## GAZETTE NOTICE NO. 2681

## THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

## THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

## ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED IRRIGATION SCHEME PROJECT IN MATA SUB-LOCATION, MATA LOCATION, TAITA TAVETA COUNTY

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

Twiga Foods Limited intends to establish an irrigation scheme project that involve the use of overhead sprinkle irrigation in 485 hectares for phase one. The source of water is mainly River Lumi, through a canal that passes by the farm. Phase two of the proposed project involves the construction of a reservoir of capacity 58,313m<sup>3</sup>, to store some water and also act as a sump to feed the 85 hectares irrigation pivots directly, on plot L.R. No. 10287/10 (Original No. 10287/514) Mata Sub-location, Taita Taveta County.

The following are the anticipated impacts and proposed mitigation measures:

*Potential Impacts Proposed Mitigation Measures*

## Noise and vibration

- All construction equipment will be regularly inspected and maintained in good working condition.
- Provision of ear muffs for those working with noise producing equipment.

## Dust emission

- Excavation, handling and transport of erodible materials shall be avoided under high wind conditions or when a visible dust plume is present and or covered by tarpaulin while on transit.
- Wet all active construction areas as and when necessary to lay dust.
- Vehicle speeds be limited to a maximum of 30km/h.

## Occupational health and safety risk

- Establish a Health and Safety Plan (HASP).
- Appoint a trained health and safety team for the duration of the construction work.
- Provide workers with appropriate personal protective equipment (PPE).
- Keep agrochemical (pesticide and herbicide among others) in their original package away from reach by children and mature people as well.
- Store chemicals as recommended in the MSDS.

## Solid waste generation

- Contract registered waste handler to dispose of waste and have waste destruction certificate and waste transfer notes.
- Use of durable, long-lasting materials that will not need to be replaced often.

## Loss of vegetation

- Avoid cutting mature tree stand, and or relocate all mature Mabuyu (Baobab) trees.
- Re-vegetation of exposed areas around the site to mitigate against erosion of soil through surface water runoff and wind erosion.

## Accumulation of soil stock piles

- The excavated soils will be reused for other activities such as backfilling to level the land to allow the pivotal movement.

*Potential Impacts Proposed Mitigation Measures*

## Soil erosion

- Excavated materials will also be used to balance lands with uneven topography.
- Soil erosion control measures (retention ponds) should be undertaken to avoid erosion in sensitive areas and those prone to erosion.
- The levelling and disturbance of the soil should be limited to the designated cultivation site.

## Soil compaction

- Machineries need to be operated on the existing roads or tracks.
- Unnecessary vehicle movement should be avoided.
- Re-vegetation should be enhanced to reduce run off.

## Pollution of rivers and wetlands

- Apply sediment control procedures to prevent sediment returning into the rivers including but not limited to the retention ponds, among others appropriate to the site.

- Plant vegetation cover, grass around the reservoir and all affected areas not under cultivation.

## Increased traffic

- The contractor should ensure there is regular watering of dusty roads and maintenance during this stage.
- Damaged roads as a result of heavy vehicles should be repaired adequately and without delay.

## Spread of HIV / AIDS among workers and community members

- Education and sensitization of workers and the local communities on the dangers and prevalence of the disease.
- Instituting HIV/AIDS awareness among the project workers.
- There should be provision of adequate prevention measures such as condoms.

## Spread of infectious disease COVID-19

- Awareness creation for both community members and all project workers on the signs and symptoms of COVID-19, how it spreads, how to protect themselves and the need to be tested if they have symptoms.

- All workers shall be subjected to rapid Covid-19 screening which may include temperature check and/or other vital signs.

- Mandatory provision and use of appropriate Personal Protective Equipment (PPE) shall be required for all project personnel including workers and visitors.

- Keep records of all persons (including phone contacts) involved in project implementation.

- Adherence to the MoH COVI-19 Standard operating procedures and protocols.

## Water quality degradation

- Work with the local extension officer so that the staff can be trained on the safe use of agro chemicals to ensure that they apply the right amounts, and prevent pollution water sources.

- The right amounts of fertilizer application should be used to prevent potential for excess quantities getting washed into the surface waters and from infiltrating into the ground water resources.

- Waste management should be adequately streamlined to prevent the release of effluents into the environment.
