THE PHYSICAL AND LAND USE PLANNING ACT

(Cap. 303)

COUNTY GOVERNMENT OF ELGEYO/MARAKWET

COMPLETION OF LOCAL PHYSICAL AND LAND USE DEVELOPMENT
PLANS

1. Singore Local Physical and Land Use Development Plan
2. Kapyego Local Physical and Land Use Development Plan
3. Bungwet Local Physical and Land Use Development Plan
4. Anin Local Physical and Land Use Development Plan

5. Tabare Local Physical and Land Use Development Plan

6. Kipsaos Local Physical and Land Use Development Plan

PURSUANT to the provisions of section 49 (1) of the Physical and Land Use Planning Act of 2019, notice is given that the preparation of the above Plans was on the 22nd day of July, 2026 completed.

Copies of the plans as prepared have been deposited for public inspection free of charge at the Office of the County Executive Committee Member in Charge of Lands, Physical Planning and Urban Development, Sub County Administrator's Office, Kapchemutwa, Tambach, Moiben/Kuserwo, Kapyego and Metkei Ward Administrators' Offices from 8.00 a.m. to 1.00 p.m. and 2.00 p.m. to 5.00 p.m. Monday to Friday.

Any interested person who wishes to make any representation in connection with or objection to the above plan may within sixty (60) days send the same to The County Executive Committee Member in Charge of Lands, Housing, Physical Planning and Urban Development, County Government of Elgeyo Marakwet, P.O. Box 220-30700, Iten and such representations or comments shall state the grounds upon which they are made.

Dated the 31st July, 2026.

APPOINTMENT OF LIQUIDATORS

NOTICE is given that Messrs Muniu Thoithi and George Weru of PricewaterhouseCoopers Limited were appointed by NCBA Bank Kenya PLC ("NCBA" or "the Bank") as Joint Administrators ("the Administrators" or "us" or "we") of MHEAL pursuant to section 534 of the Insolvency Act, 2015 of Kenya.

The primary objective of administration proceedings under the Insolvency Act is to allow the Administrators, licensed insolvency practitioners, to explore ways of rescuing the company either as a going concern where feasible or achieving a better outcome for the creditors of the company than would be in the case of a liquidation.

Moving forward, all matters, operational or otherwise, pertaining to the affairs of the Companies shall be directed to the Administrators or their authorized representatives.

The Administrators request anyone with a claim against the Company to submit it to them within the next 14 days from the date of this notice, for inclusion in the Companies' rolls of creditors.

The Joint Administrators act on behalf of the Company without any personal liability.

All correspondence should be addressed to:

Dated the 27th July, 2026.

ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT
(ESIA) STUDY REPORT FOR THE PROPOSED, RESIDENTIAL
APARTMENT DEVELOPMENT ON PLOT L.R. NO.
NAIROBI/BLOCK 146/551, SOUTH C AREA, NAIROBI CITY
COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Section 59 of the Environmental Management and Coordination Act, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Ibrahim Adde Group Holdings Limited, proposes to construct 20-storey residential apartment complex comprising 2 basement levels for parking, ground level mezzanine floor, 106No. residential apartments (20No. four-bedroom units with DSQ, 20No. three-bedroom units with DSQ, 48No. two-bedroom units and 18No. one bedroom units), lobbies, service areas, roof terrace, water tank platforms, associated amenities and facilities on plot L.R. No. Nairobi/block 146/551, South C area, Nairobi County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Waste management (construction wastes)	- Waste materials will be segregated on-site into appropriate skips/containers and removed from site by suitably permitted waste contractors to authorized waste facilities/landfills. - Excavated of ground and subsoil will be removed for offsite reuse, recovery, recycling and/or appropriate disposal by licensed handlers. - Leftover materials (e.g. timber off-cuts, broken concrete blocks/bricks) and any suitable construction materials shall be re-used on-site, where possible. - All construction staff will be provided with training regarding waste management and handling procedures. - The contractor will adhere to the provisions of Environmental Management and Coordination Act EMCA (Waste Management Regulation 2006)
Noise and vibration	- Construction working hours will be restricted to daytime. - Vehicles and machinery will be maintained in good and effective working order and operated in a manner to minimize noise emissions. - Ensure if practicable machinery are installed with acoustic exhaust and enclosure panels. - The compressors, generator and engine compartment doors will be kept closed and machinery turned off when not in use. - The use of noisy equipment will be limited, i.e. avoiding the use of noisy plant/machineries early in the morning. - Drop heights will be minimized when loading vehicles with rubble. - A scheme of noise and vibration monitoring should be undertaken and assessed periodically during the construction phase.

Impacts

Mitigation Measures

Drainage and flooding

- The contractor will ensure that all plant/machineries comply with the relevant statutory requirements.
- The contractor shall ensure that construction materials, debris, or waste do not obstruct existing drainage channels within the project corridor.
- The project engineer will conduct routine monitoring of drainage channels to ensure they remain clear of waste and debris throughout the construction period.
- Storm-water shall be directed into designated drainage channels, ensuring that it does not flow onto or impact adjacent properties.

Social impacts (privacy issues)

- The contractor shall implement a non-discriminatory hiring and wage policy, ensuring that employment and compensation decisions are free from bias based on gender, age, religion, ethnicity, or place of origin.
- The contractor will enforce a strict zero-tolerance policy on sexual harassment in the workplace, ensuring a safe and respectful working environment.

Community risks and Safety

- An accessible grievance mechanism shall be established and communicated to Project Affected Persons (PAPs) to address complaints related to social issues, including privacy concerns, workplace conduct, or project-related impacts
- Install secure perimeter fencing and hoarding around the entire construction site to prevent unauthorized access.
- Provide clear warning signs, reflective barriers, and safety tape around all excavations, trenches, and hazardous zones.
- Cover or barricade all open excavations daily when work is not in progress.
- Use trained traffic marshals and implement a Traffic Management Plan to control vehicle movement and pedestrian safety.
- Install catch nets or safety platforms where work is carried out at height.
- Ensure proper storage and handling of hazardous materials (fuel, chemicals) with restricted access.
- Conduct regular community sensitization meetings on construction
- Develop and drill a comprehensive Site Emergency Response Plan including first aid, evacuation, and coordination with local hospitals and fire services.

Increased energy use

- The project proponent should provide guidelines to the users to ensure conservation of energy.
- In-house environmental awareness campaigns should be carried out at regular intervals to ensure energy conservation.
- Use of energy efficient electrical systems should be promoted and encouraged.
- High efficiency lamps with electronic ballast should be used.

<i>Impacts</i>	<i>Mitigation Measures</i>
	- The power cabling shall be adequately sized to maintain the distribution losses not to exceed 1% of the total power usage. - Use of energy efficient lighting systems e.g. High-Pressure Sodium Vapour (HPSV) Lamps, LED etc. shall be used and promoted.
Increased water supply and demand	- Use of water meter conforming to Kenya water usage standards (Water Quality Regulations, 2024) should be installed at the inlet point of water uptake to monitor the daily water consumption. - Use of water saving fixtures in common areas e.g. sensor taps, high pressure low volume cisterns. - The proponent must promote and practice rainwater harvesting on a regular basis to reduce pressure on water demand,
Prevalence of flooding (storm water and drainage)	- The provision of an adequately sized storm water drainage system to prevent over-flooding of the site and nearby facilities shall be designed and used. - Storm water collection system has been designed so as to accommodate the entire amount of outflow, that may occur after development consisting of box culverts. - Storm water shall be channeled into existing storm water drainage including drainage system along the access road this is to prevent flooding on the lower section of the property.
Effluent discharge (sewerage and wastewater)	- All wastewater and sewerage will be channeled into the existing sewerage system provided by NCWSCo. - The proponent is encouraged to adopt green building technology incorporating techniques like treating and recycling wastewater to prevent overload of the existing sewer trunk.

The full report of the proposed project is available for inspection during working hours at:

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT
(ESIA) STUDY REPORT FOR THE PROPOSED, TRAFFIC
CIRCULATION AND CAPACITY ENHANCEMENT FOR

TALANTA SPORTS CITY STADIUM AND BOMAS INTERNATIONAL CONVENTION CENTER (BICC) IN NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Coordination Act, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya Urban Roads Authority, proposes to construct an approximately 18.9km road network to enhance traffic circulation and capacity in support of the Talanta Sports City Stadium and Bomas International Convention Centre (BICC) traversing Dagoretti South, Kibra, and Lang'ata Constituencies in Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Impacts on flora	- Areas to be cleared should be demarcated beforehand. - Undertake targeted control of invasive alien species followed by restoration with indigenous species. - Spare the vegetation that must not necessarily be removed such as trees, these should be clearly marked and protective barriers installed around them. - Restore the ecological state of the surrounding sites immediately after portions and/or all project activities in the area have been accomplished. - Carrying out compensatory tree planting to replace the trees that must be cleared in order to allow for the implementation of the Project. - Rehabilitate an area of not less than 20 Ha within Nairobi Ecological Region using indigenous tree species as recommended by KFS experts. - Discuss with the local community and relevant authorities on methods of revegetation or compensation for the lost vegetation.
Impacts on fauna	- Minimize the land taken within the park to the smallest possible footprint. - Rapid Ecological Assessment in liaison with KWS to formulate and ecological management plan and inform appropriate mitigation measures. - Adjust alignment where feasible to avoid sensitive habitats. - Maintain ecological buffers between the road and wildlife areas. - Retain vegetation (trees) as much as possible to minimize impact on nesting birds. - The Proponent and Contractor should adhere to the requirements and conditions set out by KFS and KWS, including the necessary statutory approvals prior to commencement of works. - Restrict works within park areas to daylight hours. - Prohibit worker access beyond designated work zones. - Implementation of strict waste management measures. - Control dust through regular watering of exposed surfaces.

<i>Impacts</i>	<i>Mitigation Measures</i>	<i>Impacts</i>	<i>Mitigation Measures</i>
Noise vibration and pollution	- Enforce speed limits for construction vehicles. - All plants and construction equipment shall be fitted with noise control measures and shall strictly conform to the Environmental Management and Co-ordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009 and the OSHA, 2007. - On-site power gen-sets shall be covered with an acoustic enclosure and fitted with muffler and shall conform to the Environmental Management and Coordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009 and the OSHA, 2007. - Prescribe noise reduction measures if appropriate e.g. restricted working hours, transport hours and noise buffering. - Inform the surrounding community on the permissible noise levels and best working hours. - Use quiet equipment (i.e. equipment designed with noise control elements) and regular maintenance of machinery to ensure that noise produced from machinery is kept to a practicable minimum. - Co-ordinate with relevant agencies regarding all construction activities in the project area. - Limit pickup trucks and other small equipment to a minimum idling time and observe a common-sense approach to vehicle use, and encourage workers to shut off vehicle engines whenever possible. - Vehicles hired for bringing construction materials at site shall conform to the noise emission standards and shall be operated during off-peak hours.	Increased demand	- Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. - Provision of facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. - Use of construction materials that have minimal packaging to avoid the generation of excessive packaging waste. - Train workers on proper waste handling and site housekeeping practices. - Adequate collection, segregation and storage of waste on site and safe transportation to the disposal sites and disposal methods at designated area shall be provided. - Ensure that water is used efficiently at the site by sensitizing construction workers to avoid irresponsible water use; and - An assessment and evaluation of the identified water sources should be done against the estimated water demand during construction.
Impacts on air quality	- Construction shall be carried out in accordance with the standard procedures. All plants and construction equipment shall strictly conform to the Environmental Management and Coordination (Air Quality) Regulations, 2024. - The engine size of the construction equipment shall be the minimum practical size. - The number of construction equipment operating simultaneously shall be minimized through efficient management practices. - Alternatively, fueled construction equipment shall be used during the construction process where feasible. Furthermore, equipment shall be properly tuned and maintained. - Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle engines at these points.	Impact of water	- No grey water runoff or uncontrolled discharges from the site/working areas (including wash-down areas) to watercourses and/or water bodies shall be permitted. - Water containing such pollutants as cements, concrete, chemicals, and fuels shall be discharged as provided in the Water Regulations, 2024. This particularly applies to water emanating from concrete swills. - The Contractor shall also prevent runoff loaded with sediment and other suspended materials from the site/working areas from discharging to adjacent watercourses and/or water bodies. - Potential pollutants of any kind and in any form shall be kept, stored, and used in such a manner that any escape can be contained and the water table not endangered. - Wash areas shall be placed and constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted.
Generation and disposal of solid waste	- The Proposed Project will adhere to the Sustainable Waste Management Act (2022) and the EMCA Waste Management Regulations throughout the project cycle. - Development and implementation of a Waste Management Plan prior to commencement of construction works. - Reuse excavated soil and spoil material where feasible for backfilling, landscaping, or embankment construction.	Soil impacts	- erosion • The work shall consist of provision of erosion protection works in the form of bed flooring and curtain or cut-off walls at the upstream and downstream ends of the new as well as the existing box/pipe culverts. • The erosion protection works shall consist of dry rubble stone bed flooring and random rubble masonry curtain (cut-off) wall at the upstream and downstream ends of box/pipe culverts. • Soil erosion and sedimentation due to the surface runoff or water from culverts or other drainage structures should be avoided by putting in place proper erosion control measures. • Limit vegetation clearance to the minimum area necessary for construction. • Encourage re-vegetation as soon as the construction activities are complete, or plan to rehabilitate the disturbed sites after use immediately.

<i>Impacts</i>	<i>Mitigation Measures</i>
Hydrological and riparian impacts	• Restrict vegetation clearance and earthworks within riparian areas to the minimum area required for construction. • Install sediment and erosion control measures such as silt fences, sediment traps, check dams, diversion channels, and temporary drainage systems. • Stabilize exposed soils and embankments promptly through revegetation, mulching, or other suitable erosion control measures. • Prohibit the disposal of excavated material, construction waste, or spoil into watercourses and drainage channels • Maintain machinery in good working condition and implement spill prevention and response measures to prevent contamination of surface water resources. • Schedule in-stream or near-stream works during periods of low flow where feasible and restore disturbed riparian vegetation immediately following completion of works using indigenous species
Public health and Human Immune Deficiency Virus or Acquired Immune Deficiency Syndrome (HIV/AIDS)	• A comprehensive health awareness campaign, carried out in conjunction with the Proponent, Contractor and other stakeholders, will be done to prevent the outbreak of disease. • HIV/AIDS awareness campaigns shall be conducted at the camps as well as in the town center. • The Contractor shall take an active role in civic and public health education for their employees and the community. • The campaign shall include the training of facilitators among the workers, information posters in the workshop and public areas, availability of promotional material • The implementing agency for the HIV/AIDS campaign shall monitor activities regularly to assess effectiveness and impact. • Implementation of initiatives which target knowledge, attitude, behavior, prevention, treatment, and care in collaboration with NSDCC at regional and local levels, NGOs, and CBOs. • Interventions should give attention to high-risk groups, factors perpetuating risk behaviors, female-headed households, child-headed households, orphans, people living with AIDS, youth, school girls, and boys.

(ESIA) STUDY REPORT FOR THE PROPOSED AFFORDABLE
HOUSES AND COMPLIMENTARY FACILITIES DEVELOPMENT
ON PLOT L.R. NO. 4953/667 AT THIKA BUSTANI IN THIKA
TOWN, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Co-ordination Act, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, State Department of Housing and Urban Development, proposes to construct 6No. ten storey residential blocks comprising a total of 570 residential units, 32No. shops, club house, community basketball court, associated facilities and amenities on Plot L.R. No. 4953/667 at Thika Bustani in Thika town, Kiambu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Demolition of existing structures	• Apply for demolition permit from relevant authorities such as NCC ,NCA and NEMA before commencing the demolition. • Engage a registered private contractor to carry out the demolition. • Provide workers with personal protective equipment (PPE). • The demolition exercise will be limited at day time only. • All personnel working on the project will be trained prior to commencing the demolition. • A registered private contractor will be engaged to collect demolition debris/wastes to avoid illegal finaldumping at unauthorized sites will collect demolition debris. • All debris/wastes to be collected regularly to control air pollution and injury e.t.c. • All persons involved in refuse collection shall be in full protective attire. • All trucks hauling demolition debris/wastes shall be covered. • Exposed demolition debris of e.g. dust and sand, will be enclosed, covered, and watered daily before being transported to disposal site.
Health and safety of workers	• All workers will be sensitized before the exercise begins, on how to control accidents related to the demolition exercise. • A comprehensive contingency plan will be prepared before demolition begins, on accident response. • Adherence to safety procedures will be enforced at all stages of the exercise. • All workers, pursuant to labor laws, shall be accordingly insured against accidents. • All workers will be provided and instructed to wear protective attire during demolition, including helmets.
Soil erosion	• Ensure management of excavation activities. • Observe Efficiency of erosion control measures Control activities especially during rainy seasons.

<i>Impacts</i>	<i>Mitigation Measures</i>
Air pollution	• Provide soil erosion control and conservation structures where necessary. • Compact loose soils to minimise wind erosion control earthworks.
	• Dust suppression with water-sprays during the construction phase on dusty areas. • All personnel working on the project will be trained prior to starting construction on methods for minimizing air quality impacts during construction. • Drivers of construction including bulldozers, earth-movers etc will be under strict instructions to minimize unnecessary trips, refill petrol fuel tanks in the afternoon and minimize idling of engines. • Careful screening of construction site to contain and arrest construction-related dust. • Exposed stockpiles of e.g. sand, will be enclosed, covered, and watered daily. • Ensure construction machinery and equipment are well maintained to reduce exhaust gas emission. • Control speed and operation of construction vehicles.
Noise pollution	• Use of Suppressors on noisy equipment or noise shields for instance corrugated iron sheet structures. • Sensitize drivers of construction machinery on effects of noise. • Trucks used at construction site shall be routed away from noise sensitive areas where feasible. • Maintain plant equipment to suppress frictional noise. • Construction activities to be restricted to daytime i.e. 8 a.m. to 5 p.m. • Workers in the vicinity or involved in high-level noise to wear respective safety and protective gear. • Comply with EMCA (Noise and excessive vibration pollution control) Regulations 2009.
Traffic and Road safety	• Enforce speed limits for construction vehicles especially along the roads leading to the site. • Provide bill boards at the site/entrance to notify motorists and general public about the development. • Ensure that the vehicles comply with axle load limits. Ferry building materials during off-peak hours. • Employ traffic marshals to control traffic in and out of site. • Ensuring free board haulage.
Oil spillage	• Proper storage, handling and disposal of new oil and used oil and related wastes. • Maintain construction plant and equipment to avoid leaks. • Maintenance of construction vehicles to be carried out in the contractors yard (off the site). • Provide oil interceptors along the drains leading from car wash and service bays.

<i>Impacts</i>	<i>Mitigation Measures</i>
Solid and liquid waste	• Ensure proper solid waste disposal and collection facilities. • Ensure effective wastewater management. • Design of sewerage system should be as provided in the approved plans. • Wastes to be collected regularly to control air pollution and vermin/insects etc. • Receptacles will be provided for waste storage prior to collection. • Sensitize workers on the 5 R's of waste management i.e. reduction, recycling, reuse, repurpose and refuse. • Refuse collection vehicles will be covered to prevent scatter of wastes by wind. • Wastes will be collected by a licensed operator to avoid illegal final dumping at unauthorized sites. • All persons involved in refuse collection shall be in full protective attire as provided for by the Building Code. • Temporary latrine will be provided on site to be used by construction workers.

The full Representative of the proposed project is available for inspection during working hours at:

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

The following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be Clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE HUMAN RESOURCE POLICIES AND PROCEDURES MANUAL FOR THE PUBLIC SERVICE —

Kenya Gazette

A.30 (1) All communication for publication in the *Kenya Gazette* should reach the Government Printer not later than Friday of the week before publication is desired.

(2) A State Department will be required to meet the cost of advertising in the *Kenya Gazette*.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
