The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts

Mitigation Measures

Loss of vegetation cover during excavation • Rehabilitate the site through planting of grass and trees and general environment greening to restore flora and fauna habitat.

Dust emission

- Appropriate scheduling of activities. Dust suppression through sprinkling of water if any. Proper servicing of equipment to reduce exhaust fumes. Communication with residents. Provision of dust protective screens.
- Strict enforcement of on-site speed limit to reduce dust during the work. Water to be sprinkled on graded access routes where

asbestos waste bags, labeled as asbestos waste and disposed of together with the asbestos waste in the licensed disposal pit.

Increased water demand Taps that turn-off automatically when water is not being used be considered on the deliver hoses being used to control dust/wet asbestos sheets. Regular monitoring, reporting, and repairing of water leakages shall be implemented during the work. Staff to be sensitized to conserve water by avoiding unnecessary water use.

Oil spillages

- Proper maintenance of vehicles and machinery involved to avoid oil leaks during equipment and machinery use.
- Maintenance activities to be conducted in areas designated for the purpose i.e. maintenance workshop.

Noise pollution

 Sensitization to ensure that vehicle drivers and machinery operators switch off engines of vehicles or machinery when not in use and also to avoid gunning of vehicle engines or hooting especially when passing.

Heat stress

 Control measures such as selection of appropriate PPE fitted to reduce the build up of heat, cool cotton underclothing, scheduling appropriate work breaks, job rotation, educating workers about heat stress risks to be considered.

Solid waste generation

Accurate estimation of sizes and quantities
of materials required rather than cutting
them to size or having large quantities of
residual materials. Excavated materials from
the disposal pit to be used in backfilling.

Energy consumption •

 Ensure that electrical equipment and other appliances are switched off when not being used. Transportation of materials to be planned to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts.

Underground water contamination

- No concrete batching to occur directly on the ground. Concrete batching area should be bounded to prevent contamination of soils and surface water features.

Possible Impacts

Mitigation Measures

- All fuel storage to be appropriately bunded and provided with a canopy.
- Ablutions for construction workers to enable proper disposal of fecal matter and avoid contamination of surface water features which could be a cause of water borne diseases.

Occupational health and safety

- Contractor should ensure registration of all construction works by the Director, Directorate of Occupational Health and Safety Services (DOHSS)in compliance with the Buildings and Works of Construction Engineering Rules, 1984.
- Contractor should contract a qualified health and safety advisor to conduct training and monitoring of construction works.
- The contractor should construct a temporary clinic onsite to be run by a qualified nurse who will treat opportunistic ailments and injuries such as cold, malaria etc.
- Contractor should provide a standard First Aid Kit onsite.
