## THE PHYSICAL PLANNING ACT

(Cap. 286)

## DECLARATION OF MUKURU KWA NJENGA, MUKURU KWA REUBEN AND VIWANDANI AS A SPECIAL PLANNING AREA

NOTICE is given that the County Executive Committee Member for Lands and Urban Planning pursuant to section 23(1), (2), and (3) of the Physical Planning Act, declares all that area of land measuring approximately 550 acres covering the informal settlements of Mukuru Kwa Njenga, Mukuru Kwa Reuben and Viwandani within Imara Daima, Kwa Njenga, Kwa Reuben, Nairobi South and Viwandani Wards, all within Starehe, Makadara and Embakasi South sub-counties as a Special Planning Area.

Consequently, there shall be no more developments (approved or otherwise) in the aforementioned areas.

Developments are hereby suspended for a period of not more than two (2) years from the date of this notice.

The declaration of the special planning area shall not affect development permission if the development in respect of which the permission is granted has been commenced not less than six months before the suspension of development in the special planning area.

This declaration is also intended to notify the public of the intention of the Nairobi County Government to initiate a participatory process to develop a Physical Development Plan for the area.

The developments referred to in this notice include—

- (a) the making of any material change in the use or density of any buildings or land or the subdivision of any land which for the purpose of the Physical Planning Act is classified as Class “A” development;
- (b) the erection of such buildings or works and the carrying out of such building operations as the County Executive Member may from time to time determine which for purposes of the Physical Planning Act is classified as class “B” development.

The following shall not constitute development under this notice:

- (a) The carrying out of works for the maintenance or improvement or other alteration, of or addition to, any building where such alteration or addition does not exceed 10 per cent of the floor area of the building measured.
- (b) The carrying out by a competent authority of any works required for the construction, maintenance or improvement of a road, if the works are carried out on land within the road reserves.
- (c) The carrying out by the Nairobi City County Government or any statutory body of any works for the purpose of inspecting, repairing or renewing any sewers, mains, pipes, cables or other apparatus, including breaking-open of any street for that purpose and the installation of services by the Nairobi City County Government or any statutory body.

A map of the affected area will be posted at the precincts of the county government offices at City Hall, the offices of the Ward

Administrators of the respective wards and on the Nairobi City County official website

For further clarification on this matter, interested persons may consult the office of the Chief Officer, Urban Planning at City Hall, 5th Floor during official working hours.

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT  
AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN  
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED REHABILITATION OF NAKURU–  
LORUK–MARICH PASS ROAD (B4) TRAVERSING THROUGH  
NAKURU, BARINGO, ELGEYO MARAKWET AND WEST  
POKOT COUNTIES

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya National Highway Authority, is proposing to rehabilitate Nakuru–Loruk–Marich Pass Road (B4) that transverse through Nakuru, Baringo, Elgeyo Marakwet and West Pokot counties. The Project Road starts in Nakuru and ends at the Junction with the A1 Road in Marich Pass. It is approximately 270 km in length. The main design elements include: A dual carriageway section in Nakuru, specifically from the Junction with the A104 (Showground Road) to about 15 kilometres (km) or 28 km from the start, depending on the Economic Feasibility Study; A Single Carriageway to Marich Pass; Level junctions and interchanges; Turning facilities on the dual carriageway section (roundabouts and U turns); Non-motorised traffic lanes, where required and possible; Turn-off lanes where required; An axle load control station in Loruk; Bus-bays along the entire Road; Parking lanes in Marigat and Tot; Truck bays in Tot, Loruk and Sigor; Road furniture including pedestrian bridges, street lighting and traffic calming measures; Drainage structures such as bridges, culverts and side-drainage; and Bypasses in Chesegeon and Sigor areas.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Impacts on flora	<ul style="list-style-type: none"> <li>After the construction phase, allow regeneration of vegetation along the Project Road.</li> <li>Limit vegetation clearance to areas within the Project footprint.</li> <li>Maintain a count of all trees removed for compensation purposes at end of the Project and this should cover the material sites.</li> <li>Landscaping as part of the restoration programme that also covers the material sites.</li> <li>Prepare a tree planting programme as part of the Project completion activities.</li> </ul>

Material sites and borrow pits	<ul style="list-style-type: none"> <li>All access routes to material sites should be planned ahead of construction.</li> <li>Develop a rehabilitation/ reinstatement plan for the borrow pits.</li> <li>Haulage routes should be maintained by watering to minimize the impact of dust.</li> <li>Contracts with the landowners should be signed before excavation begins which include terms and conditions for payment, the area of land to be excavated, and the rehabilitation measures to be carried out on the gravel sites, if required.</li> <li>The contract documents should instruct the contractor to construct and maintain fences and rehabilitate after use.</li> <li>Material sites areas must be excavated should be cordoned off.</li> <li>Gravel pits must be landscaped then reinstated or backfilled with overburden if the depth of the overburden is sufficient to allow for this.</li> <li>Ensure separate stockpiles for overburden and gravel.</li> <li>Landowners should be informed of the environmental implications of the excavation works at the time of identification of the gravel pits.</li> </ul>
Water quality	<ul style="list-style-type: none"> <li>Regularly maintain Project equipment to avoid leaks and spills.</li> <li>Do not undertake maintenance near a water source.</li> <li>Minimize Project activities at river crossing points.</li> <li>Do not dump earth/waste material into a River or Land.</li> <li>Locate camp sites, waste disposal and spoil dumping areas away from water sources.</li> <li>Adherence to Water Quality Regulations of 2006.</li> </ul>
Reduction in water availability	<ul style="list-style-type: none"> <li>Select water abstraction points based on a hydrology study.</li> <li>Obtain permits from WRMA prior to water abstraction and observe the conditions therein.</li> <li>Avoid abstracting water from points used by the local community members.</li> <li>Only extract the water quantities that are needed to meet the Project requirements.</li> <li>Schedule the water abstraction activities to avoid the times of the day when the affected community members need it more.</li> <li>Install water storage tanks especially at worker's camps to store water for future.</li> </ul>
Impacts on soils	<ul style="list-style-type: none"> <li>Integrate drainage system in the overall road planning and construction to align it to the natural drainage system as much as possible.</li> <li>Harmonize drainage with all point sources of surface runoff.</li> <li>The design of all the culverts should be informed by hydrological studies.</li> <li>Drainage outfalls should not be directed into private land.</li> <li>Ensure protection of soil adjacent to the side drains and the constructed drainage.</li> </ul>

	<ul style="list-style-type: none"> <li>• Construct appropriate drainage trenches along the Project Road.</li> <li>• Identify appropriate areas for the dumping of earth material especially the one cut along steep slopes.</li> <li>• Plant indigenous trees along the Project Road.</li> <li>• Spoil arising from the urban sections should be assessed to determine if it is contaminated. If contaminated it should be handled as hazardous materials and disposed-off under supervision and into controlled dumping areas.</li> <li>• Spoil should not be dumped or accumulated near the surface drains or water ways.</li> <li>• The drainage outfalls should be properly constructed to reduce the erosion from surface runoff and storm water.</li> </ul>	
Air quality	<ul style="list-style-type: none"> <li>• Constantly water the construction sections and dry materials piles to keep dust low throughout the Project Area.</li> <li>• Cover all the trucks delivering construction materials such as gravel.</li> <li>• Issue all the Project workers appropriate PPE.</li> <li>• Dust suppression measures including a watering programme should be implemented during the construction phase.</li> <li>• Traffic management measures for construction vehicles.</li> <li>• Dust control measures at the quarry sites and aggregate crushing sites.</li> <li>• Dust control at spoil dumping locations.</li> <li>• Maintain all the construction equipment and vehicles as per the manufacturers' instruction to avoid unnecessary emissions of excess exhaust gases.</li> <li>• Prevent unnecessary idling of project equipment and vehicles.</li> <li>• Adherence to Air Quality Regulations, 2014.</li> </ul>	<p>Wastes and effluents</p> <ul style="list-style-type: none"> <li>• Avoid idling of Project vehicles and equipment when not in use unnecessary hooting and unnecessary noise from the construction crew.</li> <li>• Limited blasting for hard stone from quarries shall only be done after approval by the relevant authorities following effective public consultation.</li> <li>• Adherence to Noise And Excessive Vibration Pollution (Control) Regulations, 2009.</li> <li>• Preparation and implementation of a Waste Management Plan (WMP).</li> <li>• Spoil generated should be disposed of on pre-identified and approved locations.</li> <li>• Trucks and construction vehicles be serviced off site at designated and approved servicing locations.</li> <li>• The use, storage, transport and disposal of hazardous materials used for the project will be carried out in accordance with all applicable Kenyan regulations and MSDS</li> <li>• The Contractor must supply temporary ablution facilities and be responsible for the treatment and/or removal of sewage wastes off site.</li> <li>• The Contractor will also be required to ensure that the contracting company is accredited and has the necessary permits to remove sewage waste.</li> <li>• The sewage will be treated in accordance with the applicable laws</li> <li>• All construction camp sites shall have waste management plans and provided with appropriate waste handling equipment</li> <li>• Construction camp management to provide an inventory of waste and an acceptable WM</li> <li>• Adherence to Waste Management Regulations, 2006.</li> </ul>
Noise and vibration	<ul style="list-style-type: none"> <li>• Limit construction activities to day time hours only.</li> <li>• Share the construction schedule with all the affected stakeholders.</li> <li>• Inform the neighboring communities of any unusual construction activities with extraordinary noise levels including time, expected duration and any safety precautions.</li> <li>• Develop blasting procedures and implement them. This should include communicating the planned blasting activities to the affected stakeholders.</li> <li>• Undertake structural integrity assessment of existing structures along the Project Road as control for damages from vibrations during construction.</li> <li>• Utilize low noise machinery for the construction to the extent possible (Noise levels be below 35dBA to the nearest receptors by day).</li> <li>• Regularly maintain Project equipment and machinery during the construction to avoid unnecessary noise generation.</li> <li>• Provide all construction workers with relevant PPE at all times while at work and enforce application.</li> </ul>	<p>Impact on disease transmission</p> <ul style="list-style-type: none"> <li>• Develop and implement a HIV/AIDS/ policy and an information document for all workers directly related to the Project.</li> <li>• Establish wellness centers including VCT and ARV centers at strategic locations of the Project corridor.</li> <li>• Make condoms available to employees and all contractor workers.</li> <li>• The Worker Code of Conduct for all Project personnel should include guidelines on worker-worker interactions, worker-community interactions and development of personal relationships with members of the local communities.</li> <li>• Forbid all Project personnel as well as the Contractor staff from engaging in illegal activities including the use of commercial sex workers and transactional sex.</li> <li>• If workers are found to be in contravention of the Code of Conduct, they will face disciplinary procedures that could result in dismissal.</li> <li>• Implement measures to reduce the presence of standing water onsite.</li> <li>• Provide insecticide-impregnated bed</li> </ul>

- nets for workers that have been provided accommodation.
- Traffic impacts**
- Develop and implement a Traffic Management Plan.
  - Develop and implement a community grievance procedure.
  - Arrangements and routes for abnormal loads should be agreed in advanced with the relevant authorities.
  - Require Project drivers to be trained in defensive driving within the previous 3 years.
  - All vehicles used for the project should be regularly serviced and maintained.
  - Speed limits (of less than 30 km/h) should be adhered to on the Project Site.
  - Undertake consultation with communities along key transport routes to inform them about the potential for increased traffic movements prior to any changes.
  - Establish grievance procedures whereby any complaints by neighbours or affected parties are recorded and responded to.
- Insecurity**
- Employment should also be equal between the local communities, especially between the Pokot and Marakwet tribes to avoid any conflict within the Project Area.
  - Develop a security plan to protect the Project equipment and workers.
  - Undertake engagement and consultation, with the local stakeholders, in line with the SEP.
  - An Emergency Preparedness and Response Plan should be prepared and implemented.
- Land acquisition and resettlement**
- Conduct a RAP to minimize the adverse social impacts of the Project Road.
  - Village elders be involved in the process of identifying land owners since the areas have not been adjudicated.
  - Land Values should be guided by the relevant departments in the Ministry of Lands and County officers; these rates should be agreed by all parties concerned before engaging the community.
  - The RAP should be done in a timely manner to avoid opportunist who can derail the process. Resettlement and compensation may attract people due to opportunities and these may in turn increase population along the road.
  - The Proponent should work with the local leaders to establish a community grievance mechanism. Issues should be solved before work continues to avoid conflict.
  - As the value of land along the developments will increase soon, so the valuation and costing of the land along the wayleave during expansion should be done diligently.
  - No compensation for encroachment for assets.

The full report of the proposed project is available for inspection during working hours at:

### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED EXPANSION OF SUGAR PLANT CRUSHING CAPACITY FROM 1500 TCD TO 5000 TCD, ON PLOT L. R. NO. WEST NYOKAL/KANYIKELA/1511 AND 1512, AT SUKARI INDUSTRIES LIMITED, NDHIWA IN HOMABAY COUNTY

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Sukari Industries Limited, is proposing to expand its sugar plant crushing capacity from 1500 Tcd to 5000 Tcd, on Plot L. R. No. West Nyokal/Kanyikela/1511 and 1512, at Sukari Industries Limited, Ndhiwa, in Homabay County. The primary objective of this Project is to install equipment and machinery that will increase the plants crushing capacity from 1500 tcd to 5000 tcd (tons of sugar cane crushed per day). This technologically upgraded machinery will reduce waste generation, reduce energy consumption, improve conversion efficiency, produce better quality product, increase sustainability and help farming community to improve economy being added to sell their product in time.

The following are the anticipated impacts and proposed mitigation measures:

#### Impacts

Extraction of raw material

#### Proposed Mitigation Measures

- Source material from supplies that use environmentally friendly processes in their operation.
- Ensure accurate budgeting and estimation of actual construction material requirement to ensure that the least amount of material necessary is ordered.
- Ensure that damage or loss of material at construction site is kept minimal through proper storage.
- Use at least 5%-10% recycled, refurbished, or salvaged materials to reduce the use of raw material and divert material from land fill.

	<ul style="list-style-type: none"> <li>• WRMA permit to be obtained if water abstraction is done.</li> <li>• The tender documents should specify required standards and certification for procurement of all materials and appliances.</li> <li>• Steel scaffolding should be used in preference to timber and the Contractor should ensure that sufficient quantities of scaffolding are available for hire at the time of construction.</li> <li>• All construction materials should be from approved sources; for example hard stone for building should be obtained from bona fide commercial quarries.</li> </ul>	
Clearing of vegetation	<ul style="list-style-type: none"> <li>• Proper demarcation and delineation of the project site to be affected by construction work.</li> <li>• Specify location for trucks and equipment, and areas of the site which should be kept free from traffic, equipment and storage.</li> <li>• Designate access route within the site</li> <li>• Design and implement an appropriate landscaping program to help in revegetation of part of the project site after construction.</li> <li>• Protecting the existing vegetation as much as possible</li> <li>• Set a replanting and landscaping programme that focuses on increasing "green area".</li> </ul>	
Sewage and effluent	<ul style="list-style-type: none"> <li>• Provide adequate sanitary facilities for workers,</li> <li>• Provide solid waste receptacles and storage containers, particularly for the disposal of plastic bags boxes, so as not to block drainage system and to prevent littering of the site.</li> </ul>	
Construction materials	<ul style="list-style-type: none"> <li>• Through accurate estimation of quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials.</li> <li>• Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed off.</li> <li>• Ensure that damaged or wasted materials including cabinet, doors, plumbing, and lighting fixtures, marble and glasses will be recovered for refurbishing and use in other projects reducing the amount of construction waste generated over time.</li> <li>• Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements.</li> <li>• Purchase of perishable construction materials such as paints should be done incrementally to ensure reduced spoilage of unused materials.</li> <li>• Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste.</li> <li>• Dispose waste more responsibly by dumping at designated dumping sites or landfills only; the use of a NEMA registered waste disposal company is</li> </ul>	
		encouraged.
	Dust emission	<ul style="list-style-type: none"> <li>• Sprinkle water on graded access routes each day to reduce dust generation by construction vehicles.</li> <li>• Controlling the speed of vehicles on the site.</li> <li>• Watering open soil or storage sites.</li> <li>• Selecting transportation routes.</li> <li>• Provide worker with dust masks.</li> <li>• Strict adherence to Air quality Regulations, 2014.</li> </ul>
	Soil erosion	<ul style="list-style-type: none"> <li>• Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.</li> <li>• Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site.</li> <li>• Ensure that any compacted areas are ripped to reduce run-off Storm water drainage lines be well constructed to reduce incidence of pounding and flooding.</li> </ul>
	Noise and vibration	<ul style="list-style-type: none"> <li>• Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, schools, residential areas and hospitals.</li> <li>• Sensitize construction vehicle drivers and machinery operators to switch of vehicle or machinery not being used.</li> <li>• Ensure that all heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.</li> <li>• Measure to ensure that noise levels does not exceed 75dB(A).</li> <li>• Attenuation of any sound that may affect the inner ear by use of earplugs and earmuffs.</li> <li>• Adherence to Noise And Excessive Vibration Pollution (Control) Regulations, 2009.</li> </ul>
	Water consumption	<ul style="list-style-type: none"> <li>• Prompt reuse and recycling of water as much as possible where necessary.</li> <li>• Install a discharge meter at water outlet to monitor and determine total water usage.</li> <li>• Monitor water consumption and utilization.</li> <li>• Sensitize construction workers on the importance of proper water Management.</li> <li>• All wastewater should be drained into approved drainage facilities</li> <li>• Adherence to Water Quality Regulations, 2006.</li> </ul>
	Construction traffic	<ul style="list-style-type: none"> <li>• The contractor should plan itineraries for site traffic.</li> <li>• Issue notices/advisories of pending traffic inconveniences and solicit tolerance by commuters before the commencement of construction works.</li> <li>• Assign traffic regulators to places during periods of chronic or potential traffic congestions.</li> <li>• Prepare and provide appropriate signage and trained flag persons where the movement of heavy machinery and</li> </ul>

- Occupational health and safety
- construction equipment may cross the main roads.
  - Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place.
  - Develop, document and display prominently an appropriate SHE policy for construction works.
  - Suitable overalls, safety footwear, dust masks, gas masks, respirators, gloves, ear protection equipment etc should be made available and construction personnel must be trained on their use.
  - Well stocked first aid box which is easily available and Accessible should be provided within the premises.
  - Provision must be made for persons to be trained in first aid, with a certificate issued by a recognized body.
  - Comply with the provisions of OSHA 2007.

**IMPORTANT NOTICE TO SUBSCRIBERS TO  
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition. of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

*Kenya Gazette*

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
