice of fertilizers used in the seed-cane nursery and pilot cane areas should be informed by assessment of soil properties in the area.

Air quality	<ul style="list-style-type: none"> • Areas where soils are susceptible to wind erosion should be protected by allowing for perimeter vegetation buffer strips. • Regular monitoring of agricultural return flows at strategic points along river/stream courses, particular where there are chemistry-sensitive aquatic ecosystems such as wetlands and mangroves. • Put in place natural vegetation buffer strips of at least 2m on either side of natural drainages and along the perimeter of the cane farm plots. • The choice of fertilizers used in the seed-cane nursery and cane growing areas should be informed by assessment of the soil properties and condition in the area. • Incorporate soil organic matter into the soil to improve soil structure every planting time. • Appropriate ventilation all working areas will be necessary. • Suitable exhaust hoods will improve ventilation. • Workers shall wear nose dust masks in working areas where the dust levels will be significantly high. • Wet scrubbers will be necessary for the removal of dust and other gaseous pollutants from boiler emissions. • Potential leakages of sulphur dioxide at the syrup sulphitation shall be eliminated. • The proponent will develop a bagasse handling management plan to manage bagasse supply and demand to the boilers and to ensure bagasse quality is maintained during storage. • The proponent will undertake to repair leakages in bagasse and bagacillo chutes to reduce dust releases. • All trucked materials will be covered during transport. • Personnel working directly with dust-generating materials will be provided personal protective equipment and training. • Speed limits for vehicles to be set particularly in dry seasons.
Surface and resources	<ul style="list-style-type: none"> • Ensure provision of drainage channels as much as is possible. • Construction and maintenance of silt traps around the factory construction area. • Controlling soil erosion at source as much as possible. • Prompt re-vegetation with grasses, shrub and trees.
<i>Possible impacts</i>	<i>Mitigation measures</i>
	<ul style="list-style-type: none"> • Minimize cleared area as much as possible. • Manage and maintain overland drainage control.

	<ul style="list-style-type: none"> Undertake a regular water quality monitoring program of River Ramisi and other surface water bodies in the general locality of the factory. 		<ul style="list-style-type: none"> The proponent will conduct regular visual inspection of hazardous materials storage areas, including aboveground tanks.
Ground water resources	<ul style="list-style-type: none"> Cover all material stockpiles with tarpaulin to reduce contact with precipitation, ensure they are laid on impervious surfaces, and ensure that the leachates are entrained in drainages leading to the effluent treatment plant. Ensure that stockpiling areas are above and sufficiently separated (depth wise) from the groundwater table. The proponent will develop a spill prevention plan. The proponent will prepare and implement chemical handling and storage procedures and train employees on their use. The proponent will ensure that chemical containers are labeled and documentation regarding safe handling or first aid measures the proponent will make spill clean-up equipment readily available in chemical storage areas. The proponent will construct concrete berm around areas where liquids are stored to contain any spillage. Work will be monitored during construction to ensure that there are no releases of deleterious substances. 	<ul style="list-style-type: none"> The proponent will ensure that chemical containers are labeled and documentation regarding safe handling or first aid measures. The proponent will ensure that chemical containers are stored in a safe fashion in a designated storage area. Oil-absorbent material, tarps, and storage drums will be used to contain and control any minor releases of engine and other equipment oil. 	<ul style="list-style-type: none"> Due to its high cost of installation, the drip irrigation system should be installed in phases to replace the sprinkler irrigation system which will be used initially in the nucleus estate. Avoid central pivot irrigation systems as these are not efficient with respect to water conservation Irrigate during late evening and early morning to avoid high evaporative losses that occur during daytime
Effluents	<ul style="list-style-type: none"> The proponent will undertake to design and build a wastewater treatment system. During operations of the factory the proponent will undertake efficient water use and recycling as well as implement an efficient water treatment plant in order to minimize the wastewater generated. Encourage water re-use and/or conservation. Liquid effluent should be treated before discharge, passed through a number of ponds and the last pond should have fish breeding, after which the liquid effluent is discharged either in a river or in the ocean. Hazards and toxic waste material should be managed according to international protocols and practices and comply with local regulations as well. Disposal of human excrement would be through construction of septic pits and/or pit latrines. Construct a wastewater treatment plant to treat both factory effluent and domestic sewage to produce an effluent whose characteristics meet the World Bank guidelines. 	<ul style="list-style-type: none"> Water sharing, supply and demand management 	<ul style="list-style-type: none"> Avoid clearing/altering any land unless necessary; if unavoidable, use best practices that minimize disturbance of the land resources, flora and fauna. Ensure that equipment are in perfect working order and cause less noise/air pollution nuisance to fauna Where irrigation is used, employ more water efficient systems in order to conserve water required to support the dependent ecosystems. KISCOL should come up with clear measures to protect the nearby forests such as Buda Forest. The sugar zones should be surrounded by planted trees. Trees should be planted on either sides of the roads in the factory and farming grounds.
Accidental spills	<ul style="list-style-type: none"> The proponent will develop both a spill prevention plan and an accident emergency response plan. 	<ul style="list-style-type: none"> Terrestrial environment 	<ul style="list-style-type: none"> Terrestrial environment

These organizations include Kenya police, KWS and the local authority. • A comprehensive assessment should be undertaken to determine the water demand for various users in the area prior to any damming along rivers in the project area. • Unskilled labour should be sourced from the project area. There should also be an equitable distribution preferably by use of administrative regions such as locations for the available slots.
Noise and vibrations	<ul style="list-style-type: none"> • Installation of portable barriers to shield compressors and other small stationary equipment as may be necessary. • Use equipment designed with noise control elements, preferably silencers • Direct equipment exhaust stacks and vents away from buildings, when feasible or channel such exhausts through rock mufflers to reduce the noise levels significantly • Route truck traffic away from noise sensitive areas, where feasible • Co-ordinate with relevant agencies regarding all substation construction activities in residential areas • Install sound barriers for pile driving activity • Compulsory wearing of protective ear masks or ear plugs in factory. 		
Archaeological, historical and cultural sites	<ul style="list-style-type: none"> • The proponent should work closely with the local community leaders and the National Museums of Kenya order to ensure that the sites are not interfered within any way. • The proponent should sensitize his workers to appraise themselves with the protected forests in order to avoid any form of degradation. • The proponent should consider assisting the local communities and other agencies involved in preservation activities in the area.

Solid waste and waste oils	<ul style="list-style-type: none"> • It will be an express condition of the contract that before the contractor is issued with a completion certificate; he will clear the site of all debris and restore it to a State acceptable by the supervising engineer and environmental 		<ul style="list-style-type: none"> • During operations the company should not fence off the plantations in order to allow free movement of livestock to pasture area and watering points like the Koromojo dam.

- The proponent should have a swift transition phase after the clearing of vegetation and trees to sugar cane plantations.
- The company should encourage basic life education and sensitization programmes to its employees during project operation.
- The company should liaise with the provincial administration and police department to provide adequate security during operation.
- The company should consider compensating for lost property the families that were affected during relocation of squatter from the former Ramisi land.
- The proponent should construct fire breaks between the plantations and private land.
- KISCOL, in consultation with the local administration and community elders, should discuss and agree on free throughway routes for humans and livestock to minimize disruption on communication.

Economic impacts

- The proponent should support poor farmers willing to produce sugar cane with start up capital in terms of seeds, fertilizer, farm machinery and labour.
- The company should employ non-skilled labour force from the local communities.
- Local leaders particularly those of Out grower groups should be involved in the project cycle throughout.
- The company should also encourage related companies particularly financial services companies and agricultural based industries to venture into the area.

Occupation, health and safety

- Worker health and safety should be assured through the development and implementation of standard workplace practices and the company HSE/OHS policies.
- Training and licensing industrial vehicle operators in the safe operation of specialized vehicles such as forklifts, including safe loading/unloading, load limits and ensure that drivers undergo medical surveillance.
- Sanitary facilities shall be provided and cleanliness shall be ensured as per set company's health standards.
- Safety awareness on machinery use will be created through training and regular safety meetings held.
- The company should ensure that it has adequate fire fighting equipment and engines available and trained personnel to man the equipment.
- The proponent proposes to have a dispensary within the project site area.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
