Air pollution	- Regular water sprinkling on dry soil in excavated areas and pavements, covering of loose materials and spraying with water during the dry season, - Provision of dust masks for the personnel in dust generation areas; - Sensitize construction workers on pollution control measures, speed control for vehicles
Noise and vibration	- Restrict works to daytime hours (8am–5pm), - Use serviced equipment, inform neighbors of noisy works, ensure workers in the vicinity of high-level noise to wear safety and protective gear.
Solid construction waste	Waste segregation at the source during the project cycle, reuse excavated material where possible, contract a NEMA licensed waste handlers, build construction workers' capacity on sanitation and hygiene practices, special attention shall be paid to the sanitary facilities on site, covering of the trucks when transporting building materials and waste.
Oil pollution/oil spills	- Designated refueling areas, spill kits on site, - No discharge into storm drains, proper storage, handling, and disposal of new/used oil and related oil wastes, routine maintenance of the construction equipment to avoid oil leaks, - Maintenance of the construction equipment to be carried out in the contractor's yard (off the site).
