VACANCY NOTICES OFFERED BY UNESCO

NORAD/UNESCO FUND-IN-TRUST APPOINTMENT

1. *Title of post.*—EXPERT in Electrical Engineering (P. 5).
Location.—Ministry of Education, Nairobi, Kenya.

Background

The Harambee movement (community movement) in Kenya which has, during recent years, resulted in numerous self-help projects such as secondary schools, nursery schools, hospitals, health centres, water schemes, roads, etc., has since 1971 focused on the establishment of institutes of technology designed to produce technical manpower mainly at the skilled and semi-professional level (craftsmen and technicians). At present 15 such institutes have been registered with the Ministry of Education, of which ten are in operation.

In an effort to guide the development of the institutes in a direction which will fit the projected manpower needs of the country, particularly in rural development, and also to help them to plan economically, the Government has set up a co-ordinating committee and advisory panels as recommended in the report of the Unesco consultancy mission in 1973. This assistance is now being augmented by the provision of financial grants to help meet recurrent running costs of existing institutes and an advisory team of specialists was set up within the ministry to provide the expertise required in their initial stages of planning and development. This phase of the project, financed by the Government of Norway under a fund-in-trust arrangement follows on two previous phases, the first of which started operation in July 1976.

Although two polytechnic institutes are well established in Nairobi and Mombasa, they accept only sponsored students on a block release basis. The Harambee institutes are therefore intended to fill a unique role in offering technician training opportunities on a full-time basis to graduates from the general secondary schools. It is also the intention that they will differ from the urban institutes in that they will develop courses appropriate to the region in which they are situated rather than following the more formal courses as present offered in the two polytechnics.

National Character of the Project:

- (a) Operational projects, benefiting from Unesco assistance, are national projects and it is up to the beneficiary country to assume responsibility for directing the project as well as ensuring its proper implementation.
(b) The national authority will also be responsible for the utilization of equipment including supplies and vehicles, as far as the activities defined in the project document are concerned.
(c) Consequently, the international specialists will carry out their mission under the guidance of the national authority.
(d) Under the supervision of the chief technical adviser, the specialists, as staff members of Unesco, are placed under the authority of the director-general of the organization and will answer to him for the manner in which they carry out their functions.

Functions.—The expert in electrical engineering will work in close co-operation with the project manager and the national authorities at the Ministry of Education and the principals and counterparts of the Harambee Institutes of Technology. He will:

- (a) Assist in assessing the needs for technicians in electrical engineering throughout the public and private sectors in Kenya.
(b) Advise on and assist in the preparation of suitable curricula, syllabi and training programmes in his field, including integrated practical and in-service industrial training directed towards foreman/supervisory functions.
(c) Assist in the design of a suitable technician certification system.
(d) Advise on and co-ordinate the programmes to be followed by the different institutes participating in the Harambee movement.
(e) Assist in the preparation of necessary equipment lists for the workshops and laboratories related to his speciality and in installation plans for such equipment.
(f) Assist in the checking of incoming equipment and in putting it to use.

(g) Teach in his speciality if required (to the extent made possible by his other duties).

- (h) Assist in the selection of fellows and the drawing up of their fields of study.
(i) Assist and advise the national authorities on any matter referred to him regarding technical education and training.

He will further:

- (j) Report on the development of the project in his speciality to Unesco secretariat and do so through the project manager.

Qualifications:

- (a) Professional qualifications in electrical engineering, power, with good knowledge of electronics and related fields.
(b) Extensive practical experience in industry.

THE TRADE MARKS ACT

(Cap. 506)

NOTICE is given that any person who has grounds of opposition to the registration of any of the trade marks advertised herein according to the classes may, within 60 days from the date of this Gazette, lodge notice of opposition on Form T.M. No. 6 (in duplicate) together with a fee of Sh. 50.

Notice is also given that official objection will be taken under rule 21 (3) to all applications in which the specification claims all the goods included in any class unless the Registrar is satisfied that the claim is justified by the use of the mark which the applicant has made, or intends to make if and when it is registered. Where an applicant considers that a claim in respect of all the goods included in a class can be justified it will save unnecessary delay in examining applications if a claim is filed simultaneously with the application, accompanied in appropriate cases by supporting documents.

The period for lodging notice of opposition may be extended by the Registrar as he thinks fit and upon such terms as he may direct. Any request for such extension should be made to the Registrar so as to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after reasonable notice has been given by letter to the applicant for registration so as to afford him any opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant.

Where it is stated in the advertisement of the applicant that the mark, upon its registration, is to be limited to certain colours, the colours are, as far as possible, indicated in the accompanying representations of the mark in the usual heraldic manner.
