THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(Cap. 387)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED INTEGRATED WASTE HANDLING
FACILITY ON A PORTION OF PARCEL NO. 2182, KALUMANI
MNYENZENI ADJUDICATION SECTION, KALOLENI SUB-
COUNTY, KILIFI COUNTY

INVITATION TO PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Co-ordination Act, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Rafat Hazfree Works Limited, proposes to establish an Integrated Waste Handling Facility as well as auxiliary infrastructure. The facility layout will integrate administrative, operational, treatment, and disposal components (Site offices /administrative block, solid waste, chemical waste handling/treatment, crushing and neutralization pits, asbestos burial as well as medical waste incinerator sections), other associated facilities and amenities on Parcel No. 2182 (2182B), Kalumani Mwenyenzeni Adjudication Section, Kaloleni Sub-County, Kilifi County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Potential Impacts</i>	<i>Mitigation Measures/Controls</i>
Change in land use	• Apply and obtain a change of user from the County Government of Kilifi.
Potential conflicts with the local community	• Develop and implement a Grievances Redress Mechanism (GRM) for conflict resolution.
Biodiversity loss	• Landscaping after completion of project. • Tree planting within and around the project site (indigenous tree species are advised).
Land degradation	• Rehabilitate shallow gullies within the project site to prevent further erosion. • Restrict excavation to only the areas required for facility infrastructure and access roads. • Store excavated topsoil separately in protected stockpiles for reuse in backfilling.
Environmental risks of obtaining raw materials	• Source raw materials from sites that are licensed as per the Environmental Management and Coordination Act, Cap. 387 of the Laws of Kenya. • Procure quantities of construction materials in line with the Bill of Quantities prepared by a Licensed Quantity Surveyor to reduce wastage. • Re-use construction materials such as steel and wood cuttings which can be recovered.

Potential Impacts

Health and safety risks

Mitigation Measures/Controls

- Register the site as a workplace with the Directorate of Occupational Safety and Health Services (DOSHS).
- Construction works, installations and supervision should be carried out by registered contractors and engineers/architects.
- Obtain insurance cover for the workers as per Work Injury Benefit Act (WIBA), 2007.
- Provide appropriate PPE for all workers and visitors to the facility, including gloves, respirators, goggles, chemical-resistant boots, asbestos suits, and protective clothing for handling hazardous or infectious waste and enforce their use.
- Provide workers with correct tools for jobs assigned and train on their use.
- Ensure moving parts of machines and sharp surfaces are securely protected with guards to avoid unnecessary contacts and injuries.
- All accidents should be reported, investigated and corrective action taken to prevent reoccurrence.
- Develop and implement an emergency response plan for exposure to hazardous waste (asbestos, chemicals, medical waste) incidents, fire, or injuries.
- Install emergency safety facilities, such as eyewash stations, emergency showers, and first aid kits, strategically around the facility.
- Provide regular health check-ups for workers exposed to noise, dust, chemicals, or asbestos.
- Limit access to hazardous areas and use signage to warn on asbestos, chemical hazards, and high noise zones.
- Sensitize workers to report unsafe conditions and near-misses to continuously improve workplace safety.
- Comply with the provisions of Occupational Safety and Health Act (OSHA), 2007.

Fire hazards and emergencies

- Develop and implement emergency response plan for fires, explosions, or chemical-related incidents.
- Store flammable chemicals and waste oil in designated, roofed, and banded areas away from ignition sources.
- Provide adequate fire detection and suppression systems, including fire extinguishers, sprinklers, and fire blankets near storage and handling areas.
- Train workers in fire prevention, emergency response, and safe handling of flammable chemicals.
- Regularly inspect tanks, pipelines, and storage areas for leaks, corrosion, or structural weaknesses that could trigger fires.

<i>Potential Impacts</i>	<i>Mitigation Measures/Controls</i>	<i>Potential Impacts</i>	<i>Mitigation Measures/Controls</i>
Air pollution	• Segregate incompatible chemicals to prevent reactive hazards.		• Regularly inspect and maintain drainage channels, and containment structures to ensure they function effectively.
	• Sprinkle water on the unpaved access road at least twice daily to suppress dust. • Pave internal roads to reduce dust generation. • Ensure timely offloading and sorting to prevent waste accumulation and decomposition on-site. • Cover waste trucks entering and leaving the facility to reduce odor. • Conduct routine maintenance of vehicles and machinery to reduce exhaust emissions. • Store chemicals and waste oils in closed, well ventilated rooms with tight-fitting lids on all containers. • Maintain incinerators in optimal working condition (calibration, proper loading rates, adequate residence time) to minimize emissions. • Install pollution control devices on incinerators (scrubbers, filters) to reduce particulate and gas emissions. • Provide PPE for workers, including dust masks and respirators, especially in high-exposure sections. • Provide sealed containers for organic, hazardous, and medical waste to minimize odor escape. • Monitor ambient air quality quarterly to track. • Comply with the provisions of the Environmental Management and Co-ordination (Air Quality), Regulations, 2024.		• Train and sensitize workers on proper handling of wastewater, chemicals, and sanitation facilities, emphasizing prevention of leaks and improper disposal. • Apply for and obtain EDL from NEMA. • Monitor wastewater from the facility. • Comply with the provisions of the Environmental Management and Co-ordination.
		Ash and residue generation	• Collect incinerator ash regularly and store it in lined, covered, and labeled containers to prevent dispersion and contact with workers or the environment. • Dispose of ash in lined pits to prevent soil and water contamination. • Train workers on safe handling, transport, and disposal of incinerator ash.
		Increased water use	• Install water-efficient fixtures in all sanitation and staff facilities. • Harvest and store rainwater to supplement non-potable water needs and reduce pressure on the borehole. • Install leak-detection systems and conduct routine inspections to promptly identify and repair leaks in pipes, tanks, and fittings. • Install water meter at the borehole to monitor usage. • Sensitize staff on water conservation practices and enforce responsible water-use. • Keep water consumption records.
Noise pollution	• Procure and provide adequate ear muffs to workers at peak noise producing areas. • Delivery of raw materials, installation and fabrication works should be limited to day time hours only between 8 a.m. to 5 p.m. • Service vehicles, generators, and equipment regularly to minimize excess noise. • Conduct noise levels monitoring . • Comply with the provisions of the Environmental Management and Co-ordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009	Increased energy use	• Procure energy-efficient equipment for waste handling, lighting, and office operations. • Use renewable energy sources where feasible, such as solar panels for lighting or auxiliary power. • Install smart meters to monitor electricity usage. • Create awareness among employees on energy conservation such as switching off lights when not in use. • Conduct energy audits at least once every three years and implement the recommendations. • Comply with the Energy Act, 2019.
Liquid waste generation	• Install properly designed drainage system to channel stormwater away from waste handling areas. • Construct lined leachate collection systems around waste reception, sorting, and storage areas to prevent seepage into soil. • Designate and pave wash-down areas with controlled drainage leading to an oil interceptor before discharge.	Contamination of soil and water resources	• Construct a concrete paved area to be used for clean-up activities. • Waste water from the clean-up area should be directed towards the established water drains. • Install bunded and impervious containment areas around chemical tanks, waste oil tanks, and neutralization/crushing pits to capture spills and leaks.

<i>Potential Impacts</i>	<i>Mitigation Measures/Controls</i>
	• Install a leachate collection and drainage system to capture contaminated runoff and direct it to the bio-digester. • Regularly monitor soil and water resources (borehole and water pan).
Labor influx and social concerns	• Prepare a site-specific Labor Influx Management Plan and implementation framework prior to project commencement. • Implement measures to prevent, identify, address, and resolve conflicts before and when they occur including SEAH at the workplace including anonymous reporting systems. • Develop and implement a Grievances Redress Mechanism (GRM) for conflict resolution.
Climate change risks	• Prepare annual carbon footprint reports and implement the recommendations. • Comply with the Climate Change Act 2023 and National Climate Change Action Plan 2023–2027.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839–00200, Nairobi.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(Cap. 387)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED ABBREVIATED RESETTLEMENT ACTION PLAN FOR JICA PREPARATORY SURVEY FOR THE PROJECT FOR REHABILITATION OF AHERO IRRIGATION SCHEME-REF NO. LAAI-017-2023

INVITATION TO PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Co-ordination Act, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, National Irrigation Authority, proposes to undertake an Abbreviated Resettlement Action Plan (ARAP) studies for the proposed Rehabilitation and upgrade of the Ahero Irrigation Facilities (water pumping station, rehabilitation of the irrigation/drainage facilities, flood protection works and expansion of irrigation and drainage facilities) to Kasiru–Kolal in Ahero Irrigation Scheme-Ref No.LAAI-017-2023, Kisumu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Oil Spills and leaks	• The maintenance of vehicles and other machinery should be in designated locations where potential pollution is unlikely such as on concrete platforms. • There should be regular maintenance of machinery to ensure they are in good working conditions and are free from leaks. • There should be adequate operator training to adopt measures that are preventive in the use of such machinery.
Loss of Habitats	• Educate the workers to avoid unnecessary killing of wildlife, especially protected species, on construction sites. • The alignment is a rehabilitation of already existing canals, there will be minimal disturbance. • Future modification of the canal routes should ensure an ecological survey is done.
Soil Erosion	• The topsoil should not be utilized during the construction activities. • Rehabilitation of degraded environment should be undertaken to stabilize the soil and therefore reduce the rate of soil erosion and siltation. • Soil conservation measures should be taken especially at stockpiled areas. • The excavation works should be compacted.
Increased demand for red soils/gravel/construction material during dyke construction	• The materials should be sourced from an approved site. • There should be adequate re-use of the excavated waste materials. • The proposed site quarries and borrow pits should be done carefully to minimize impacts on various land uses. • The borrow pits should be indicated on a plan and approved by the local authority. • There should be adequate landscaping, backfilling and draining of the depressed areas to prevent breeding grounds for disease vectors.
Risk of child labour	• Compliance with the minimum age set forth in the Child Labour Laws.
Increased HIV/AIDs prevalence to the community and Construction workforce	• Regular education and sensitization of workers and the local communities on the dangers and prevalence of the disease. • Instituting HIV/AIDS awareness among the project workers. • There should be adequate and regular passage of information regarding the spread and risk of contracting the disease. • There should be the provision of adequate prevention measures.
Occupation health and safety hazards	• There should be a comprehensive health and safety policy to safeguard the health of the workers including followings but not limited.

*Impacts**Mitigation Measures*

- The project site should be well sprinkled with water to reduce the dust that is produced.
- Establish an assembly area for all workers in case of an accident and maintain a record of all works at the site at each time, in addition, workers need to be sensitized on construction safety measures.
- Fully equipped first aid kits should be provided at the site and first aid training given to the supervisors for handling potential casualties.
- Clean sanitary facilities and clean drinking water should be provided at the site as well.
- Warning signs should be erected warning of construction activities and heavy machinery at the site.
- Risky areas such as deep pits should be covered or fenced off to avoid accidents.
- There should be proper hoarding of the site to control the movement of the public into the area.
- All workers should be provided with full protective gear and there should be a proper use of PPEs. These include working boots, overalls, helmets, goggles, earmuffs, dust masks, gloves among others to safeguard their safety.

Accidents, increased traffic and risk of traffic accidents

- The contractor should ensure there is regular watering of dusty roads and maintenance during this stage.
- The Contractor should have visible signages and traffic controllers to manage the flow and avoid snarl ups or accidents.
- Establish a construction safety plan and ensure that workers are thoroughly familiar with it.
- Ensure the safety of school children, especially during their commute to and from school.

Potential impacts due to increase of irrigated rice cropping such as water-logging, soil salinization and sedimentation and nutrient Leaching

- The use of fertilizer should be regulated and should be as is recommended by the agricultural Officer in charge.
- AIS to train their IWUA on irrigation water management training, coupled with installation of water use control and regulation meters to curtail over-irrigation.
- There should be adequate and regular monitoring of water and soil quality through laboratory analysis before project implementation and with every annual audit.
- The intakes and canals should be desilted frequently.
- The existing IWUA by-laws on cultivation limits to the river systems should be adhered to strictly and punitive action taken to any violators

Pests and crop diseases

- The farmers should be trained on pest and disease control and management, especially integrated pest management that combines chemical and environmentally friendly methods.

*Impacts**Mitigation Measures*

- There should be an increased pest and disease surveillance to monitor the prevalence of existing pests and diseases, as well as the emergence of new ones, consequently, regular information needs to be disseminated to the farmers adequately to identify emerging pests and diseases.

Human-wildlife conflict

- KWS in consultations with the local community where possible should enlighten the locals not to kill wild animals within the project area but work with KWS to take them to conservancy areas.
- KWS to have contact with people on the ground to report any cases of emergency for speedy action.
- Where need be, key stakeholders to enhance public awareness and participation in conservation activities, Enforcement of wildlife Act.
- KWS should occasionally conduct surveys in the area during the heavy rains to check for any cause for alarm and take necessary precautions.

Overuse of irrigation water

- Intake volume of the irrigation water to be withdrawn by the new pump should be aligned with the water right to avoid any adverse impacts to the downstream.

Water borne diseases

- The members of the community need to be advised to avoid bathing in the canals and using the same water for domestic use. Provision of appropriate guidance in cooperation with local offices to prevent the spread of mosquito-borne diseases is recommended.
- Report any increased/extreme occurrence of these diseases in the scheme and seek immediate medical attention.

Inappropriate maintenance/damages on the dyke

- Monitor and maintain the renovated facility to ensure that there are no activities that interfere with its function. For example, there have been cases where embankments were intentionally damaged to make them easier to pass through by bicycle or motorcycle.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- County Director of Environment, Kisumu County.

(Cap. 387)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT OF NSSF TWIN
TOWERS ON PLOT L.R Nos. 209/12219, 12220, 11331, 12287 AND
11412 AT THE JUNCTION OF KENYATTA AVENUE AND
UHURU HIGHWAY; NCBD, NAIROBI CITY COUNTY

INVITATION TO PUBLIC COMMENTS

PURSUANT to Section 59 of the Environmental Management and Coordination Act, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, National Social Security Fund, proposes to undertake a development which will comprise of Twin Towers (Tower A and Tower B), Tower A (260 metres, 60 storeys) and Tower B (140 metres, 35 storeys) rising from a shared multi-level podium. It will comprise of various components such as hotels, apartments, offices and various commercial facilities on plot L.R. Nos. 209/12219, 12220, 11331, 12287 and 11412 at the junction of Kenyatta Avenue and Uhuru highway; NCBD, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Soil erosion	Control earthworks; Install drainage structures properly; Ensure management of excavation activities
Loss of vegetation	Restore/re-establish vegetation in some parts of the disturbed areas through implementation of landscaping program.
Air pollution	All trucks and any other mode of hauling soil sand and other loose materials to and from site should be covered. Sprinkling water on dry soils in excavated areas, pavements. Use of clean fuels for machines and equipment. Stockpiles of earth should be sprayed with water or covered during dry seasons; Provide dust masks for the personnel in dust generation areas; Sensitize construction workers on pollution control measures.
Emission of green house gases	Installation of a solar PV system on the rooftop to supplement KPLC supply thereby abating about GHG emissions. Implementing energy efficiency mechanisms to reduce energy consumption. Undertaking annual energy audits to monitor progress and exploit opportunities for energy efficiency.
Fire risks	Install fire alarm with smoke sensors; Have standby fire extinguishers at the site in case fire erupts; Declare places with flammable construction materials as "NO SMOKING ZONES" and display conspicuous notices of the same.
Traffic disruption	Properly plan for transportation of materials to ensure that vehicles are optimally filled to reduce the number of trips done or the number of vehicles on the access roads; Employment of formal flagmen/women to ensure the public safety; Place clear signage's at the gate to alert drivers to be cautious about the construction and to look out for entering and/or exiting vehicles.

Possible Impacts

Noise pollution

Mitigation Measures

- Sensitize workforce including drivers of construction vehicles; Install sound barriers for pile driving activity; Install portable barriers to shield compressors and other small stationary equipment where necessary; Display signs to indicate construction activities; Maintain all equipment; Workers in the vicinity of high-level noise to wear safety and protective gear.

Occupational safety and health

- All workers and workers and visitors on site to use mandatory protective gear. Unattended entry to the project site to be restricted. Use of efficient and well maintained machines to lift and transfer materials. Removal of all dangerous materials that may pose a threat such as metal bars, wires, glass and broken equipment. Availing of fully equipped first aid kits to help address emergencies. Warning signs to all users and visitors be placed at appropriate places. Educate construction works and tenants on health and safety risks and their prevention.

Public health, occupational health and safety

- Train staff/ workers on occupational health and safety. Provide full protective gear& workmen's compensation cover in addition to the right tools and operational instructions. Design of sewerage system should be as provided in the plans and should be constructed to approved size and design, standard and of approved materials. Avoid undesirable, substandard hazardous or unauthorized materials during construction and maintenance.

Contribution to climate change

- Water management; The project should invest in water management strategies like rainwater harvesting, storage facilities, and efficient water use practices. These measures aim to mitigate water scarcity during dry periods and reduce flood risks during heavy rainfall events. Infrastructure Design: Incorporate resilient features to withstand extreme weather like flooding, storms, and high temperatures. Energy Efficiency: Implement technologies and practices to reduce greenhouse gas emissions and dependency on fossil fuels. Biodiversity Conservation: Protect and enhance natural ecosystems to preserve biodiversity and ecosystem services, including reforestation, habitat restoration, and sustainable land management practices

Insecurity and social impacts

- Provision of security guards, CCTV cameras, security lights and other security apparatus during the entire project cycle. Adhere to work timings in line with the NEMA licensing conditions.

Increased water use

- Installation of motion-sensing taps, urinals, and toilets to automatically switch off once the user leaves the station. A motion sensor tap would cut up to 85% of annual water usage compared to conventional taps. Rainwater harvesting: The harvested water would be used for cleaning, flushing toilets, watering plants, etc.
- Avail storage tanks.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Increased generation of waste	Build construction workers' capacity on sanitation and hygiene practices. Segregation of waste at the source during the project cycle. Special attention shall be paid to the sanitary facilities on site; Garbage shall be disposed periodically. Contract a NEMA licensed waste handler

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

IMPACT ASSESSMENT STUDY REPORT FOR THE
PROPOSED RESIDENTIAL APARTMENTS ON PLOT L.R NO.
NAIROBI/BLOCK 17/283, KILUNGU ROAD, KILIMANI,
NAIROBI CITY COUNTY

INVITATION TO PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Co-ordination Act, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Mingland Company Limited, proposes to construct a 25No. storey residential apartments comprising of 2-level basement for parking, 294no.(four, three and two bedrooms residential apartments), water supply connection, power supply intergration, back-up generators, fire detection and suppression systems, telecommunications provisions associated facilities and amenities on L.R.No. Nairobi/Block 17/283, Kilungu Road, in Kilimani, Nairobi County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Waste management (Construction wastes)	- Waste materials will be segregated on-site into appropriate skips/containers and removed from site by suitably permitted waste contractors to authorized waste facilities/landfills. - Where possible, reusable waste materials will be reused on-site to minimize raw material consumption. - Excavated of ground and subsoil will be removed for offsite reuse, recovery, recycling and/or appropriate disposal by licensed handlers. - Leftover materials (e.g. timber off-cuts, broken concrete blocks/bricks) and any suitable construction materials shall be re-used on-site, where possible.

<i>Impacts</i>	<i>Mitigation Measures</i>
	- Any hazardous waste generated such as (chemicals, solvents, glues, fuels, oils) will be segregated and stored in appropriate receptacles (in suitably banded areas, where required). - All construction staff will be provided with training regarding waste management and handling procedures.
Noise and vibration	- Construction working hours will be restricted to daytime. - Vehicles and machinery will be maintained in good and effective working order and operated in a manner to minimize noise emissions. - The compressors, generator and engine compartment doors will be kept closed and machinery turned off when not in use. - All pneumatic tools will be fitted with silencers/mufflers. - The use of noisy equipment will be limited, i.e. avoiding the use of noisy plant/machineries early in the morning. - Drop heights will be minimized when loading vehicles with rubble. - Ensure hoarding, screens or barriers are erected to shield noisy activities. - The contractor will ensure that all plant/machineries comply with the relevant statutory requirements. - Occupiers of adjacent properties will be informed by the Contractor up to 2 weeks in advance of the planned works, including the duration and likely noise and vibration effect.
Air quality (Increased atmospheric particle concentrations)	- Water misting, or sprays shall be used as required if particularly dusty activities are necessary during dry or windy periods. - The contractor will regularly inspect, test and maintain all the safety equipment (including scaffolds, guardrails, working platforms, hoists, ladders and other means of access, lifting equipment etc. - Workers will be provided (before they commence work) with appropriate PPEs suitable for each work/activity such as safety boots, helmets, gloves, protective clothes, goggles, and ear protection. - The contractor shall adhere to the Occupational Health and Safety Act 2007 and Employment Act, Cap. 226.
Drainage and flooding	- The contractor shall ensure that construction materials, debris, or waste do not obstruct existing drainage channels within the project corridor. - The project engineer will conduct routine monitoring of drainage channels to ensure they remain clear of waste and debris throughout the construction period. - Stormwater shall be directed into designated drainage channels, ensuring that it does not flow onto or impact adjacent properties.

<i>Impacts</i>	<i>Mitigation Measures</i>
Social impacts (privacy issues)	- The contractor shall implement a non-discriminatory hiring and wage policy, ensuring that employment and compensation decisions are free from bias based on gender, age, religion, ethnicity, or place of origin. - The contractor will enforce a strict zero-tolerance policy on sexual harassment in the workplace, ensuring a safe and respectful working environment. - An accessible grievance mechanism shall be established and communicated to Project Affected Persons (PAPs) to address complaints.
Generation of solid waste	- The proponent will abide by the Nairobi County (Solid Waste Management Act, 2015) and Environmental Management and Coordination Act (Waste Management) Regulation 2024 in managing and disposing solid waste from the facility. - The proponent shall provide different colored bins for different categories of waste and ensure complete segregation of biodegradable and non- biodegradable wastes. - Spent oil from the backup Diesel Generator (DG) sets should be stored in HDPE drums in isolated covered facility and disposed off as per the Hazardous Wastes regulations.
Increased energy use	- The project proponent should provide guidelines to the users to ensure conservation of energy. - Use of energy efficient electrical systems should be promoted and encouraged. High efficiency lamps with electronic ballast should be used. - The power cabling shall be adequately sized to maintain the distribution losses not to exceed 1% of the total power usage. - The project proponent should incorporate solar energy in water heating systems and outdoor lighting. - Use of energy efficient lighting systems e.g. High-Pressure Sodium Vapour (HPSV) Lamps, LED etc. shall be used and promoted.
Increased water supply and demand	- Water requirements during operation phase shall be met by Nairobi City Water and Sewerage Company (NCWSCO). The erratic supply from NCWSCO. Shall also be supplemented with ground water sources (borehole) if practically possible. - Use of water meter conforming to Kenya water usage standards (Water Quality Regulations, 2024) should be installed at the inlet point of water uptake to monitor the daily water consumption. - Use of water saving fixtures in common areas e.g. sensor taps, high pressure low volume cisterns. - The proponent must promote and practice rainwater harvesting on a regular basis to reduce pressure on water demand.

<i>Impacts</i>	<i>Mitigation Measures</i>
Occupational safety	- Firefighting systems should be designed in compliance with the Factories & Other Places of Work (Fire Risk Reduction) Rules, 2007. - All hydrant outlets should be provided with protective caps to help prevent vandalism. - Unprotected and bare electrical cabling/wiring that is exposed to water or contact with flammable materials will be discouraged. - Training and awareness programmes will be rolled out at household level, with a focus to:- - Ensure awareness on the use of single sockets/fuses for electrical equipment; - Fire alarms should be placed on every floor of each unit; - Conduct periodic assessments such as. Electrical inspection, fire safety audits from time to time to ensure occupational safety.
Effluent discharge (sewerage and wastewater)	- All wastewater and sewerage will be channeled into the existing sewerage system provided by NCWSCO. - The proponent is encouraged to adopt green building technology incorporating techniques like treating and recycling wastewater to prevent overload of the existing sewer trunk.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- County Director of Environment, Nairobi City County.

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT
STUDY REPORT FOR THE PROPOSED RESIDENTIAL
DEVELOPMENT ON PLOT TITLE NO. NAIROBI/BLOCK
188/1695 AND 1696 LOCATED ALONG THE NOTHERN BY-
PASS IN MARURUI AREA OF NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Co-ordination Act, *Cap.* 387, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent L&K Developers Limited, proposes to construct a residential complex comprising of ground plus 6No. floors. Ground floor will comprise 180No. car parking spaces and pool equipment, 1st to 6th floor will comprise of 96No. two bedroom units and 48No. three bedroom units totaling to 144No. residential units, other associated facilities and amenities on plot no. Nairobi/Block 188/1695 and 1696 located along the Northern by-pass in Marurui area of Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Air pollution	• Use of dust screens/nets around the construction site to contain and arrest dust. • Regular sprinkling of water on work areas to prevent fugitive dust violations. • Ensure no burning of waste such as paper and bottles on non-designated areas. • Regular covering and watering of all exposed stockpiles on site. • Regular and prompt maintenance of construction machinery and equipment to minimize generation of hazardous gases.
Noise pollution	• Construction works shall be carried out during the day. • The contractor shall use noise shields on noisy equipment such as corrugated iron sheet structures. • All noisy activities shall be scheduled concurrently during the construction to reduce the exposure period. • Operation of the noisy machinery shall be carried out when necessary and switched off when not in use. • Provide and enforce the use of Personal Protective Equipment (PPE) by the workers at all times during the construction phase. • Monitor noise levels as per NEMA & NCC guidelines.
Oil pollution	• Proper storage, handling, and disposal of new/used oil and related oil wastes. • Routine maintenance of the construction equipment to avoid oil leaks. • Maintenance of the construction equipment to be carried out in the contractor's yard (off the site).
Solid waste	• Engage the services of the NEMA waste contractor to handle the waste. • Covering of the trucks when transporting building materials and waste. • Segregation of the waste at source before disposal to designated areas. • Use of an integrated solid waste management system through a hierarchy of options: • source reduction, recycling, composting and reuse. • Efficient use of the materials to reduce waste and recycling/reuse where feasible. • Monitor waste as per the waste management regulations.

<i>Impacts</i>	<i>Mitigation Measures</i>
Liquid waste	• Channel all liquid waste to the NCWSC were line serving the area • Conduct routine inspection and monitoring of the internal drainage system to identify and repair any leakages and blockages. • Provision of adequate sanitary facilities to the workers during the construction. • Regular inspection and maintenance of the internal sewer system.
Energy demand	• Use of solar energy as an alternative source of energy. • Install and routine maintenance of energy efficient fixtures and fittings. • Turn off the machinery and equipment when not in use. • Put off all the lights immediately when not in use.
Increased traffic	• Ferry building materials during off-peak hours. • Employ traffic marshals to control traffic in and out of site. • Provide billboards at the site/entrance to notify motorists and the general public about the proposed project. • Enforce speed limits for construction vehicles especially along the adjacent roads. • Develop a traffic management plan to ensure that the site vehicles do not interfere with the regular traffic along the access roads.
Insecurity	• Engage services of security guards • Install and regular maintenance of the CCTV cameras • Place hotline numbers on strategic places • Sensitize residents on security precautions • Sensitize the residents on “Nyumba Kumi Initiative”
Storm water drainage	• Proper design and maintenance of the drainage structures. • Construct internal drains within the property for storm water management. • Proper installation of cascades to break the impact of water flowing in the drains. • Rainwater harvesting to reduce surface runoff. • The proponent will ensure drainage facilities are fitted with adequate functional oil water separators and silt traps.

<i>Impacts</i>	<i>Mitigation Measures</i>
Health and safety of workers	• Register the construction site as a workplace with DOSHS. • Provide PPE to the workers and ensure that they wear them at all times. • Provide first aid kit for the workers on the site. • All workers to be adequately insured against accidents. • All workers shall be sensitized before construction begins on how to control accidents related to construction. • Keep a record of the public emergency service telephone numbers including Police, Fire brigade, and Ambulance at strategic points. • Ensure that the workers are registered with SHA / NSSF and remit appropriate fees. • Prepare a comprehensive contingency plan before construction begins on accident response.

The full report of the proposed project is available for inspection during working hours at:

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MIXED-USE COMMERCIAL AND RESIDENTIAL DEVELOPMENT ON PLOT L.R NO. BLOCK 26/4, 26/5 AND 26/6, SYOKIMAU, MAVOKO SUB-COUNTY, MACHAKOS COUNTY

PURSUANT to section 59 of the Environmental Management and Coordination Act, 1999, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Azure Horizon Limited, Golden Vista Investment Limited, proposes to construct a commercial mall and 5No. residential blocks (A, B, C,D and E). Commercial mall will comprise of ground floor and 9no. floors, first to fourth floor will comprise of commercial spaces, 5th floor will comprise of (hotel and restaurant, recreation and reception), 6th to 9th floor comprising of (hotel guest rooms), water storage tanks, fire assembly area, firefighting systems service systems, service corridors, waste collection bay, loading and offloading zone, emergency exits, power backup room elevator lift and landscaped frontage. Residential block will comprise of ground, mezzanine and 16 floors, 711No. Parking spaces, 1st to 16th floor comprising (264No. studio apartments, 248No. one-bedroom units, 256 No two bedroom units, 31No. 3 bedroom units and 32No. 4 bedroom units), swimming pool, generator room, other associated facilities and amenities o plot L.R No. Block 26/4, 26/5 and 26/6, Syokimau, Mavoko Sub-county, Machakos County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Land disturbance	• Limit site clearance strictly to approved development footprints. • Implement erosion and sediment control measures including silt traps, sediment fences, and temporary bunds. • Stabilize exposed surfaces promptly through compaction, mulching, or temporary surfacing. • Schedule earthworks during dry weather where practicable and progressively rehabilitate completed sections.
Storm-water runoff	• Design a hydraulically adequate stormwater drainage system capable of managing extreme rainfall events and future climate variability. • Integrate on-site attenuation, infiltration trenches, permeable paving, and landscaped swales. • Construct lined drains and energy dissipation structures to reduce runoff velocity. • Conduct routine inspection and desilting to prevent blockage and localized flooding.
Increased traffic, access	• Develop and enforce a Construction Traffic Management Plan.
Constraints and road safety risks	• Schedule delivery of materials and equipment during off-peak hours. • Deploy trained traffic marshals at access points and install advance warning signage. • Enforce speed limits, axle load compliance, and use of licensed drivers. • Maintain safe pedestrian interfaces around the site perimeter.
Air quality	• Erect dust screens and hoardings around active work zones. • Undertake regular water sprinkling on exposed surfaces and haul roads. • Cover stockpiles and transport trucks carrying friable materials. • Prohibit open burning of waste. • Maintain machinery to minimize exhaust emissions in accordance with manufacturers' specifications.
Noise and vibration	• Restrict noisy construction activities to approved daytime hours. • Use noise-attenuated equipment and temporary acoustic barriers where necessary. • Schedule high-noise activities concurrently to reduce exposure duration. • Provide and enforce use of hearing protection PPE for workers.

<i>Impacts</i>	<i>Mitigation Measures</i>	<i>Impacts</i>	<i>Mitigation Measures</i>
Occupational health and safety risks	• Monitor noise levels to ensure compliance with applicable standards. • Implement a Site-Specific Occupational Health and Safety Management Plan (OHSMP) compliant with OSHA, 2007. • Conduct safety inductions, toolbox talks, and task-specific risk assessments. • Provide appropriate PPE and enforce its use at all times. • Install safety signage, barricades, and controlled access to hazardous areas. • Maintain first-aid facilities and trained first responders on site.	Increased energy demand and carbon footprint	• Provide adequate underground and rooftop water storage tanks. • Incorporate rainwater harvesting systems for non-potable uses. • Monitor water consumption and promptly repair leakages. • Integrate renewable energy solutions, including solar photovoltaic systems for common areas. • Install energy-efficient lighting, equipment, and motion sensors. • Promote energy conservation practices during construction and operation. • Conduct regular maintenance of electrical and solar installations.
Fire hazards and emergency situations	• Provide portable fire extinguishers and firefighting equipment at strategic locations. • Store flammable materials in designated, ventilated areas away from ignition sources. • Prohibit smoking and uncontrolled ignition sources on site. • Ensure all electrical installations are undertaken by licensed professionals. • Designate fire assembly points and conduct emergency response drills.	Visual and urban landscape impacts	• Apply architectural articulation and façade treatment to reduce visual massing. • Incorporate soft and hard landscaping to enhance visual integration with surrounding developments. • Maintain orderly signage, lighting, and external finishes. • Implement a long-term landscaping and façade maintenance plan.
Solid waste generation	• Implement a Solid Waste Management Plan (SWMP) aligned with EMCA Waste Management Regulations, 2006. • Segregate waste at source into recyclable, inert, hazardous and organic streams. • Engage NEMA-licensed waste transporters and disposal facilities. • Apply the waste hierarchy: reduce, reuse, recycle, recover, and dispose responsibly. • Provide designated waste storage and segregation areas within the development.	Community health, safety and social interaction impacts	• Maintain secure site boundaries and controlled access points. • Implement grievance redress mechanisms for neighboring communities. • Minimize nuisance impacts (noise, dust, traffic) through proactive management. • Promote local employment opportunities where feasible. • Ensure adequate lighting, surveillance, and security measures during operation.
Liquid waste and sewage generation	• Connect to the approved public sewer system upon acquisition of relevant permits. • Design internal sewer lines with inspection chambers and rodding eyes for maintenance. • Conduct routine inspection and preventive maintenance of sewer infrastructure. • Provide adequate sanitary facilities for construction workers and decommission them after construction.	The full report of the proposed project is available for inspection during working hours at: (a) Director General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi. (b) County Director of Environment, Machakos County. A copy of the EIA report can be downloaded at www.nema.go.ke The National Environmental Management Authority, invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director General, NEMA to assist the Authority in the decision making process for this project. Kindly quote ref. No. NEMA/ENVIS/SR/00424 Comments can also be e-mailed to dgnema@nema.go.ke	
Increased water demand and resource pressure	• Connect to the public water supply and supplement through licensed vendors as needed • Install water-efficient plumbing fixtures and appliances.	MAMO B, MAMO, Director-General, National Environment Management Authority.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be Clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE HUMAN RESOURCE POLICIES AND PROCEDURES MANUAL FOR THE PUBLIC SERVICE —

Kenya Gazette

A.30 (1) All communication for publication in the *Kenya Gazette* should reach the Government Printer not later than Friday of the week before publication is desired.

(2) A State Department will be required to meet the cost of advertising in the *Kenya Gazette*.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
