THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED REHABILITATION AND EXPANSION OF BURA IRRIGATION AND SETTLEMENT SCHEME IN TANA RIVER COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent, National Irrigation Board, is proposing to rehabilitate and expand the Bura Irrigation and Settlement Scheme in Tana River County, located some 200 km. North of the mouth of the Tana River. The main activities will involve rehabilitation of the scheme major components, which comprises: Irrigation of water supply which includes a water diversion (intake) channel from Tana River at Kora Kora (for gravity water supply to the scheme), sedimentation basin, river bank protection works using gabions, access roads, construction of water drops, farms clearing, conveyance system; (construction of a new main canal from Korakora to Nanigi—26.2 km) and rehabilitation of the existing main canal to Masabubu (57 km.) distribution system; (rehabilitation of secondary canals (57 km) and tertiary canals 140 km) night storage reservoirs; drainage networks; rehabilitation of existing buildings and workshops; rehabilitation of road network.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impact</i>	<i>Proposed Mitigation Measures</i>
Loss of land and source of livelihoods	<ul style="list-style-type: none"> A RAP expert was engaged to assess the People affected by the Project and work out Modalities on compensation mechanisms.
The canal has passed in the middle of a village settlement	<ul style="list-style-type: none"> The PAPs have been compensated for loss of land and structures like houses
Lack of direct benefit to the community where the canal is passing	<ul style="list-style-type: none"> Community members will be allowed to use Pumps to draw irrigation water from the canal. The locals should provide labour in digging the canal.
During the excavation and construction of the canal, there is interruption of transport and blocking of corridors and paths through which livestock and people access river respectively	<ul style="list-style-type: none"> The community members should also be given shambas along the canal. Construction of bridges/crossings every 100m to 500m to facilitate human and livestock access to water during and after canal excavation. The bridges should be put up in such a way that every livestock corridor has a bridge.
Children and animals falling in the canal and	<ul style="list-style-type: none"> People and livestock should use the designated crossing areas.

getting injured or even drowning															
Deforestation through clearing of natural forest and other vegetation along the canal passage leading to loss of important indigenous species of trees	<ul style="list-style-type: none"> Re-forestation and protection of indigenous plant species; where possible trees should be spared during the clearing process. The project should set sites for woodlots and also incorporate agro-forestry as an enterprise. 														
Diversion of water in laghas to canals leading to drainage of laghas and lack of irrigation water in farms during the wet season	<ul style="list-style-type: none"> The Laghas should not be drained. Culverts should be used to channel canal water under the laghas closings while the laghas water should flow over the canal. 														
Inadequate water for target users at the tail end of the canal	<ul style="list-style-type: none"> The design should ensure equitable water sharing to ensure a regular water flow to all the locations. The locals should be provided with water tanks where possible and a borehole in the area that is not in use should be renovated for their use. 														
Displacement of people especially the vulnerable groups (young, elderly, widows, the poor and the physically challenged) and Involuntary settlements	<ul style="list-style-type: none"> A Resettlement Action Plan has been developed whereby all the people affected by the Project have been identified and their assets assessed by a RAP expert. The assets affected and mode of compensation has been worked out and the affected people compensated. 														
Water logging	<ul style="list-style-type: none"> Set up irrigation management teams (WUAs) to maintain the irrigation and drainage system. Capacity building of irrigation farmers on use of water resource. 														
<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O.
