Inquiry Into Allegations of Forgery of Academic Certificates Against a Health Records Officer at the Kenya Medical Training College

The Commission received a complaint that a Copy Typist II at the Kenya Medical Training College presented forged Kenya Certificate of Secondary Education certificate to secure employment as a Copy Typist II.

Investigations established that in the application for Copy Typist II, the officer filled an application for employment form indicating that she holds office practice I stage I, grade 4 credit typewriting, Grade 7 business, English grade, Kenya Certificate of Secondary Education Certificate from St. Mary's High School Kitale with a mean grade of C (Plain) and attached copies of the same. Investigations established that she was upgraded from Copy Typist II to Secretarial Assistant II.

Further evidence established that in the application for promotion/redesignation, from Secretarial Assistant II to Secretarial Assistant I she attached copies of a Certificate in typewriting II and Certificate in office practice I from National Youth Service, Certificate in commerce II, Certificate in business English II, Certificate in secretarial studies II, and a Certificate in computer from Royal Business School.

Evidence obtained from Kenya National Examination Council confirmed that the certificates were forgeries. Investigations revealed that there was no candidate registered by the suspect's name in the year 1994 for KCSE examination in St. Mary's High school Kitale nor in the year 2019 for Series Business education Examination in Royal Business School nor Certificate in typewriting II and Certificate in office practice I in National youth Service. Further, St. Mary's High school Kitale was not a registered examination center in the year 1994. The public officer earned KSh. 3,212,243.30 as salary for the period of her employment.

On 22nd May 2026, a report was compiled and forwarded to the DPP with recommendations to charge the suspect with the following offences;

Inquiry into Allegations of Forged Academic Certificates by the Speaker of The County Asseby of Laikipia.

The Commission received a report that the speaker of Laikipia County had submitted a forged Kenya Certificate of Secondary Education Certificate and a forged Degree Certificate from the University of Gambia to secure employment.

Investigation established that the employee submitted a 1990 Kenya Certificate of Secondary Education Certificate issued by Maralal High School serial number 199134, index number 50201/027 with a main grade of C+ (Plus).

Further investigation established that the officer registered and sat for the year 1990 KCSE examination at Maralal High School. It was further revealed that he attained a mean grade of C (Plain). Further, the suspect altered all his subject grades and he had included a subject which he had not registered for nor sat for. Inquiry Into Allegations of Forgery of Kenya Certificate of Secondary Education Certificate to Secure Employment at Kiambu County Assembly

The Commission received a complaint that an employee of Kiambu County Assembly had submitted a forged Kenya Certificate of Secondary Education certificate to secure employment as a 1st Clerk Assistant.

Investigation established that the officer was employed at the County Assembly of Kiambu as a 2nd Clerk Assistant. The suspect submitted a Kenya Certificate of Secondary Education certificate serial number 0008845 and Index Number 304201/016 from Nkubu High School.

Further, investigations revealed that the officer did not register nor sit for the Kenya Certificate of Secondary Examination at the Nkubu High School in the year 2008. That the centre by the Name Nkubu High School under code Number 304201 did not exist during the year 2008 KCSE examination. 30. EACC/OPS/INQ/79/2024

Inquiry Into Allegations of Corruption Against A Private Person Who Was Impersonating An Eacc Investigator Purporting To Be Based At Integrity Centre

The Commission received a complaint alleging impersonation of a Commission investigator. The complainant reported that the suspect, while presenting herself as an investigator attached to the Commission, sought an audience with him to discuss an inquiry she purported to be handling in relation to him.

Investigations established that the suspect is a private individual engaged in farming and other business activities. It was further established that she fraudulently registered a mobile number using a lost identity card belonging to another person.

Investigations revealed that the suspect assumed the identity of the said individual and, while falsely purporting to be an investigator with the Commission, requested a meeting with the complainant under the guise of conducting official investigations. The suspect was subsequently apprehended while she was in a meeting with the complainant, thereby corroborating the allegation of impersonation.

On 17th April 2026, a report was compiled and forwarded to the DPP with the recommendation to charge the private person with the following offences:

- (i) Impersonating an Investigating Officer of the Commission contrary to Section 34(1) as read with Section 34(2) of Anti-Corruption and Economic Crimes Act, 2003 (ACECA)

Inquiry Into Allegations of Bribery Against Environment Officers Attached to Kilifi Sub-County

The Commission commenced investigations following a report made on 24th April 2021 alleging that environment officers attached to Kilifi Sub-County had demanded a bribe of KSh. 80,000 in order to issue an approval letter for garbage collection.

Investigations established that the complainant had been engaged by Kilifi County in garbage collection services within Mtwapa town since 2004. It was further established that all garbage collectors were required to apply for approval for the collection of garbage, which entailed payment of annual licensing fees ranging between KSh. 50,000 and KSh. 100,000 as assessed by the County Government.

Investigations revealed that the discussions between the complainant and the suspect related to negotiation of the applicable licensing fees payable to the County Government, and not a demand for a bribe. Accordingly, the investigations did not establish evidence of bribery in the matter.

On 17th April 2026, a report was compiled and forwarded to the DPP with the recommendation to close the file.

The Commission is awaiting the DPP's response.

32. EACC/KSM/OPS/INQ/5/2021

Inquiry into Bribery Allegations against Traffic Police Officers Along Kisumu-Bondo Road at Kombewa Police Station in Seme Sub County within Kisumu County.

The Commission conducted surveillance along Kisumu-Bondo Road on 12th to 13th August 2021 and 2nd September 2021, which confirmed the allegations of police misconduct by traffic officers through video evidence and a surveillance report.

On 3rd September 2021 during a sting operation, one of the traffic officers was arrested, while the others evaded arrest.

Investigations established that the officers, who were attached to Kombewa Police Station as Traffic Police Officers, were captured during surveillance irregularly receiving money from motorists along the Kisumu-Bondo Road. Upon arrest of one officer, a search conducted led to the recovery of KSh. 900 from her possession. The other officers fled the scene and were not apprehended at the time.

Although the surveillance footage depicted the officers collecting money from the motorist, investigations did not establish sufficient evidence to prove that the officers demanded or solicited for bribes.

Nevertheless, investigations revealed that the act of receiving money from motorists without lawful justification was found to constitute a breach of the ethical standards expected of public officers under Section 13 of the Leadership and Integrity Act, 2012, thereby warranting administrative action.

On 17th April 2026, a report was compiled and forwarded to the DPP with recommendations for Administrative Action against the traffic officers.

On 15th July, 2026, the DPP returned the inquiry file and concurred with the Commission's recommendation for administrative action.

It was further alleged that the amount was negotiated to KSh. 3,000, which was subsequently sent via M-Pesa to the suspect's phone number.

Investigations established that the suspect demanded a bribe of KSh. 10,000 and received KSh. 8,000 from the complainant.

On 17th April 2026, a report was compiled and forwarded to the DPP with recommendations to charge the Assistant Chief with the following offences:

- (i) Two counts of Receiving a bribe contrary to Section 6 (1) (a) as read with Section 18 of the Anti-Bribery Act, Cap. 79B.

Inquiry into Bribery Allegations against Officers Employed at National Industrial Training Authority and The National Employment Authority

The Commission received a complaint alleging that two government institutions, namely the National Industrial Training Authority (NITA) and the National Employment Authority (NEA), were not adhering to the prescribed procedures to ensure that trainees undertaking homecare management acquired the requisite competency skills and passed requisite examinations. It was alleged that the officials would demand bribes to process certificates.

Investigations established that officers attached to NITA engaged in irregular dealings with proprietors of homecare training institutions regulated by the Authority. In particular, it was established that the Head of Accreditation Department at NITA received a cumulative sum of KSh. 140,000 from the proprietor of a regulated homecare agency between October 2021 and July 2023.

Further, it was established that an Industrial Training Officer at NITA received a cumulative sum of KSh. 150,000 from the proprietor of another homecare agency regulated by NITA between 2nd February 2022 and 12th January 2023.

Investigations also revealed that a Records Management Assistant at NITA received KSh. 200,000 from the proprietor of a homecare agency as an inducement to facilitate the processing of certificates for

eighteen (18) candidates. Additionally, the same officer received a further sum of KSh. 260,000 from another proprietor of a regulated homocare institution.

It was further established that an IT Assistant at NITA received a cumulative sum of KSh. 2,740,000 from directors of three homocare agencies regulated by NITA. The investigations also disclosed a clear case of conflict of interest, as the said officer was engaged as a consultant for one of the entities regulated by NITA while still serving as a public officer within the Authority.

On 17th April 2026, a report was compiled and forwarded to the DPP with recommendations to charge the Head of Accreditation Department, Industrial Training Officer, Records Management Assistant and the IT Assistant with the following offences:

- (i) Receiving a bribe contrary to Section 6 (1) (a) as read with Section 18 of the Anti-Bribery Act, Cap. 79B Laws of Kenya.
- (ii) Conflict of interest contrary to Section 42(3) (a) as read with Section 48 of the Anti-Corruption and Economic Crimes Act, Cap. 65 Laws of Kenya (ACECA).

**THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT**

(Cap. 387)

**INVITATION TO THE PUBLIC COMMENTS ON THE DRAFT STRATEGIC
ENVIRONMENTAL AND SOCIAL ASSESSMENT REPORT FOR THE KENYA
MARINE SPATIAL PLAN**

IN LIGHT of the provisions of section 57 A of the Environmental Management and Co-ordination Act (EMCA), 1999, Regulation 42 and 43 of Environmental (Impact Assessment and Audit) Regulations Legal Notice No. 101 of 2003, the National Environment Management Authority (NEMA) has received a Draft Strategic Environmental and Social Assessment (SESA) report for Kenya Marine Spatial Plan (MSP). The SESA findings are expected to integrate the existing sectoral plans and programs to establish sustainable development mechanisms.

The Kenya Marine Fisheries and Socio-economic Development Project, State Department for Blue Economy and Fisheries (SDBE and F) is the Plan Owner. The MSP planning area covers Kenya's marine and coastal nearshore and offshore waters spanning the land – sea interface from the high-water mark of the five coastal counties namely Kwale, Mombasa, Kilifi, Tana River, and Lamu seaward across Kenya's territorial sea, Exclusive Economic Zone (EEZ), and extended continental shelf. The Plan adopts a twenty-year time horizon from 2025 to 2045, with statutory provision for periodic adaptive review to incorporate climate projections, emerging ocean uses, and monitoring feedback.

The MSP is intended to serve as an overarching framework that aligns development aspirations with ecosystem protection and harmonizes decisions across sectors and governance levels. It does not replace existing regulatory systems; rather, it creates the spatial coherence needed to strengthen them.

The MSP establishes six zoning framework types;

1. Marine Biodiversity Conservation Zone that aims to protect critical habitats, ecological corridors, and climate refugia.
2. Fisheries and Sustainable Use Zone that will accommodate fishing and aquaculture while managing overlaps with conservation and tourism aspects.
3. Cultural Heritage and Tourism Zone that aims to safeguard heritage assets and maintain high-value seascapes.
4. Maritime Transportation and Infrastructure Zone that designate shipping corridors, port areas, and cable protection zones.
5. Renewable Energy Development Zone that guides the siting of offshore energy infrastructure.
6. Multi-Use and Transition Zone that permit managed coexistence and provide buffers between incompatible uses.

The Draft SESA Report assesses the likely environmental, social, economic, cultural, institutional, cumulative and climate-related implications of implementing the Marine Spatial Plan. Key issues considered include marine biodiversity conservation, fisheries and coastal livelihoods, maritime transport and infrastructure, tourism, cultural heritage, renewable energy, pollution control, marine safety and security, climate change resilience, vulnerable groups, and potential conflicts among other competing marine uses.

A summary of the proposed environmental management and monitoring plan for the Kenya Marine Spatial Plan is highlighted in the table below. The proposed mitigation strategies are aimed at minimizing the negative impacts while enhancing the positive ones.

*Impacts on**Mitigations Measures*

Marine

- Maintain ecological corridors, buffer zones and seasonal restrictions to protect breeding, feeding, nesting and nursery habitats.
- Control land-based pollution, sedimentation and hydrological changes affecting mangroves, coral reefs, seagrass beds and nursery areas.
- Apply vessel speed controls, routing measures, noise reduction protocols and gear modification to reduce marine mammal disturbance, vessel strikes, entanglement and bycatch.
- Implement long-term biodiversity monitoring covering coral reefs, seagrass, mangroves, marine mammals, turtles, sharks and key fish stocks.

Fisheries

- Clearly define and communicate fishing zones, access rights, gear restrictions and seasonal controls through participatory engagement with BMUs and fishing communities.
- Protect artisanal and traditional fishing grounds from industrial encroachment through buffer zones, vessel monitoring and enforcement patrols.
- Introduce effort controls, catch limits, closed seasons and gear regulations based on scientific stock assessments.
- Promote bycatch reduction devices, selective fishing gear and safe release protocols for turtles, sharks and non-target species.
- Establish monitoring systems for catch, effort, CPUE, juvenile capture and bycatch across artisanal and industrial fisheries.
- Remove ghost gear and regulate potting, trawling and other gear types likely to damage benthic habitats.
- Strengthen surveillance against IUU fishing through vessel tracking, port-state controls and regional cooperation. Require aquaculture projects to prepare site-specific ESIA/ESMPs, including effluent treatment, water quality monitoring and biosecurity measures.

Maritime
transport and
infrastructure

- Subject all major port, dredging, cable, ferry and maritime infrastructure projects to site-specific ESIA and marine ecological assessment.
- Apply best-practice dredging controls, including timing restrictions, turbidity monitoring, sediment containment and approved disposal sites.
- Avoid routing shipping lanes, dredged material disposal areas and infrastructure corridors through coral reefs, seagrass beds, mangroves and culturally sensitive sites.
- Prepare and regularly test oil spill contingency plans, emergency response systems and hazardous cargo management protocols.

Impacts on	Mitigations Measures	Impacts on	Mitigations Measures			
Tourism and cultural heritage	- Promote cleaner vessel technologies, low-sulphur fuels, port emission controls and energy-efficient port operations. - Introduce vessel routing, speed controls and noise-reduction measures in ecologically sensitive areas and marine mammal corridors. - Maintain navigational safety systems, signage, maritime communication and small-craft access planning to reduce accidents and user conflict. - Consult fishers, tourism operators and coastal communities before establishing exclusion zones, port security zones or cable protection corridors. - Compensate or provide alternative access arrangements where traditional fishing, anchoring or landing areas are permanently restricted.	Marine safety and security	- Develop clear inter-agency coordination procedures for licensing, monitoring and conflict resolution. - Enforce decommissioning plans and financial assurance for removal or restoration at the end of project life. - Strengthen maritime surveillance, vessel monitoring, patrols and enforcement across territorial waters, the EEZ and extended continental shelf. - Clearly mark shipping lanes, ferry routes, port approaches, exclusion zones and small-craft navigation corridors. - Develop safe routing arrangements for artisanal fishers, tourism vessels and small craft near ports, ferry routes and shipping corridors. - Maintain emergency preparedness systems for oil spills, search and rescue, vessel accidents and hazardous cargo incidents. - Establish communication channels between port authorities, Kenya Coast Guard, BMUs, tourism operators and local communities. - Ensure security zones are justified, proportionate and designed to minimize unnecessary livelihood displacement. - Strengthen regional cooperation for IUU fishing control, spill response, marine mammal protection, migratory species management and transboundary pollution control. - Maintain incident reporting, grievance redress and compensation mechanisms for affected users.			
	- Enforce setback lines, coastal development controls and dune/vegetation protection measures in beach tourism areas. - Tourism facilities should provide wastewater treatment, solid waste management, storm water control and pollution prevention systems. - Protect public beach access, fish landing sites and community use areas in tourism planning and licensing. - Map and gazette archaeological sites, shipwrecks, sacred coastal sites and other cultural heritage assets. - Establish protective buffers around cultural heritage sites and prohibit dredging, anchoring, trenching or sand mining in sensitive locations. - Develop access protocols for sacred sites in consultation with custodians, elders and local communities. - Promote low-impact tourism, visitor carrying capacity limits and codes of conduct for diving, boating, beach use and cultural site visitation. - Ensure tourism benefits are shared with local communities through employment, local enterprise participation and community-based tourism initiatives.		Climate change resilience	- Integrate climate risk screening into all MSP zoning decisions, infrastructure approvals and sector development plans. - Protect and restore blue carbon ecosystems, especially mangroves, seagrass beds and coastal wetlands. - Maintain ecological buffers, setback zones and nature-based shoreline protection to reduce erosion and storm surge impacts. - Use climate-informed siting standards for ports, tourism facilities, aquaculture, energy projects and coastal infrastructure. - Promote livelihood diversification for climate-vulnerable fishing and coastal communities. - Monitor climate-sensitive indicators such as coral condition, mangrove health, fish stock shifts, shoreline change and extreme weather impacts. - Support early warning systems, disaster preparedness and local adaptation planning for coastal communities. - Align MSP implementation with Kenya's climate change policy, adaptation plans and blue economy resilience objectives.		
	Renewable energy			- Undertake strategic site screening to avoid critical habitats, fishing grounds, shipping corridors, cultural heritage sites and marine mammal areas. - Enforce project-specific ESIA to assess cumulative impact before approval of offshore renewable energy projects. - Apply construction timing restrictions to avoid breeding, migration, spawning and peak fishing seasons. - Use noise-reduction technologies and marine fauna observation protocols during construction. - Establish safety zones that are proportionate and do not unnecessarily exclude fishers or tourism operators. - Promote multi-use planning where compatible, including co-location with fisheries, research or conservation where feasible.	Socio-economic activities and resource management	- Reserve and protect landing sites, transit corridors, and fishing access routes for small-scale and artisanal resource users. - Integrate community access requirements into marine spatial planning and

	development approvals to safeguard traditional resource-use areas and navigation routes.
	- Promote local content and benefit-sharing arrangements to enhance community participation and equitable distribution of project benefits. - Strengthen regional cooperation and information-sharing frameworks for the management of transboundary marine resources and impacts. - Improve cross-border monitoring, surveillance, and enforcement systems to support sustainable marine resource management.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(Cap. 387)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION/INSTALLATION AND
OPERATION OF AN OPTIC FIBER CABLE (OFC) AND
RELATED SERVICES ALONG ISIOLO-MANDERA ROAD.

INVITATION TO PUBLIC COMMENTS

PURSUANT TO section 59 of the Environmental Management and Co-ordination Act, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, ICT Authority, proposes to install and operate a high-speed optic fiber cable including 74.75km backbone network (main route), 62.018km metro networks (urban areas), 194.517km access network connecting a total of 341 institutions consisting of Government institutions, health facilities, schools, technical vocational education and training (TVETs) and community centres along the Isiolo-Mandera Road. The route corridor extends in a northerly-easterly direction from Isiolo Town (Isiolo County) passing through Meru, Garissa, Wajir and Mandera Counties in North eastern, Kenya.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Terrestrial Habitat Alteration	- Use existing utility and transport corridors (road reserves) to avoid critical habitat through site fixed line infrastructure (e.g., fiber optic cable, etc.) and other linear infrastructure rights-of way, access roads, lines, and towers. - Avoid construction activities during breeding seasons and other sensitive periods or times of day. - Develop a biodiversity management plan (BMP) for protected areas as necessary. - Revegetate disturbed areas with native plant species.
Waste and effluent	- Use returnable glass water bottles to reduce plastic waste. - Train workers on proper waste handling/segregation. - Provide labeled hazardous/non-hazardous waste containers. - Engage only NEMA-licensed waste handlers for hazardous/oil waste. - Prohibit waste discharge into drains, natural areas, or watercourses. - Store fuels/oils in secure, banded, lined areas to prevent spills. - Ensure adequate toilet facilities to prevent open defecation.
Emissions to air	- Conduct regular air quality monitoring. - Wet or chemically treat exposed earthworks; stabilize surfaces post-construction (e.g., vegetation/ground cover). - Regularly wet construction access routes to reduce dust and improve safety. - Minimize material drop heights where feasible. - Maintain construction equipment and generators to reduce emissions. - Provide workers with PPE (including dust masks as needed). - Inform the community of construction schedules.
Noise and vibration	- Enforce best driving practices (drivers to avoid unnecessary acceleration/braking). - Restrict work to authorized hours (no night work; limit work near offices/schools to weekends). - Reduce noise/vibrations (soundproofing, use low-noise equipment, mufflers, enclosures).

<i>Impacts</i>	<i>Mitigation Measures</i>	<i>Impacts</i>	<i>Mitigation Measures</i>
