THE SUGAR ACT

(No. 10 of 2001)

THE KENYA SUGAR BOARD

STRATEGIC ENVIRONMENTAL ASSESSMENT OF THE
IMPLEMENTATION OF THE NATIONAL SUGAR ADAPTATION
STRATEGY (NAS) FOR KENYA

INVITATION FOR PUBLIC TO SUBMIT COMMENTS

THE Government of Kenya (GoK) through Kenya Sugar Board (KSB) and Kenya Sugar Research Foundation (KESREF) is implementing the National Sugar Adaptation Strategy (NAS) with

financial support from the European Union. The NAS aims at making the Kenyan sugar industry more competitive.

A consultant was engaged to undertake a Strategic Environmental Assessment (SEA) of the implementation of the NAS. It is anticipated that the SEA findings will "green" the ongoing activities as well as influence policy development in the sugar sector.

The Draft SEA report and the NAS documents are available for inspection during working hours at the following Kenya Sugar Board offices:

Head Office	Kisumu Office
Sukari Plaza, off Waiyaki Way P. O. Box 51500-00200 Nairobi	Al Imran Plaza, 5th Floor P. O. Box 1681-40100 Kisumu
Kakamega Office	Mombasa Office
AFC Building P. O. Box 1287-50100 Kakamega	Mombasa Trade Centre, 8th Floor P. O. Box 2797-80100 Mombasa

Copies of the above documents may also be downloaded from www.kenyasugar.co.ke. KSB invites members of the public to submit written comments by 26th August 2012 via e-mail to sea@kenyasugar.co.ke and mhlouisegrenier@yahoo.ca.

Kenya Sugar Board is ISO 9001: 2008 Certified

Dated the 24th July, 2012.

**THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT**

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

**ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED 80 MW MUHORONI THERMAL POWER
PROJECT ON L.R. NO.KIPSITET/KERICHO/387 AT KIPSITET
AREA IN SOIN DIVISION, KERICHO DISTRICT**

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed 80 MW Muhoroni thermal power project on L.R. No. Kipsitet/Kericho/387 at kipsitet area in Soin Division, Kericho District.

The Proponent (Kenya Electricity Generating Company Ltd) has proposed to install an 80 MW MSD thermal power plant for generation of power. The MSD engines will run on Heavy Fuel Oil (HFO) with all auxiliary equipment. The plant is expected to give a total output of 80 MW at site ambient conditions. The structures and equipment to be installed consist of: a power house, an office block, two above ground fuel storage tanks, pumps for fuel transfer, fuel lines, additional transformers, power cables, switch gear and protection and metering equipment for off-take at 11 kV.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Generation of solid waste and Construction waste	• Use spoils for landscaping after project completion. • Minimal domestic solid waste generated, stored in refuse bins temporarily before being transported for proper disposal. • Segregate solid waste, minimize and use excess concrete as fill material during civil works. • Provide suitable and properly labeled solid waste containers at strategic points and encourage use of the same by staff and visitors to the site. • Accumulate and return empty plastic containers and lube oil drums to the suppliers. Contract a licensed solid waste transporter to collect and transport solid waste to approved disposal sites.
Loss of vegetation cover	• Proper removal of Topsoil and stockpiled near the site, and preserved for landscaping of the site. • Confine activities within the demarcated area. • Landscaping of the site incorporating 2-3 rows of suitable trees along the perimeter fence as buffer zone between the project site and areas frequently

accessed by the local population.

Vehicular emissions and dust	• Use Personal Protective Equipment (PPE) such as dust masks would be worn in the immediate vicinity of the operations during excavations, concreting and in general handling of cement, sand, and other friable materials. • Spraying water on unpaved road accesses regularly and at handling sites for cement and on stockpiles. • Maintained Construction equipment and vehicles in good working order to ensure minimum emissions including Carbon Monoxide, Oxides of Nitrogen and Sulphur, as well as suspended particulate matter. • Cover trucks removing soils from the site, delivering sand and cement to the site to minimize dust blowing into the surrounding neighbourhood.
Water abstraction from the existing borehole	• Ensure designs require less concrete works and minimal consumption of water. • Contain construction wastewater in a sedimentation pond. • Monitor the quantity of water used and control water consumption. • Recycle and reuse construction wastewater, where possible.
Noise and Vibrations	• Measure noise levels to determine noise hazardous areas and provide PPE (hearing protection) to persons who must operate within or visit the identified high noise areas. • Equip project site with standard noise attenuation features such as silencers or lagging materials. • Ensure construction machine engines are well maintained and Proper engine tune-up of construction equipment. • Post appropriate notices to warn drivers against unnecessary hooting of vehicles. • Keep machinery covers and panels closed and well fitted. Bolts/fasteners done up tightly avoids rattles. • Confine activities between 8.00 a.m and 5.00 p.m. where possible.
Public and Occupational safety and health aspects	• Ensure all equipment are inspected before use for appropriate safe guards and that the machine operators are trained on machine safety procedures. • Provide and enforce use of PPE (helmets, gloves, coveralls, safety boots). • Ensure the working hours are controlled and that employees are not allowed to extend the working hours beyond an acceptable limit for purposes of gaining extra pay. • Ensure appropriate road safety signage are placed and drivers adhere to the requirements of such signage and erection of bumps where human and vehicular traffic have high interaction opportunities. • Develop and implement emergency response plans and procedures for risks expected during construction phase such as fire, oil spills and accidents. • Document and display at the site

	emergency phone contacts for the nearest ambulance service provider, police post, dispensary as well as KenGens' Project Engineer.
Fuel and/oil spills	- Minimized waste oil and sludge leakages and/ or spillages through regular inspection for leakages and timely maintenance of the Engines to ensure they are in good working conditions. - Incorporate wall bunds for containment of accidental waste oil/ sludge spillage. - Display at the site emergency response procedures for spillage incidents. - Provide spill response kits at strategic positions within the power station for containing spillage. - Use impervious concrete surface at the tank farm and fuel offloading area to prevent direct contact of fuel spills with soil resources.
Waste water discharges	- Reduce and recycle engine cooling water during power plant operation. - Discharge human sanitary wastewater into an on-site Wastewater Treatment Plant consisting of Septic Tanks, Aerators and Soak Pits. - Regular inspection of the sewer line for leakages. - Contract a NEMA licensed sewage exhauster to exhaust sewage before it overflows onto the earths surface. - Discharge wash water into the public storm drain through an oil-water interceptor. - Implement an oil skimming programme for oil-water interceptors to ensure normal functioning. - Carry out water quality test for the waste water discharged to ensure the effluent complies with the standards for discharge into the environment.
Traffic build-up	- Document and display at the power station traffic management plan. - Carry out traffic survey along the Kisumu-Kericho road at least once in a period of three months and schedule deliveries at times of light traffic load to avoid congestion. - Maintaining a record of incidents and accidents at the site. Based on this record, incidents and accidents should be investigated and appropriate actions taken. - Educate truck drivers on road safety tips. - Use appropriate road safety signs along the Kericho-Kisumu road from the junction heading to Muhoroni and along the site access road.
Negative social aspects (HIV, sexually transmitted diseases and crimes	- Collaborate with the Ministry of Health and Sanitation, Community Based Organizations (CBOs) and Non-Governmental Organizations (NGOs), create awareness and sensitize employees and local community on HIV and AIDS and other sexually transmitted diseases. - Install condom dispensers in the toilets and continually stock condoms for use by workers and/or visitors.

- Organize for mobile Voluntary Counseling and Testing (VCT) services for both staff and the local community.
- Ensure security is put in place through site fencing and deployment of security guards.
- Install a siren at the power station for use during emergency incidents.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.
- Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- Provincial Director of Environment, Rift Valley Province.
- District Environmental Officer, Kericho District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MOMBASA – NAIROBI 400kv TRANSMISSION LINE (KIBWEZI FOREST SECTION)

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Mombasa – Nairobi 400kv Transmission Line (Kibwezi Forest Section).

The Proponent (Kenya Electricity Transmission Co. Ltd) for the Proposed Mombasa – Nairobi 400kv Transmission Line (Kibwezi Forest Section) has proposed to develop an 8 km 400kv electrical transmission line through Kibwezi forest. The proposed line will have the following components: pylons/steel towers, dumpers, conductors, optical fibre, circuit breakers and lightening arrestors. All the project components will be installed using the best electrical engineering practices.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Construction waste generation	- Ensure identification of the waste types; segregation into the various categories and the establishment of suitable mechanisms for collection, storage, transfer, and final disposal. - Provide refuse bins temporarily before being taken away for proper disposal by NEMA licensed waste transporters. - Ensure construction solid waste generated by activities that are unsuitable for use are disposed in areas approved by the local authority/council and NEMA that will be identified before commencement of construction activities. - Provide pit latrines and urinals for

	construction workers. - Waste water from concrete batching and aggregate screening will be reused. - Cement trucks will be washed in designated car wash areas away from the construction site. - Machinery will be maintained and repaired in designated garages away from the construction site.		- Ensure strict access controls to the electricity power lines. - Enforce way leave requirements for power lines. - Deactivate and ensure live power distribution lines are properly grounded before work commences. - Ensure live wire work are conducted by trained workers with strict adherence to safety and standards. - Ensure that structures are tested for integrity prior to commencing work. - Implement a fall protection program that includes training in climbing techniques and the use of fall protection measures.
Soil erosion and sedimentation	- Excavated earth would be held on locations of the site not susceptible to storm water runoff and deposited carefully on selected sites without the risk of being washed away. - Re-vegetation of exposed areas around the site would be carried out rapidly in order to mitigate erosion of soil through surface water runoff and wind erosion.		
Risk of fires	- No uncontrolled burning to be carried out. - Burning would adhere to application of regulations, fire suppression equipment and monitored by fire watchers. - Establish network for fuel breaks of less flammable materials or clear land to slow progress of fires.	Noise and vibration	- Determine levels and extent of harmful noise and provide PPE (hearing protection) to persons who must operate within or visit the identified high noise areas. - Provide silencers to reduce the quantity of noise produced. - Create a barrier well beyond the perimeter of the high noise level area to protect the unsuspecting public who may approach the project site. - Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. - Ensure that construction machinery are kept in good condition to reduce noise generation. - Ensure that all generators and heavy-duty equipment are insulated or placed in enclosures to minimize ambient noise levels. - Workers on-site will need to wear appropriate hearing protection devices
Air quality	- Spray water or water based mixtures on stockpiles and on unpaved road accesses regularly and at handling sites for cement to suppress dust. - Provide protective equipment (PPE) such as dust masks to be worn in the immediate vicinity of the operations. - Maintain machinery and equipment in good working conditions to minimum emissions including carbon monoxide, oxides of Nitrogen and Sulphur, as well as suspended particulate matter. - Cover trucks removing soils from the site, delivering sand and cement to minimize dust blowing into the surrounding neighbourhood.		
Risk of leaks and spills	- Regular maintenance of site equipment and machinery to ensure any leakages are detected and controlled. - Fit catalytic converters for heavy equipment to convert harmful substance in the exhaust fumes to less harmful substances. - Observe safety procedures for fuel storage and re-fuelling. - Oil residuals including waste oil, lubricants, used filters, would be carefully collected and stored for safe disposal, in order to prevent migration of contaminant hydrocarbons into storm water or groundwater resources.	Terrestrial habitat alternation and disruption	- Site transmission lines and distribute right-of-way, access roads, lines and towers to avoid critical use, through the use of existing utility and transport corridors, as well as existing roads and tracks for access roads. - Installation of transmission lines above existing vegetation to avoid land clearing. - Re-vegetation of disturbed areas with native plant species and removal of invasive plant species during routine vegetation maintenance.
Occupational health and safety issues	- Ensure all equipment are inspected before use for appropriate safe guards and that the machine operators are trained on machine safety. - Ensure the working hours are controlled and employees not allowed to extend beyond an acceptable time. - Provide appropriate road safety signage and drivers adhere to the requirements of such signage.	Avian and bat collisions and electrocutions	- Maintain a 1.5 meter spacing between energized components and grounded hardware. - Cover energized parts and hardware and Install visibility enhancement objects (marker balls).
		Aircraft navigation safety	- Consult with regulatory air traffic authorities prior to installation. - Adherence to air safety regulations.
		Right of way maintenance	- Schedule maintenance activities to avoid breeding and nesting sessions. - Avoid clearing in riparian areas and use of machinery in the vicinity of watercourses. - Observe manufacturer machinery and equipment guidelines, procedures with regard to noise as well as oil spill prevention and emergency response.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- (c) Provincial Director of Environment, Eastern Province.
- (d) District Environmental Officer, Makueni District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF NAKURU AIRSTRIP, NAKURU COUNTY

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed development of Nakuru airstrip.

The project will involve construction of a terminal, ancillary building, pavement areas, the runway, taxiways, apron area, general aviation hanger, cargo terminal, garage, mechanical workshop, isolated Aircraft parking position and infrastructure workshop, among others.

The proposed airstrip site is located some 15 km east of Nakuru town. The project is sandwiched between the main Nairobi-Nakuru highway and the Nakuru Elementaita Road on a piece of land measuring about 500 acres.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Waste management	- Centralize responsibility for waste management and develop a solid waste management programme. - Carry out waste audits and ensure that airport users are compliant with the projected waste reduction, reuse and recycling plans. - Track all waste generated and disposed. - Isolate waste by containment to prevent the mixing of hazardous and non hazardous wastes or incompatible materials to enable reuse and avoid adverse reactions and emissions. - Dispose construction waste at sites approved by the Nakuru Municipal Council. - Install an incinerator within the site to manage hazardous waste.
Energy use and conservation	- Carry out energy audits at regular intervals. - Consider the possibility of using alternative sources of energy especially renewable sources such as solar. - Implement energy efficient measures i.e.

	pay close attention to the location of lighting fixtures and operate them on the basis of time, ambient light levels and occupancy etc.
Solid waste management	- Collect and sort out of waste. - Contract a private waste handler.
Accidents due to unsafe practices during construction and operation	- Engage an EHS consultant to develop an Environment Health and Safety (EHS) plan during the construction period. - Prepare an EHS manual for use during construction.
Increased water consumption	- Put in place measures for quick detection and repair of pipes, valves and tank leaks. - Sensitize staff and airport users on water conservation. - Establish proper housekeeping regulations to minimize unnecessary use of water i.e. ensure taps are not running when not in use. - Adopt sound water conservation measures. - Recycle water at the implementation phase where possible. - Install automatic water dispensers.
Wastewater management	- Establish a regular monitoring programme at outfalls. - Connect to the Septic system or treatment works.
Air pollution	- Avoid dust generation by spraying water where necessary. - Control speed of construction vehicles and switch off machines when not in use - Use water bowsers to minimize dust pollution.
Increased noise pollution	- Establish noise management committee to receive complaints from the public and device appropriate noise mitigation measures. - Provide workers with ear muffs and nose masks. - Workers in the vicinity of or involved in high noise areas to wear safety protective gear.
Destruction of the physical environment	- Avoid use of heavier machinery than is necessary. - Control earth works.
Incidents, accidents and dangerous occurrences	Provision of procedures for reporting incidents, accidents and dangerous occurrences shall be put in place. This shall be done in prescribed forms obtainable from the occupational health and safety office.
Health and Safety Committee	A health and safety committee in which the employer and the workers are represented shall be formed.
Sanitary conveniences	Suitable and efficient sanitary conveniences shall be provided separately for males and females.
Safety of personnel	All machines and other moving parts of equipments must be enclosed to protect workers from possible injury.
Safe means of access and safe place of employment	There should be safe means of access to the work place.
Emergency and hazard response preparedness plan	There shall be well designed and documented emergency preparedness plans including fire emergency rescue

	procedures.
Fire protection	• An accessible and well stocked first aid box shall be provided within the premises. • The proponent shall train personnel in first aid and certificates issued by a recognized body. • The most current emergency telephone numbers shall be prominently displayed within the premises. • Review emergency and contingency plans periodically. • Fire-fighting equipment such as extinguishers and hydrants shall be provided at strategic locations. • Regular inspection and servicing of the extinguishers will be undertaken by a reputable service provider and records of such inspections maintained. • Signs such as no smoking must be prominently displayed within the premises especially in places where inflammatory materials are handled e.g. hanger.
Bird strike menace	• Conduct a bird species and habitat preference study on the facility and surrounding habitat. • Establish a bird strike control committee that is properly trained on implementing, reporting and managing bird strike hazards. • Ensure that the bird control committee is well equipped and funded. • Identify and minimize all bird attraction sites in the airfield and surrounding areas. • Grass at the airfield should be cut regularly to a maximum height of between 25 and 30 cm.
Site aesthetics	• Landscaping. • Tree planting.
Land use planning and management	• KAA shall liaise with the local authority to establish land use criteria around the airport. • Limit encroachment of incompatible developments in sensitive noise corridor.
Electrical safety	• Circuits may not be overloaded. • Distribution board switches must be clearly marked to indicate respective circuits. • There shall be no live exposed wiring. • Electrical fittings near all potential sources of ignition shall be flame proof. • All electrical equipments shall be earthed. • All emergency exits shall open outwards and be marked in RED and isles shall be clear of slips, trip and fall hazards.
Public health and occupational safety	• Suitable personal protective equipment shall be made available and the staff shall be trained on their proper use. • Train staff on occupational health and safety. • Provide full protective gear in addition to the right tools and operational instruction manuals.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- (c) Provincial Director of Environment, Rift Valley Province.
- (d) District Environmental Officer, Nakuru District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED ETHIOPIA-KENYA POWER SYSTEMS INTERCONNECTION PROJECT

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Ethiopia-Kenya Power Systems Interconnection Project.

A completely new transmission line with self-supporting steel lattice towers with concrete foundations will be built from Sodo in Ethiopia to Suswa in Kenya. Substations will be built at Sodo (Ethiopia), and Suswa in Kenya. Approximate average construction span length of the line is 400 m and with 65m RoW corridor. The 2009 technical feasibility study recommends adopting a conceptual design featuring:

- ±500 kV HVDC bipolar overhead line, from Wolayta/Sodo S/S on the Ethiopian side to Suswa Kenyan side.
- Ground electrode lines at Wolayta/Sodo and Suswa
- Five 400 kV 1½ breaker diameters at Wolayta/Sodo on the Ethiopian side,
- Seven 400 kV 1½ breaker diameters at Longonot on the Kenyan side, including switched shunt compensation, dynamic compensation and step-down transformers
- One synchronous condenser rated 200 MVA at Longonot S/S.

The bipolar 500 kV HVDC line will originate from Wolayta Sodo in Ethiopia and terminate at Suswa in Kenya.

The following are the anticipated impacts and proposed mitigation measures:

<i>Anticipated Environmental Impacts</i>	<i>Mitigation Measures</i>
Settlements and community facilities	• Where it is not possible to realign the line route further than already achieved so as to avoid the affected facilities and structures, compensation and assistance shall be provided to the community or individuals affected • More details about resettlement and compensation is provided under the RAP brief.
Potential aesthetic impacts	• The OHTL routes have been established so as to meet the co-inhabitancy requirements imposed by the natural landscape, objects, buildings and facilities in the neighborhoods by ensuring that they merge into the

	existing landscapes. In particular, most of the transmission line route has been selected to follow hilltops where there is minimum human settlements and where the view of the conductors will be against the sky and thereby having less impact than when viewed sideways or from above against the background of the horizon or the ground.
Natural vegetation	• Clearance during construction be done manually without burning the cleared vegetation. • Vegetation clearance within the Protected Areas be done under supervision of KWS and KFS personnel. • Compensate value trees according to RAP recommendations • Compensatory planting of trees that are cleared or whose height is limited to 4.5m.
Fauna	• To be mitigated at specifically identified locations by use installation of coloured warning spheres on the ground conductors atop the towers. • The design to include building raptor platforms on top of pylons for roosting and nesting; • Collect monitoring data on avifauna electrocuted along the proposed transmission line. • Install danger sign and anti-climbing barbed wire for safety purposes on every steel tower. • Ensure a safety officer is present at all the times during the construction phase. Conduct safety campaigns periodically among the population along the entire RoW. • The span between towers is on average 400 m and minimum height of conductors is 11 m, thus, the infrastructure configuration does not limit animal movements including elephants. • Schedule construction so as not to coincide with animal migrations across migration corridors and this will be included as a clause in construction contract.
Impacts on agricultural land	• KETRACO to provide monetary compensation for cessation of land use and any loss associated with compromised land productivity. Compensation details are provided under the RAP. • Some of the access roads required during project implementation should not become permanent if not required by community.
Impacts on drainage, surface waters and water resources	• Positioning of towers away from natural drainages and floodways. • Position towers so as to leave a protection zone of 15 m at river and streams and 5 m when crossing any drainage channels. Channel effluents to septic tank and run-off from work surfaces to a retaining pond.
Land excavation, access roads and campsite	• Designing transmission line route close to existing roads or line corridors. Rehabilitate temporary access roads after completion of works. • Minimize the number of new roads

required,

- Locate the campsite in such a way that they can have residual values like turning them into schools and other public facilities.
- Restrict use of heavy machinery and vehicles to designated work areas.
- Install soil protection works in areas sensitive to erosion prior to undertaking construction.
- Work schedules to avoid working hours at night especially around health centres
- Work schedules in the vicinity of schools to be restricted to off school hours.
- Ozone concentrations around power lines have no health consequences as they have purely localized impacts.
- Re-use some of the excavated soil for backfilling while the rest to be disposed off at designated areas.
- Dispose of waste in accordance with the NEMA guidelines.
- Take particular care in forest reserves, national parks and other protected areas where materials and plants brought in during construction must be taken out at completion of the works.
- The Kenya Civil Aviation Authority to be requested to conduct a survey along the RoW and advise on the safety distances of the RoW from the aerodromes and safe tower heights and/or need for installation of warning lights and/or warning spheres in the vicinity of the aerodromes and at any other point along the entire RoW .

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MIXED RESIDENTIAL HOUSING SCHEME FOR K.P.L.C LIMITED STAFF RETIREMENT BENEFITS SCHEME ON L.R NO.21080/38, NEW LORESHO ESTATE, NAIROBI

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed mixed residential housing scheme for K.P.L.C limited staff retirement benefits scheme on L.R No.21080/38, new Loresho Estate, Nairobi.

The Proponent (The Kenya Power and Lighting Company Ltd) of the proposed mixed residential housing scheme for K.P.L.C limited staff retirement benefits scheme on LR NO 21080/38, new Loresho Estate, Nairobi has proposed to carry out construction of a housing estate of mixed typology comprising of Villas, Town Houses and Flats totaling to 160 units to be used as single family dwellings. Each Villa will be built on a plot measuring 0.024 Ha with a total of 12 units. House type 01 will each be built on a plot measuring 0.02153 Ha with a total 29 units. Type 02 houses will each be built on a plot measuring 0.0203 Ha, with a total of 53 units. The flat will comprise of 11 blocks each with 3 floors with a total of 66 units each unit 150m². There will also be a sewer treatment plant/Biobox, a commercial facility and Kindergarten.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Sewage and effluent disposal	- All drain pipes passing under the building, driveway or parking should be of heavy duty PVC pipe tube encased in 150mm concrete surround. - All manholes on drive ways and parking areas should have heavy-duty covers set and double sealed airtight as approved by specialists. - All waste pipes should have cleaning eyes accessible from outside and free to every part of the system for inspection, cleaning and repair - Sanitary facilities should be kept clean always, through regular washing.
Waste generation	- Special attention shall be paid to the handling and disposal of all solid waste generated during construction and operation phases. - A reputable solid waste handler will be contracted to regularly collect solid waste for appropriate disposal following the Local Authority Guidelines. - There will be adequate provision of strategically placed waste bins all over the building compound to ensure that there is no idle litter - The materials should be properly segregated and separated to encourage recycling of some of them. - Non-usable solid waste materials generated during the demolition and construction shall be transported for appropriate disposal in one of the designated dumping sites. - The proponent undertakes to provide well constructed sewage lines all draining into the designated sewer system next to the site.
High water demand	- Encourage water reuse/recycling during both construction and operational phases. - Roof catchments should be provided with rainwater harvesting systems to enhance collection and storage of the run-off. - Provide notices and information signs on means and needs to conserve water resource to awaken the civic consciousness with regard to water usage and management.
Noise and vibration	- Construction works should be carried out only during the specified time which is usually as from 0800 hrs to 1700 hrs. - Machineries should be maintained regularly to reduce noise resulting from friction. - Workers should be provided with

Personal Protective Equipment such as earmuffs when operating noisy machinery and when in a noisy environment.

Increased energy demand	- Provision of bill boards at the construction site gates notifying of the construction activity and timings - Shield the areas under works to reduce noise propagation. - Switch off all electrical appliances when not in use - Optimize operations of electrical equipment to enhance energy conservation - Put off all lights immediately when not in use/required or are not needed. - Use energy conserving electric lamps for general lighting
Soil erosion	- Avoid unnecessary movement of soil materials from the site - Provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off. - Control construction activities during rainy/wet conditions to control soil movement - Resurface/pave open areas after the completion of the project - Provide suitable storm water drainage channels to effectively discharge water to safe areas.
Security and Fire	- Install and maintain fire fighting equipment and machinery - Sensitize the workers on fire risks & use fireproof materials - Provide emergency numbers at strategic points. - Potable fire fighting equipment are located at strategic points - Provision of security during the construction & operation phases. - Ensure that all workers have access to communication facilities (phones etc.) for quick emergency response.
Surface drainage system	- During construction, the design (of the drainage system) should ensure that surface flow is drained suitably into the public drains provided to control flooding within the site. - Drainage channels should be installed in all areas that generate or receive surface water such as car parking, driveways and along the building block-edges of the roofs. - The channels should be designed with regards to the peak volumes such as periods or seasons when there is high intensity of rainfall. - Storm water generated from roof catchments should be harvested, stored and made use in various household activities - Paving of the side walkways, driveways and other open areas should be done using pervious materials such as cabbro to encourage water recharge and reduce run-off volume
Air quality and pollution	- Provide personal protective equipments, materials and clothing. - Regular and prompt maintenance of construction machinery and equipment.

- Control over areas generating dust particles. Such areas should be regularly cleaned or sprinkled with water to reduce dust.
- Use environmentally clean fuels/gasoline such as Unleaded Gasoline (ULG)
- All staff is trained on the use of any unfamiliar machinery and equipment that may pose danger to the user before they are allowed to use them.
- A fully equipped first aid kit.
- The contractor should have workmen's compensation cover.
- Adequate sanitary facilities should be provided and standard cleanliness maintained.
- Workers should always be sensitized on social issues such as drugs, alcohol and diseases.
- Regular maintenance of machinery on site should be done

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- (c) Provincial Director of Environment, Nairobi Province.
- (d) District Environmental Officer, Westlands and Langata Districts.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.
