GAZETTE NOTICE No. 7906

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED INSTALLATION OF 5–10 MWe
MODULAR GEOTHERMAL POWER PLANTS AT MENENGAI
GEOTHERMAL DRILLING PROJECT, NAKURU COUNTY

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed installation of 5–10 MWe Modular Geothermal power plants at Menengai Geothermal Drilling Project, Nakuru County.

The Proponent (Geothermal Development Company) of the proposed installation of 5 – 10 MWe Modular Geothermal power plants at Menengai Geothermal drilling project, Nakuru County has proposed to undertake construction and installation of geothermal modular generator unit on well MW – 01, construction of substations, sump, re-injection well and transmission lines to various proposed drilling sites. The modular generator unit steam consumption shall be about 6.3 tons per hour per MWe with a generation voltage to 33kv befitting the evacuation line. The modular generator unit shall be designed for at least 200,000 hours continuous operation (25- year life).

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Increased solid waste generation	• Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Source reduction 2. Recycling 3. Composting and reuse 4. Combustion 5. Sanitary land filling. • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed rather than cutting them to size, or having large quantities of residual materials. • Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects. • Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. • Purchase of perishable construction materials such as paints should be done incrementally to ensure reduced spoilage of unused materials. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at the site. • Dispose waste more responsibly by dumping at designated dumping sites or landfills only. • Waste collection bins to be provided at

designated points on site.

Dust emission during construction of site infrastructure and transportation of machinery such as modular power generation equipment and their accessories

Increased possibility of subsidence due to higher rate of steam extraction compared to rate of natural replenishment of fluids

Emergency preparedness and evacuation procedures

Noise and vibration during construction and generation

Exhaust emissions

- Private waste disposal company to be contracted to transport and dispose the solid waste from site.
- Ensure strict enforcement of on-site speed limit regulations.
- Avoid excavation works in extremely dry weathers.
- Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles.
- Personal Protective equipment to be worn.
- Re inject into the geothermal system spent geothermal liquids.
- Carry out regular geophysical monitoring to detect any changes related to subsidence in the project area and immediate environs.
- Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency.
- Such procedures must be tested at regular intervals.
- Ensure that adequate provisions are in place to immediately stop any operations where there is an imminent and serious danger to health and safety and to evacuate workers.
- Ensure that the most current emergency telephone numbers posters are prominently and strategically displayed within the construction site.
- Provide measures to deal with emergencies and accidents including adequate first aid arrangements.
- Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used.
- Sensitize construction drivers to avoid running of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals.
- Ensure that construction machinery are kept in good condition to reduce noise generation.
- Ensure that all generators and heavy-duty equipment are insulated or placed in enclosures to minimize ambient noise levels.
- Workers on-site will need to wear appropriate hearing protection as a necessary safety precaution.
- The noisy construction works will entirely be planned to be during daytime when most of the neighbours will be at work.
- Comply with the provisions of Environmental Management and Coordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009 regarding noise limits at the workplace.
- Vehicle idling time shall be minimized.
- Sensitise truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle

Increased energy consumption	engines at these points. • Ensure electrical equipment, appliances and lights are switched off when not being used. • Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy. • Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts. • Monitor energy use during construction and set targets for reduction of energy use.
High water demand	• Install water conserving taps that turn-off automatically when water is not being used. • Promote recycling and reuse of water as much as possible • Install a discharge meter at water outlets to determine and monitor total water usage. • Promptly detect and repair of water pipe and tank leaks. • Sensitise staff to conserve water by avoiding unnecessary water use. • Provide for breathers along the pipeline to minimize pipe busts.
Generation of wastewater	• Provide means for handling sewage generated by construction workers. • Monitor spent geothermal fluids quality regularly to ensure that the stipulated discharge rules and standards are not violated. • Provide means for handling sewage generated by site workers. • Re-inject spent geothermal fluids back into the geothermal system. • Potential for contamination of groundwater by re-injected fluids should be minimized by installation of leak-proof well casings in the injection wells. • Consider use of binary power generation technology that reuses rejected geothermal fluids. • Monitor geothermal effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.
Machinery/equipment safety	• Ensure that machinery, equipment, personal protective equipment, appliances and hand tools used in construction and power generation do comply with the prescribed safety and health standards and be appropriately installed, maintained and safeguarded. • Ensure that equipment and work tasks are adapted to fit workers and their ability including protection against mental strain. • All machines and other moving parts of equipment MUST be enclosed or guarded to protect all workers from injury. • Train and supervise workers regarding construction and power generation machinery and other procedures/operations. • Equipment such as fire extinguishers MUST be examined by a government

authorized person. The equipment may only be used if a certificate of examination has been issued.

- Reports of such examinations MUST be presented in prescribed forms, signed by the assessor and attached to the general register.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi

(c) Provincial Director of Environment, Rift Valley Province.

(d) District Environmental Officer, Nakuru District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Emergency preparedness and evacuation procedures	• Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency. • Ensure that adequate provisions are in place to immediately stop any operations where there is an imminent and serious danger to health and safety and to evacuate workers. • Ensure that the most current emergency telephone numbers posters are prominently and strategically displayed within the construction site. • Provide measures to deal with emergencies and accidents including adequate first aid arrangements.	Generation of wastewater	• Provide means for handling sewage generated by construction workers. • Discharge drilling geothermal wastes in a lined wastewater ponds. • Monitor geothermal effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.
Noise and vibration during well pad establishment, drilling and also well testing	• Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy-duty equipment are insulated or placed in enclosures to minimize ambient noise levels. • Workers on-site will need to wear appropriate hearing protection as a necessary safety precaution. • Drilling rig should be fitted with noise mufflers keep noise level below the 85 decibels. • The noisy construction works will entirely be planned to be during daytime when most of the neighbours will be at work. • Comply with the provisions of Environmental Management and Coordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009 regarding noise limits	Machinery/equipment safety	• Ensure that machinery, equipment, personal protective equipment; appliances and hand tools used in well drilling comply with the prescribed safety and health standards. • All machines and other moving parts of equipment MUST be enclosed or guarded to protect all workers from injury. • Train and supervise workers regarding drilling machinery and other procedures/operations.
		High socio-economic interest of the communities	• Have a clear employment policy for the locals and implement it fairly to both the Pokot and Turkana communities. • Allow access of the community to their grazing grounds and have regular consultations on matters pertaining the grazing grounds and geothermal exploration interface.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED ARUS-KOROSI - CHEPCHUK GEOTHERMAL DRILLING PROJECT, BARINGO COUNTY

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Arus-Korossi-Chepchuk Geothermal drilling project, Geothermal drilling project, Baringo County.

The Proponent (Geothermal Development Company) of the proposed Arus – Korossi - Chepchuk Geothermal drilling project, Geothermal drilling project, Baringo County has proposed to drill, discharge and test geothermal exploration, appraisal and production wells with the aim of constructing geothermal power plants.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Increased solid waste generation	• Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Source reduction 2. Recycling 3. Composting and reuse 4. Combustion 5. Sanitary land filling. • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed rather than cutting them to size, or having large quantities of residual materials. • Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects. • Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. • Purchase of perishable construction materials such as paints should be done incrementally to ensure reduced spoilage of unused materials. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste.

Disturbance of terrestrial flora and fauna	• Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at the site. • Dispose waste more responsibly by dumping at designated dumping sites or landfills only. • Waste collection bins to be provided at designated points on site. • Private waste disposal company to be contracted to transport and dispose the solid waste from site. • Long access routes will be avoided and the shortest possible route will be used. • Access routes will avoid areas that may be sensitive or important to wildlife e.g. migration pathways and watering points. • Any structure within the project site will be camouflaged with natural environment friendly colours. • Areas where animals, both wild and domestic, are known to pass will be kept free of any obstruction.
Dust emission during construction of site infrastructure and transportation of machinery such as drilling equipment and their accessories	• Ensure strict enforcement of on-site speed limit regulations. • Avoid excavation works in extremely dry weathers. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. • Personal Protective equipment to be worn.
Increased possibility of subsidence due to higher rate of steam extraction compared to rate of natural replenishment of fluids	• Re inject into the geothermal system spent geothermal liquids. • Carry out regular geophysical monitoring to detect any changes related to subsidence in the project area and immediate environs.
Emergency preparedness and evacuation procedures	• Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency. • Such procedures MUST be tested at regular intervals. • Ensure that adequate provisions are in place to immediately stop any operations where there is an imminent and serious danger to health and safety and to evacuate workers. • Ensure that the most current emergency telephone numbers posters are prominently and strategically displayed within the construction site. • Provide measures to deal with emergencies and accidents including adequate first aid arrangements.
Noise and vibration during construction and generation	• Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid running of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy-duty equipment are insulated or placed in enclosures to minimize ambient noise

	- levels. - Workers on-site will need to wear appropriate hearing protection as a necessary safety precaution. - The noisy construction works will entirely be planned to be during daytime when most of the neighbours will be at work. - Comply with the provisions of Environmental Management and Coordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009 regarding noise limits at the workplace.
Exhaust emissions	- Vehicle idling time shall be minimized - Sensitise truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle engines at these points.
Increased energy consumption	- Ensure electrical equipment, appliances and lights are switched off when not being used. - Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy. - Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts. - Monitor energy use during construction and set targets for reduction of energy use.
High water demand	- Install water conserving taps that turn-off automatically when water is not being used. - Promote recycling and reuse of water as much as possible. - Install a discharge meter at water outlets to determine and monitor total water usage. - Promptly detect and repair of water pipe and tank leaks. - Sensitise staff to conserve water by avoiding unnecessary water use. - Provide for breathers along the pipeline to minimize pipe busts.
Generation of wastewater	- Provide means for handling sewage generated by construction workers. - Monitor spent geothermal fluids quality regularly to ensure that the stipulated discharge rules and standards are not violated. - Provide means for handling sewage generated by site workers. - Re-inject spent geothermal fluids back into the geothermal system. - Potential for contamination of groundwater by re-injected fluids should be minimized by installation of leak-proof well casings in the injection wells. - Consider use of binary power generation technology that reuses rejected geothermal fluids. - Monitor geothermal effluent quality regularly to ensure that the stipulated discharge rules and standards are not

	violated.
Machinery/equipment safety	- Ensure that machinery, equipment, personal protective equipment, appliances and hand tools used in construction and power generation do comply with the prescribed safety and health standards and be appropriately installed, maintained and safeguarded - Ensure that equipment and work tasks are adapted to fit workers and their ability including protection against mental strain. - All machines and other moving parts of equipment MUST be enclosed or guarded to protect all workers from injury. - Train and supervise workers regarding construction and power generation machinery and other procedures/operations. - Equipment such as fire extinguishers MUST be examined by a government authorized person. The equipment may only be used if a certificate of examination has been issued. - Reports of such examinations MUST be presented in prescribed forms, signed by the assessor and attached to the general register.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MASAI ROLLING MILLS LIMITED ON LR NO KJD/KAPUTEI NORTH/43307, AT ISINYA-KAJIADO COUNTY

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed development of Masai Rolling Mills Limited on L.R No. KJD/Kaputei North/43307, at Isinya-Kajiado County.

The Proponent (Masai Rolling Mills Limited) of the proposed development of Masai Rolling Mills Limited has proposed to carry out construction of scrap steel recycling, melting and rolling mill plant. Production and manufacturing processes include melting of scrap steel, billets from steel melting plant and rolling of TMT bars in the rolling mill plant.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Solid waste management	- Disposal of excavated material & other wastes by licensed companies. - Recycling and reuse of solid metal wastes. - Adapting cleaner production Mechanisms (CDM). - Minimize wastes through accurate estimation & efficient use of materials.
Soil erosion	- Apply soil erosion control measures i.e. channeling off runoff water and flash floods. - Sprinkle water on the site to control wind erosion
Noise generation	- Enforcing use of PPEs. - Use of noise abatements and appropriate advanced silencers and acoustic barriers. - Limiting speed on site.
Water use/waste water management	- Efficient water use and harnessing rain water. - Use rifle treatment system to manage sewerage wastes. - Treatment and stabilization of acidic and chemical wastes before disposal. - Channelling storm water to existing drainage channels.
Air pollution	- Sprinkling water to settle dust particles. - Enforcing use of PPEs. - Use of electrostatic precipitators and scrubbers at exhaust exit points to limit suspended particulate matter and dust particles.
Loss of biodiversity	- Landscaping and revegetation with indigenous species will be done. - Staff and community sensitization on vegetation importance. - Protecting fauna & flora from factory's pollution.
Occupational health and safety/accidents, fires risks and socio-cultural issues	- Enforcing /training use of personal protective Equipment. - Provision of ambulances to be on standby for emergency cases. - Sensitization of people on HIV/AIDS and STDs and other societal moral values.
Energy use	- Switch off all electrical appliances when not in use. - Optimize operations of electrical equipment to enhance energy conservation. - Make use of renewable energy such as solar power .

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF A MARINA AND TOURISM FACILITY AT KILIFI CREEK, KILIFI TOWN

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Construction of A Marina and Tourism Facility at Kilifi.

The Proponent (ELSEK & ELSEK (K) LIMITED) of the Proposed Construction of a Marina and Tourism facility at Kilifi Creek, Kilifi Town has proposed to construct a marina and tourism facility including, 165 slips for different sizes of boats, 18 floating houses, 2 bars, a cafeteria, kitchen, fueling point and an administrative office area at the Kilifi creek.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Degradation of environment at point of origin of raw materials	- Obtain raw materials for the construction from sources that are compliant with NEMA Regulations. - Procure quantities that are sufficient for the intended works only and recycle as far as practical to stem wastage. - Commit extensive use of recycled raw materials as will be appropriate and in a manner that does not compromise the safety of the development. - Wood requirements would be serviced by timber from planted woodlots.
Loss of traditional fishing ground for local fishermen	- Involve KMA inspectors in construction activities. - Design to be approved by KMA.
Conflicts between proponent and fishermen	- Hold consultative meetings with the local fishermen under the auspices of the Fisheries Department and the local BMU. The meeting will sensitize the local fishermen on the project and allow them to provide their input. - Develop a compensation plan for the local fishermen need to be agreed upon during the consultative meetings on the basis of the importance of the site. - Agree on a royalty programme and support for social development such as schools and medical facilities. - Carry out a survey of the creek bottom to identify as far as practical areas that have low densities of sea grass for the

	placement of the piers.		practical from neighboring properties.
Degradation of marine water quality	• Localize clearance only to the specific area where the pier will be constructed • Anchor excavation machinery on a floating base for piers away from the shoreline. • Placement of piers would be undertaken during calm seas given the high amplitude of the creek tidal regime. • Use of efficient excavation machinery and best technology so as to facilitate uptake of excavated soil materials and disposal in less sensitive areas of the sea i.e. sanctioning of sediments. • Ensure that site machinery have no leakage of oil or other lubricants. Oil change and machinery servicing shall be undertaken onshore and appropriate storage and handling facilities provided. • Prepare and implement an Oil Spill Contingency Plan. • KMA to approve local oil spill contingency plan.	Occupational Health and safety	• Contractor shall inform neighbors in writing prior to commencement of the development so that they are prepared psychologically at least two weeks in advance. • provided employees with earmuffs. • Register the site as a workplace with the Directorate of Occupational Health and Safety (DOHS). • Avail a rescue team complete with a boat and life savers. The employees shall wear life jackets at all times while in the sea. • Provide adequate and appropriate Personal Protective Equipment (PPE) including safety shoes, helmets, gloves and overalls for those working with machinery and on the terrestrial environment. • Provide correct tools and equipments for the jobs assigned. • Train employees in the use of all equipment that they will be required to operate. • Rest times and breaks will be observed. • First aid services and an emergency vehicle to be readily available at site including a boat as an ambulance with a first aid kit. • Moving parts of machines and sharp surfaces to be securely protected with guards to avoid unnecessary contacts and injuries during construction phase.
Navigational hazards	• Provide appropriate signage to guide sea craft traffic entering and leaving the creek. • Place boundary markings with appropriate safety lighting to indicate the presence of a construction site at night. • Ensure that marker buoys and navigational lights are deployed and activated. • KMA and KPA to confirm the efficiency of navigational markers and buoys prior to commencement of marina operations.	Generation of waste oils and the potential for spills	• Fuel dispensing will be done by certified attendants. • Ensure proper storage and handling of oils and fuels. • Prepare and oil spill contingency response plan. • Build the capacity of staff to handle oil spillage. • Procure an oil spill response kit and train staff Deploy the recommended containment booms and spill kits in the marina should the need arise. • Monitor water quality within the creek overtime for oil and grease levels.
Seascape changes	• Construction work will be short term. • Contractor to have a performance bond to ensure compliance with work progress schedules. • Creek users and residents will get used overtime.	Domestic effluent	• Installation of Biologically Engineered Single Sludge Treatment or its equivalent to treat waste to Tertiary Levels, where Total Nitrogen Loads are reduced to less than 10 mg/l and Phosphorus are reduced to 2-3mg/l. on the land area. • Thorough disinfection of effluents potentially going into water column or otherwise making contact with humans by use of BESST Sewer Treatment Plant, combined with chlorination of post treated effluents. • Reduce effluents going into the environment by recycling effluents to flush toilets – effluents from BESST Treatment Plant will be stored and disinfected through chlorination before it is reused for flushing toilets. • Reduce further nutrient loads going into the water column by using stored effluents from Treatment Plant to
Effluent from the workforce	• Provide portable toilet facilities for sanitary convenience for the workforce available in the active work areas at any given time. • Portable toilet facilities should be from a licensed dealer who also has a permit from NEMA for handling of such waste.		
Generation of solid wastes	• Appropriate waste collection bags shall be provided for all the work stations in the creek. • All solid wastes shall be collected, brought ashore, separated (into biodegradable and recyclable wastes) and disposed off by a NEMA licensed solid waste contractor.		
Air pollution	• Secure the site using appropriate dust screens. Sprinkle water on building materials that are likely to produce dust such as ballast. • Access road and dust surfaces at the construction site would also be sprinkled with water twice a day. • Employees will be provided with appropriate dust masks.		
Noise pollution	• Construction work and delivery of raw materials will be limited to day time hours only. • Concrete mixers will be located as far as		

irrigate lawn and hedgerows.

- Application of BESST Treatment technology reduces TSS to less than 10 mg/l, this in combination with effluent recycling and reuse regime reduces suspended solids to insignificant levels in the water column.
- Fire hazards
- Prepare and implement a Fire Hazard Response Plan.
 - Use of retardant material in construction works of the marina.
 - Qualified personnel to install electrical systems for the marina.
- Climate change
- Prepare and implement Contingency Plans for Phenomena associated with climate change such as sea level rise. This should be provided for in the engineering designs of the marina.
- Medical
- Prepare and implement a Contingency Plan for medical cases.
 - Have well trained first aid personnel on site at all times.
 - Have a adequately equipped first aid kits on site at all times Ensure there is always a standby ambulance/boat for transportation in case of emergencies
 - Have contact numbers of reliable health facilities and professional health practitioners.
- Maritime traffic
- Facility will Ensure that marker buoys and navigational lights are deployed at the right times.
 - Comply with the Regulations of the Kenya Maritime Act, 2006.
 - Comply with the Merchant Shipping Act.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- (c) Provincial Director of Environment, Coast Province.
- (d) District Environmental Officer, Kilifi District.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED NYAMIRA G.K PRISON ESANY AREA NYAMIRA COUNTY

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Nyamira G.K Prison Esiany Area Nyamira County.

The Proponent (Ministry of Home Affairs) of the proposed Nyamira G.K Prison intends to construct a prison whose features will include Gate Lodge with a Sentry, Armory, Generator room, Office, Visitor's bay, Switch board, Radio room, Administration block, modern prison wards and associated facilities at Esiany area, Nyamira County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Vegetation disturbance	• Ensure proper demarcation and delineation of the project area to be affected by construction work. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment and storage. • Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction. • Consider use of indigenous plant species in re-vegetation. • Plant trees at suitable locations so as to interrupt slight lines (screen planting), between the adjacent area and the development.
Increased storm water, runoff and soil erosion	• Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site. • Ensure that any compacted areas are ripped to reduce run-off. • Site excavation works be planned such that a section is completed and rehabilitated before another section begins. • Roof catchment be used to collect storm water and Construction of water storage tanks to collect water for use. • Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste. • Reuse packaging materials such as cartons, cement bags, empty metals and plastic containers to reduce waste at the site.
Dust emissions and exhaust emissions	• Ensure strict enforcement of on-site speed limit Regulations. • Avoid excavation works in extremely dry weathers. • Sprinkle water on graded access routes when necessary to reduce dust generation. • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle engines at these points.
Noise and vibration	• Sensitize construction vehicle drivers and machinery operators to switch off engines when not in use. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy duty equipment are insulated or placed

	in enclosures to minimize ambient noise levels.
Increased energy consumption	- Construction works will entirely be planned to be during day time when most of the neighbours will be at work. - Billboards will suitably be erected on the start of the project to psychologically prepare the people in the vicinity. - Ensure electrical equipment, appliances and lights are switched off when not in use. - Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy. - Monitor energy use during construction and set targets for reduction of energy use.
Occupational health and safety	- Implement all necessary measures to ensure health and safety of workers and the general public during operation of the housing project. - Electrical fittings near all potential sources of ignition should be flame proof. - Develop a suitable system for the safe collection, recycling and disposal of chemical wastes, obsolete chemicals and empty chemical containers. - Keep a record of all hazardous chemicals used at the project, cross-referenced to the appropriate chemical safety data sheets.
Hydrology and water quality degradation	- Hazardous substance control and emergency response plan that will include preparations for quick and safe clean up of accidental spills. - Identify areas where re-fuelling and vehicle maintenance activities and storage of hazardous materials, if any, will be permitted. - Hazardous-materials handling procedures to reduce the potential for a spill during construction to be prescribed.
Incidents ,accidents and dangerous occurrence	- Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms. - Enforcing adherence to safety procedures and preparing contingency plan for accident response in addition safety education and training shall be emphasized. - Provide measures to deal with emergencies and accidents including adequate first aid arrangements.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED UPGRADING DUNE PETROL AND COMPLIMENTARY BLOCK OF BUSINESS UNITS ON PLOT L.R. BLOCK 109/1609 IN RUAI, OFF KANGUNDO ROAD, NAIROBI.

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed upgrading dune petrol and complimentary block of business units on plot L.R. Block 109/1609 in Ruai, off Kangundo road, Nairobi.

The Proponent (Mr. Duncan J. N. Kandia) for the proposed upgrading dune petrol and complimentary block of business units in Ruai has proposed to upgrade the existing petrol station (known Dune) and construct a complimentary block of business units. The project consists of a new canopy to shelter two more underground tanks each having capacity of 20,000 cubic meters. A service bay, service pit and accessories shop for vehicle to be accommodated in the ground floor of the new block. The old tanks will continue holding kerosene, super and diesel fuels respectively.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Water supply	- Harvest rainwater for use during construction to supplement other supply sources during construction. - Conserve water during construction avoiding unnecessary use.
Traffic management	- Delivery vehicles to be given strict instructions on safe driving in the project area. - Developer to ensure signage & speed control in the area are observed by the delivery vehicles. - All delivery vehicles should follow a predetermined route. - No idling delivery vehicles at the site - Scheduled delivery of construction materials
Water quality	- Ensure minimum excavation to reduce soil erosion causing siltation of watercourses both artificial and natural. - Use liners where there is mixing of cement and other substances to reduce the amount of construction material in the runoff exiting the site. - Residents should be encouraged to adopt water conservation.
Air quality	- Dust control through regular sprinkling of the construction site and access road with water. - Maintenance of the machinery to ensure efficient combustion of fuel to reduce emissions.

- Noise pollution
- Restrict construction activities to a set time of between 8 and 5 p.m. from Monday to Friday
 - Proper maintenance of machinery and where possible, fix silencers on noisy equipment.
- Vegetation
- Ensure minimum clearance of vegetation.
 - Delivery vehicles to follow predetermined routes at all times.
 - Plant some trees, assorted flower bushes and grassing on completion of construction activities.
 - Maintain planted vegetation in healthy conditions.
- Waste management
- Resource use conservation to minimize construction wastes.
 - Recyclable materials from the construction waste should be recycled.
 - Proper disposal for those that cannot be reused
 - The residents should be encouraged through education to practice waste reduction at source.
 - Solid wastes temporary storage site should be kept in sanitary conditions
 - Contract a waste handler to ensure the proper disposal of generated waste or facilitate its recycling.
- Health and safety
- Provide adequate sanitary facilities for the workers.
 - Provide personal protective equipment for the construction workers.
 - Regulate speed limits of vehicles entering and leaving the site by placing warning signs along the road.
 - There should be a warning sign on the main access road indicating delivery vehicles turning.
 - All workers at the site should receive basic first aid training and other emergency procedures and the operation of machinery.
 - Ensure good housekeeping and a clean working environment is maintained by all workers to prevent accidents.
 - Ensure observance of speed limits on the access roads and in the project site.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED NJEGA HYDRO-ELECTRIC PROJECT,
KIRINYAGA EAST DISTRICT

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed development of Njega hydro-electric project, kirinyaga east district.

The Proponent (UNI Power Limited) of the proposed development of Njega hydro-electric project, kirinyaga east district has proposed to carry out construction of diversion weir, intake structure, water conductor system, de-silting chamber, fore bay, powerhouse, penstock, tail race channel and switchyard.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Increased solid waste generation	• A waste management plan will be put in place by the contractor • There will be adequate provision of strategically placed waste bins at the facility to ensure there is no idle litter. • Use durable long lasting materials that shall not need to be replaced as often thereby reducing the amount of construction wastes generated over time.
Dust and gaseous emissions	• Watering should be done where appropriate during construction. • Control speed and operation of vehicle on site. • Use environmentally clean fuels for the vehicles coming onsite.
Surface Drainage System	• Drainage channels should be installed in all areas that generate or receive surface water such as car parking and driveways. • Drainage channels should be covered with gratings to prevent occurrence of accidents and entry dirt that would compromise flow of run-off. • The channels should be designed with regards to the peak volumes such as periods or seasons when there is high intensity of rainfall to avoid overflow. • The drainage channels should be self-cleaning which means it should have a suitable gradient. • Provide suitable storm water drainage channels to effectively discharge water to safe areas. • Maintain existing drainage channels to avoid blockages.
Increased Energy Demand	• Switch off all electrical appliances when not in use • Put off all lights immediately when not in use /required or are not needed. • Use energy conserving electric lamps for general lighting.
Noise	• Workers should be provided with Personal Protective Equipment such as earmuffs when operating noisy operations. • There should not be unnecessary

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
