Environmental Concerns Recommended Mitigation Measures

Livestock grazing and wildlife habitat land take

Limited woody vegetation is cleared during lodge construction

Night-time lights •

Night-time light intrusion will be minimized by:- use of non-reflective, dark-coloured surfaces for all installations; installation of shielded and downward-directed light fixtures located close to the ground to reduce sky glow; using lights with low or filtered blue, violet and ultra-violet wavelengths, and; setting an appropriate compulsory switch off time for lights at night.

High groundwater abstraction Rain water harvesting will be undertaken to supplement the borehole water supply.

Solid waste

- Waste separation (paper, plastics, metals and glass) will be undertaken at source using well labelled litter bins. The lodge management will adhere with the EMCA (Waste Management Regulations, 2006).

Solar perimeter • fence ecological impacts

- Excessive vegetation clearance will be avoided during the siting and installation of solar panel by locating it in a degraded grassland patches.
- Wildlife connectivity will be maintained for non-dangerous wildlife such as warthogs, dikdiks, hares.
- The solar fence will include conspicuous warning signage: "HATARI" warning signs will be attached to the 3rd live wire at a spacing of approximately 100 metres.

Resource over- (a) Water resources utilization

- The Eco lodge borehole will be metered at the main inlet and daily records taken for water use monitoring.
- Rain water harvesting will be undertaken to supplement the borehole water supply in line with national policies, strategies and action plans.
- Appropriate swimming pool sizing and optimized operations (e.g. low evaporation, zero-spillage options).
- Eco lodge guests will be sensitized on water conservation during arrival briefings, through

information folders in the tents as well as "towel talks".

- Some laundry services will be outsourced to reduce water consumption.
- Guest room toilets will be fitted with lowwater use dual water cistern systems.

(b) Energy

- The Eco lodge will adopt total reliance on solar power (lighting, borehole water abstraction and distribution, water-heating, phone-charging, laptops, internet, Wi-Fi) like in other ecotourism facilities.
- The Eco lodge will use LPG for cooking.
- Low wattage energy saving bulbs will be used throughout the premises.
- Eco lodge guests as well as staff members will be sensitized on the importance of energy conservation.

Water pollution Grey water from the lodge kitchen will be managed prevention and through a grease trap compartment before control draining into a soak pit.

- The rest of the grey water from the guest tents, staff quarters and public areas drains away directly into a bio digester and constructed wetland and water pan.
- Use of underground diesel storage tank.
