The electricity generated by the Project will be fed into the Kenya National Transmission System (KNTS). The activities to be undertaken to develop the project will include; Site mobilization, civil works, procurement and transportation of equipment, equipment installation, waste generation and disposal, commissioning, operation and maintenance (O&M) and decommissioning.

The following are the anticipated impacts and proposed mitigation measures:

Air quality	<ul style="list-style-type: none"> • Develop a dust management plan. • Maintain a logbook: record any exceptional incidents that cause dust, either on- or off-site, and the action taken to resolve the situation in the log book. • Plan site layout, machinery and dust causing activities (e.g. Access roads, stockpiles) should be located away from the site boundary and sensitive receptors where practicable. • Consider the prevailing wind direction when siting stockpiles to reduce the likelihood of affecting sensitive receptors. • Sealing or re-vegetate completed earthworks as soon as reasonably practicable after completion. • Strict adherence to Air Quality Regulations, 2014. 	Landscape and visual impact	<ul style="list-style-type: none"> • Switch off equipment when not in use. • Limit vehicle speeds on site and access roads, particularly along the northern boundary of the site (10km per hour). • Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009. • Implement good housekeeping practices including stockpile areas and dust suppression measures. • Construct installations with sustainable materials, materials to reduce the visual impact and material that enhances the aesthetics of the project area. • Minimize external lighting. • Be careful when locating construction compounds. • Restrict the extent of all disturbed areas as far as practicable.
Water quality	<ul style="list-style-type: none"> • Undertake equipment and/or vehicle maintenance off site where feasible to prevent potential for releases and spills of oils/solvents/hydrocarbons. • No groundwater abstractions without prior approval/permits from authorized body. • Obtain variation for current abstraction permit (Kamburu reservoir) to incorporate water needs for the Project. • Submit copies of abstraction permits to the relevant authorities within 10 days of receiving these permits from NEMA. • The contractor will prepare a site-specific surface water control plan. 	Traffic and transport management	<ul style="list-style-type: none"> • Employ safe traffic control measures, including road signs and flag persons to warn of dangerous conditions. • Ensure that normal load heavy goods vehicles use a defined route, which will need to be agreed on prior to project works. • All vehicles should turn directly into the site or to a pre-agreed /defined layby area of the main road. • Adopt best transport safety practices across all aspects of Project activities with the goal of preventing traffic accidents and minimizing injuries suffered by Project personnel. • Emphasize safety aspects among drivers (specific induction training for all drivers).
Noise	<ul style="list-style-type: none"> • Identify and implement appropriate PPE requirements. • Design noise barriers or other noise attenuation into the design if necessary. • Inform nearby dwellings on the timing and duration of works and when the noisiest stages are likely to occur (ongoing through process). 	Land contamination, materials and waste management	<ul style="list-style-type: none"> • Identify waste handling facilities for the project to accept/ treat waste. • Identify and implement appropriate PPE requirements. • Develop an emergency response plan including spill control plan. • Liquid wastes/oil/chemicals to be stored in tanks or drums located in bunded areas which can hold 110% of the total storage volume and in accordance with national safety requirements. • Implement good housekeeping and operating practices, including inventory control to reduce the amount of waste resulting from materials that are out-of-date, off-specification, contaminated, damaged, or excess to plant needs. • Strict adherence to Waste Management Regulations, 2006.
		Social management	<ul style="list-style-type: none"> • Prioritize recruitment of local labor where possible. • Produce a social enhancement plan that sets out in broad terms how the Project will interact with communities and contribute to local development in the Project wider area of influence (Masinga Mbere).
		Ecological management	<ul style="list-style-type: none"> • Use indigenous plants as much as possible for replanting programs. • Develop a reforestation plan with 10:1 reforestation ratio. • Store topsoil in dedicated sites within site boundary.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>	National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.
Archaeology and cultural heritage	<ul style="list-style-type: none"> Develop a habitat removal and restoration plan (HRRP) to include revegetation replanting under the PV panels. Create an historical record of project development for purpose of recording cultural changes of this area. Undertake archaeological survey prior to start of any site clearance and earthworks in collaboration with National Museums of Kenya (NMK). 	The proponent, Ameken Minewest Company Limited, is proposing to install a 20 cubic metres of LPG storage and filling plant on plot L.R. No. 27/Mwihioti/Githurai, Roysambu Sub-County, Nairobi City County.
