GAZETTE NOTICE NO. 2489

**CONDITIONS GOVERNING THE GRANTING OF  
SUBSIDIES FOR THE CONSTRUCTION OF  
STORAGE DAMS**

IT IS hereby notified for general information that, with the object of encouraging the development of the water resources of the Colony for agricultural purposes of all kinds by the construction of storage dams, the Government has agreed that the terms and conditions set out in this notice shall govern the grant in all cases of subsidies for dam construction, with effect from 1st July, 1959.

1. For the purpose of these conditions:—

"Agricultural Committee" means in the case of the Scheduled Areas an Agricultural Subcommittee constituted in accordance with section 26 of the Agriculture Ordinance, 1955, and in the case of the Non-scheduled Areas a District Agricultural Committee (Non-scheduled Areas) established under section 138 of that Ordinance.

"African farmer" means an African engaged in farming an agricultural holding of not less than eight acres;

"approved" means approved by an authorized officer;

"assessed cost" means the total cost of construction of the dams as estimated by an authorized officer. The estimate shall be based on the experience of the Dam Construction Units and of Government works generally. It shall include the cost of site preparation and foundations, provision of control sluices and spillway and other necessary ancillary works but not the provision of any pumping apparatus;

"authorized officer" means:—

(a) A Government officer of a civil engineering organization working under the Minister for Agriculture, Animal Husbandry and Water Resources, and authorized by the Permanent Secretary to that Ministry, in respect of dams constructed by his organization.

(b) The Chief Hydraulic Engineer in respect of all other dams.

"Chief Hydraulic Engineer" means the Chief Hydraulic Engineer of the Ministry of Works or his accredited representative;

"Co-operative Society" means a society or body corporate registered under the Co-operative Societies Ordinance whose members collectively farm not less than 20 acres of agricultural land;

"dam" means a structure built across a depression, or a tank excavated below ground level, for impounding and storing surface water, and includes the ancillary works needed to dispose of flood water, and the conduits and controls necessary for the release of water;

"Dam Construction Unit" means a mechanical dam construction unit financed from public funds;

"farmer" means any member (including a body corporate) of the European, Asian or Arab communities engaged in farming an agricultural holding of not less than 20 acres, and in the absence from the Colony of such a person includes the agent or representative; it also includes a mortgagee in possession.

2. Farmers, African farmers, Co-operative Societies and local authorities may apply for a subsidy for the construction of a dam intended for the conservation of water for agricultural purposes. Applications (which should normally be accompanied by an application for a water permit) shall be on Form M.O.W. No. 409 and should be submitted to the Water Bailiff of the area concerned. It should be noted that the procedure for the granting of water permits by the Water Apportionment Board takes not less than four months to complete but examination of the application for subsidy will be undertaken concurrently.

3. Each application for subsidy shall be in respect of one dam only and shall be accompanied by a fee of Sh. 100 (which is not returnable) to cover, in part, the cost of the technical examination of the application.

4. No subsidy is payable in the following cases:—

- (a) Where no water permit or sanction has been granted for the construction of the dam.
- (b) Where it is found that construction of a dam has commenced prior to the approval of the application for subsidy.
- (c) Where the construction of the dam is to be financed, in whole or in part, by direct grant from Central Government or East Africa High Commission funds.
- (d) Where the total assessed cost of the dam does not exceed £160 in low rainfall areas, or £200 in high rainfall areas.
- (e) Where an applicant has not discharged his liabilities to Government in respect of work carried out previously on his behalf by a Dam Construction Unit.

5. Before approving an application for subsidy, the authorized officer shall satisfy himself that—

- (a) the appropriate Agricultural Committee has certified that the dam is necessary for the full economic development of the agricultural holding to which the application relates, having regard to the existing water resources of that holding;
- (b) the catchment area and runoff are adequate to fill the dam regularly;
- (c) the design of the dam is sound and its capacity adequate;
- (d) construction of the dam has been authorized in writing by the Water Apportionment Board;
- (e) the provisions of the Water Ordinance (1951) and all rules thereunder have been complied with.

6. If the authorized officer approves the application for subsidy, he shall inform the applicant of the amount of the subsidy to be paid and the assessed cost on which it is based, and in any case where the authorized officer is not the Chief Hydraulic Engineer he shall inform the Chief Hydraulic Engineer similarly.

7. If an authorized officer, not being the Chief Hydraulic Engineer, refuses to approve a proposed dam for subsidy on grounds covered by conditions 5(b) and 5(c), an appeal may be made to the Chief Hydraulic Engineer, whose decision shall be final.

8. The approval of a subsidy shall be valid for a period of one year. An extension of the period of validity of the approval will normally be granted if works are still in progress, provided they proceed continuously to completion. If works have not commenced within the year of validity, a new application will have to be made.

9. The authorized officer may require certain additional works which, in his opinion, are necessary for the proper security of the dam to be done before payment of subsidy.

10. Payment of subsidy will be made only after the work has been completed to the satisfaction of the authorized officer, who shall have the right to inspect the site at any time before, during and after construction in order to check the dimensions, workmanship or any other matter relative to the construction of the dam.

11. The subsidy payable on a completed dam shall be 40 per cent of the assessed cost of the dam in low rainfall zones where the probable annual rainfall is less than 30 in. or 25 per cent of the assessed cost of the dam in high rainfall zones where the probable annual rainfall is 30 in. or more.

Provided that the amount of any subsidy shall be so adjusted as to ensure that the assessed cost of the dam less the subsidy shall not fall below £160 in the case of low rainfall areas, or £200 in the case of high rainfall areas:

And provided that the subsidy payable shall not exceed the sum which would be paid if the actual final total cost of construction and not the assessed cost of the dam, were taken as the basis of calculation for subsidy:

And provided that if during the course of the works increased costs or unforeseen difficulties occur, the subsidy payable may be increased at the discretion of the authorized officer. The Chief Hydraulic Engineer must be informed concerning such increase.

Maps showing the two zones of probable annual rainfall are deposited with each Divisional Hydraulic Engineer and Water Bailiff, and no appeal against this zoning will be entertained.

12. The subsidy is subject to the following maxima:—

- £1,900 in low rainfall zones;
- £1,200 in high rainfall zones;

These maxima may be exceeded in special cases at the discretion of the Minister for Agriculture, Animal Husbandry and Water Resources.

13. The Chief Hydraulic Engineer may, as a condition of payment of a subsidy, require the applicant to permit the installation of a staff gauge and rain gauge at the dam and to take readings of rainfall and water levels at such intervals and over such a period as may be directed by the Chief Hydraulic Engineer. The gauges will be supplied and installed by the Chief Hydraulic Engineer free of charge. They will remain the property of the Government.

14. Where a Dam Construction Unit is used for the construction of the dam, the account shall show the full amount payable, and the subsidy, if any, shall be shown as a deduction, allowable only if the account is fully paid within three months. If payment is not made within three months or such other longer period as the Director of Agriculture may in his absolute discretion specify, the cost of the dam shall be payable in full by the applicant, and no subsidy shall be payable or allowable by the Government.

15. Where a contractor is employed for the construction of the dam, he must be a licensed dam contractor under section 75A of the Water Ordinance, 1951.

16. No liability whatever shall attach to the Government or to any servant of the Government for any damage or loss of whatsoever nature arising out of or in any way attributable to the design or construction of any dam in respect of which an application for subsidy has been made, and the applicant for or the recipient of any subsidy shall at all times keep the Government and any servant of the Government effectually indemnified against all actions, claims, losses and expenses whatsoever arising out of or in any way attributable to anything done or omitted to be done by the Government or any servant of the Government in connexion with the design or construction of any such dam.

17. If any dispute or difference of any kind whatsoever shall arise in connexion with or out of these Conditions or the carrying out of any works in pursuance of these Conditions, it shall be settled by the Chief Hydraulic Engineer, whose decision shall be final and conclusive:

Provided that this rule shall not apply to matters relating to an application for an increased dam subsidy in accordance with rule 12, or any application for extension of payment period specified in condition 14.

18. Nothing in these Conditions shall bind the Government to approve the granting of a subsidy in any particular case.

19. General Notice No. 2813 of 1954 is cancelled.

Nairobi,  
18th June, 1959.

C. J. LANG,  
*Acting Chief Hydraulic Engineer.*
